AFFAIRS IN SOUTH CAROLINA. The Inhabitants Literally Starving. QUESTION OF A PROVISIONAL GOVERNOR. Temper of the People Subdued.

WADE HAMPTON'S DETERMINATION. New York, June 27. The World's Columbia (8. C.,) letter of the 21st, says: All along the main roads, for a hundred miles around Columstry has been stripped of its necess: ries. Horses, mules, provisions and even chick-cus are gone, and the railroads torn up. It is ens are gone, and the railroads torn up. It is no figure of speech to asy these people are starving. The little harvest of wheat is being reaped, but they have no mills to grind it. Their com will soon be eatable, but they have already suffered from the pangs of hunger. They are destitute almost of everything, and all poor alike. The wealth of the Carolinas consist of lands, negroes and mules; of the latter they have been deprived by either army, and the two former, the more they have, the worst they are off, hundreds of them are living with their less misgrable neighbors or friends; unable to got any where; mable to work; begging among beggars; in dress, and in presentions lost. The general degree refractory. The people are submissive, and for the most part, resolved to do the best they can under the circumstances.

The general wonder is, why a Provisional Governor is not appointed, but no meetings to express their views, their deserts, or their preference. As far as I have heard I think W. W. Boyce is the most popular man of the people. Ex. Gov. Aliken is thought to be too old. Mr. Boyce is at his heme, west of here. He speaks very candidly and fairly of the position.

Mr. Trenholm, of the Confederate States Treasury, who was 1 tely arrested here and sent to Charleston, confesses to its complete subjugation, and says he has no doubt the Country will be eventually happier as united, and more prosperus as a free people.

This process has been spylied to a curtain extent in the printing of colored maps, but being too tedions and expensive, has been most ingeniously adapted and modified. Suppose a map wants four colors, four colored blocks are fixed in one frame, which moves by machinery in the most exact way on the table of the printing press. Boneath this frame a large four quantered sheet is placed and receives an impression, each quarter bearing a different color. This done the frame is turned round one quarter, bringing a different color to bear on each portion of the printed sheet. The impression is again taken and the process continued until the whole number of colors are deposited. Even the union of two colors to form a third—panel, yellow and blue to make green—is accomplished now to perfection, from the rapidity by which the process is carried on, and these four blocks in the frame."

From a report taken from a Manchester paper, and published in yesterday's issue of the Times, it appears that some of the unemployed "Confederate" pirates, or rulemans profiting by their example, have taken to the trade of plundering British vessels on the West coast of irreland. The 149th numbers about 800 men, out of 1,800, the maximum figure to which the regiment was recruited. The 150th has but about 200 men left out of 1,000. Charge of Adultery.—Wm. Celebration of the Fourth by the Turners.

—We are happy to learn that the German Turners of this city have determined on celebrating the Fourth of July in a becoming manner, and are making the necessary arrangements, which will be duly almounced when perfected. There are no none pariotic people in the country than the German element of society, as is evidenced by their determination of celebrating the day of National Independence, after all efforts on the part of our citizens had been given up for a proper observance of it. We are confident that whatever programme they may propose it will be well carried through by them.

Be well carried through by them.

Removal.—The office of Wm. Stewart, Esq. General Freight Agent of the Cleveland and Pittedburgh Railroad Company, has been removed from the old house on the corner of Penn street and the Canal, to the new building on the opposite side of the street. The bust ness of the agency has always been conducted to the conducted to the street and satisfactory manner, and there is perhaps no more room for improvement in this respect; but the change to more elegant and commoditions quarters will be gratifying not only to the agent and his clerks, but to all having business to transact with this department of the company.

The Wheeling Intelligencer is out in a hand-John Mirchell.—It is a significant fact that John Mirchell, the renegade Irish patriot, who supplemented an early life spent in labor for Irish freedom, by shameless efforts for the propagation of American slavery, went from the editorship of the Richmond Enquirer, a robel organ of interact vindictireness and ferrocity, straight to the editorial chair of the New York News, and without a charge of principles or policy, continued his assaults upon the Union and free government, as though nothing lad happened, and to the evident content of the copperheads who patronize that sheet. Another fact to prove the identity of the rebei and copperhead factions. This Mishawara, Ind., Enterprise says that a geniemen who had recently came from Pennsylvania to the vicinity of South Bend, for the purpose of buying a farm, was robbed of \$6,743, all be had, on Wednesday evening lost, a short distance west of town. The robbery was committed by two villains who had tracked their victim from the East. They tied him securely, and after taking his money fied. The robbers have not been heard from.

A NEW enterprise has been started at Augusta, Ga., in the shape of a foundry and machine shop, for the manufacture of agricultural im-plements. Some Yankeespirit manifested there.
