What is Said of the President's Feelings and Probable Action,

WASHINGTON, July 1 .- A special to the New York Commercial says: The Executive is de-liberating on the verdict of the Military Commission, and will examine the voluminous testimony clotely before rendering a decision. It is understood that the President is by no means pleased with the responsibility imposed upon him of encorsing the proceedings ; and it is not. improbable that he may quash the affair, and order a new trial by the civil courts. All the priconers were found guilty by the

court. President Johnson's health is almost entirely restored, but he will not again receive visitors until Wednesday.

sizable to be 'on the side that is going to what His conversion, howere, he sacribes to a higher power than bunkan volition; be thinks the re-sult of the war has shown that the Almighiy, "if He had anything to do with it," has decided against the South. A conclusion which, in view of the qualitying condition which Mr. Magound is careful to mention, may be considered a politi-cally safe one. This is the main reason why Mr. Magound auntorist the prombiners an endown: all others rettrat Government has pared that and source the letters. He says he had arrangements with General Mella for seading Confederato cotton into Merico and selling it. The Herald's correspondent says it is proposed to build a railmost at the expense of the Govera-terst between Brazos and Brownstille.

This is the main reason why Mr. Magofin supports the prohibitors amendment; all others are incidental and subordinate. One of the ar-guments made use of in Kaniscety by those who oppose the amendment is that it gives to Con-kreas the right to let the nearo vole, brianne it ary Congress shall have power, to enform the prohibitory clause by app.opriate legislation. Mr. Magofin does not see it in this light, and

Mr. Maxefin does not see is in this light, and pronounces the argument "a more bugaboo to scare the people," If a says: "There is no such power asked for. It is still a right of the State to regulate the qualifications of its voters, and to regulate the conduct and condition of the negro by proper laws. If Con-gress can allow the negro to rote inder its pro-ruing, can they not just as well take away the order this section, it can do the other." Another reason why Mr. Magofin favore the amendment is, that when slarery is wholly done away the abolitionists will have nothing to hold them together, and will quartel among them.

away the abolitionisis will have nothing to hold them together, and will quartel among thom-selves abont what shall be done with the negro-and; as a political power in the land, will go to goneral meah. This is at least a practical view of the subject, but one that will hardly cowince a numerous clars of readers, that Mr. Magoliu has changed his principles with his politict. Chicago Republicas. The Mexican News.

Our special intelligence from Mexico presents the usual odd mixture of contradictory state ments and rumors from that extremely uncertain ountry. The most important report is that given by the Mainmoras Commerce, a journal in the interest of the invaders, to the effect that the Liberal General Negreto's army has been " annihusicd;" that Juares fied to Paso del Norte upon the approach of the French under Aymard,

and that the latter, now occupy Chihushus. If true, this news is very import at, as the event

it counserates would virtually pit and the be-pretracted struggle the Republicans have made in in the rotheratern province: against the power of the invaders. The paper in which this report is airen fore not contain any details, for appear to be in possession of any information more su-therite than runor. As an offset to this, a letter from Merico, As an offset to this, a letter from Merico, published in a New Orleans paper, gives a dubious picture of the political affairs of "the empire." According to this ambority "the rottenness of the empire is beyond da miption," there is "no security, order or system anywhere;" the popies in the country "seem, everywhere to be raising sgainst the French," and "the only parts really held ty the Imperialists are the envirors of the capital and the read to Vera Cruz." These statements are too general to is dicate with what degree of credit they are to be received. If the news from Chihashna is relia-ble. It may be askip concluded thas the environ

received. If the news from Chihuahua is relis-ble. It may be safely concluded that the environs of the canital and the road to Vera Crez are not the only places in Mexico where the Imperialists hold way. This sway, howerer, is obviously held through the power of the French army of occupation. Were the French troops to be with-drawn, the imperial dominion would speedily, disappear before the returning wave of respubli-canism. To this contingency all reliable infor-mation from Mixtico certainly points.--Chicago Republicon.

But we noticed one in Gillippic's window or Esturday that is abased of all, the subject being one of community is the subject being one of community is a subject being interest. It is Abraham Lincoln signing the Emancipation Frechamation. The figure is all-ing cross-legged, in an abounded carred armod chair, as his feel is a globe, and under the chair are numerous documents. One Mr. Lincah's left kneed rests the famous document, and in his right hand he holds his pen. The whole rests upon a square podestal, on the front surface of which is inscribed the words "April 14ch, 1655." The work was designed and executed by Mr. Mager, one door from the course of Fern and irwin streets.

by Mr. Bankard, will st once swaken in the mind of every housekeeper a very important question as to what cannes the great discrepancy in the piles of beef intended for the soldier and that used by the clines. The beef to be far-menths is to cent a fraction less than seven cents per pound, whils the same article, presumed at least to be of no better quality, is daily retailed at rates ranging from twenty to twenty-fire, and in some cases as high as thirty cents per found. As regards the price of loss, as well as that of many other prime necessaries of life, the community generally are wondering with as-toulation at the rates which prevail. They do not know exactly how to account for it, but submit, and hope for something better in time.
