tors. Wool.

The Ohio Fermer, of last Thursday, has the following in reference to the Wool trade:
Our correspondence from all warts of Ohio indicates a slight improvement in the offerings of wool—60 to too being the ruilup prices for the bester grades, and considerable is changing hands at their rates. For the lower qualities no special being paid; and the weight of the trade there. In their qualities and at these figures. In the Mahoning region the best figures offered yet is 600, but his has not statied the trade there. In Ashtabula this rate has induced many to let their wool slide. During his week the buyers in Licking priced by about librity thousand; pounds at year of the priced by a both thirty thousand; pounds are year of the sold being of madium grades. The indications are this thinger are fast picking up all the wools of Uhlo, except the very choices, at figures that will barely average probably a trife over 600. We still think that thereis no special necessity for this fair; in helling, all the second of the property in helling. All the strength of the string in the market. Wool. WEOLESALE OR RETAIL tons.
