Gold at 144%, and government bonds of all classes imm-one fourth to one half per cent above Saturday's quotations. Later in the day gold fell off to 184%. The loan market is growing easier, and the volume of dealings at eastern boards increasing.

Our iceal stock market is less brisk than on Saturday, when Elichie sold largely. The advance reached on this stock is, however, maintained, though there is less eagreness to buy today. The troports from the wells continue satisfactory, and were it not for the present low price of Grude Bitchie, atock would sell at double todays quotations. When change for the better will come it is needless to speculate. Columbia has been very quiet all day. We could learn of but one sale during the day—there may have been others outside the range of our travels—100 shares at 23. Holdess are less firm, and buyers are keeping off for \$15 per share, and from present indications they are likely to make it. Federal offer whitely Creek offered at \$36 no buye Hank shares rather more in demand. Sales of Fittsburgh a Stoubenville B. R. stock (small lots) at 655 per share. The advices from the Green county oil region The advices from the Green county oil region continue to be of a most favorable character. Septeal new strikes are reported, and the old wells are doing admirably, both in the quantity produced and the 'quality of the oil. The "Glyde" well, which is considered the best in that region has averaged fifty harrels, per day for some time past, including stopages and Sanday's. The "Horse Power" well, which belongs to the Monongabia, Pioneer Co. of this, city was yielding handsomely last Saturday, and the same remarks will spoly to the old "Wylie" well. In a word, the producing wells are all reported as yielding splandidly, and as the operators in that yielding are much encourage, speenfalton both in stocks and territory is beginning to revive. splendidity, and as the operators in that vicinity are much encouraged, speculation both in stock and territory is beginning to revive. In addition to the above we have reports of som In addition to me store of oil was tapped.

In the "Lone Star" on the Maple Farm a day or
two since. This, it is thought belongs to the Am
ber Petroleum, Company of Philadelphia. Also,
two strikes on the same farm, in wells Not and 3, two strikes or the same farm, in wells No! and i, both of which are being tested and belong to the Maple Ferm Oil Co.

The following letter explains itself, the only explanation necessary being to state that the well referred to belongs to the "Smith's Ferry & Little Persye Oil Company," and a considerable smout of the stock is held by parties in this city:

Carr. J. K. Barnova—Dran Sin: The men were putting down larger utbling in the old well (Patton & Feolog) passer day we hand yield down the follog); search we hand yield down they found the property comething, as immediately down they shought they would try it with a sand prunp four barrels and ten gallons, in a few minutes after they are provided by the front the arm quing four barrels and ten gallons, in a few minutes. They are providently if the front the arm quing four barrels and ten gallons, in a few minutes. They are providently if, but front the arm number after the party with a sand prunp, sing before. Long gat the seed bag to the right place, as they don't know how with a sand pump of the a they thing. Stock here went right the party is the sand pump of the way to mainly a ferry, and looks at pump and there was considerable excitement about it. I heard one man ask sile per share for his stock—I at a foreign imports at the port of New York.

Thus we have an immense reduction in the imports, as compared with the same portion of last Year. The customs receipts for the month of July were Ane customs receipts for the moment of any were \$9,773,770, against \$2,825 848 in the asme month last year, though for the seven months of the year the change is not insterial, and compare as \$46,452, against \$46,653,073 in corresponding time inc pange: so to intering and compares as well as 12,823,821 at 84,822,973 in corresponding time last year.

The exports for July exclasive of specie, show an immente falling off, being only sizpi2,975, against \$21,625,625 in July, 1881. For the seven months of the present year, the exports are \$101,182,605, against \$11,625,615 in the same month last year. In making a comparison between the exports for July, 1863, and the same month of 1884, it must be kept in mind that the figures represent currency faluer. In July, 1864, gold ranged at 225 \$6785, the average value of the greenblack dollar being \$761 in July, 1865, \$01d ranged at 140,6186, the system value of the currency dollar being 70c. On this basis, the specie value of the exports of domestic produce for last month, would be \$3,759,000, and of the like exports for July, 1864, \$10,285,000 intering the difference in the real-value of the produce supports for the two periods is much less than would spiear from the above figures.

So far expectation has been greatly disappointed.

Although prices of Manufactured Iron have been lower than those fourrent during the preceding eighteen months, there has not been any owner of the price of the pr ompetition, which will tend to moderate any advance in prices.

The general foreign demand (excepting from America and India, has been upto former years, and we may anticipate a continuaces on the same scale. Ship building has not been so lactive as in 1854, and, as respects iron steamers, not only has the demand for blockade runners cossed, but numbers are now on the market tor size.
