PINANCIAL AND COMMERCIAL BROKERS AND BANKERS BOARD FEIDAY, Aug. 25, 1865. Coli is quiet but firm, without, however, any change in the premium—of ening in New 147/2, advancing to 144, and closed at soon Tork at 143%, advancing to 144, and closed at soon at 143%. Governments have undergone no change worthy of spicals abolics.

In oil shares there was but comparatively little done that we could hear of. Columbia was very quiet—but little offering, and buyers still limit their figures at 250%, which as yet, will not bring out the stock. Bichie sold 260% which is a desline. No large smount of the stock, however, could be had at three figures. Cherry Run & Pithols is held firmly at 850%, with sales at the inside figure. Oil Oreck & Oherry Run was offered side figure. Oil Oreek & Cherry Bun was offered at 1/4, without finding buyers. Rumored sales of Cherry Bun Central at 55. Boss offered on the atrest at 37—certainly very cheap—withous finding a purchaser. There was a sale of Oil City & Pittsburgh on Wednesday at 2/2.

A Boston cotemparary says that a freight car artived thire Friday morning last, loaded with wool, which left Chicago on the previous Saturday, and discharged its load without having broken bulk offwern Ohleago and Boston, making the passage in four working days. Its route was over the Michigan Southern, Cleveland and Toleto, Cleveland and Erie (Buttalo and Erie (forming the Lake Shore and Michigan Southern Railroad Line) the New York Central, the Western, of Masachiusetts, and Boston and Worcester Railroads rah on Wednesday at 2%. sachusetts, and Boston and Worsester Railroads and is the pioneer of the "Red Line," establishe to run le-ween Boston and and Chicago, over the above roads, and which is expected to be in full operation by the first of September next. The ers have a "compromise" truck adopted to the rent mages of the several roads. —an another week the interest of the tea-forty bonds will be due and payable. The total amount of these bonds outstanding is \$172,770,000, and the amount of coin to be disbursed on that account \$4,318,222. There is no further government inter-\$4,319,225. There is no further government interest to be paid until November 1, when there will be paid for interest, on the first twenty bonds the sum of \$18,187,005. The whole amoust of the annual interest psyable in coin is \$64,621,837.50; and the amount payable is currency is \$74,740,530.73, making total interest amount to \$133,222,458.33.

—It is difficult to explain the apparent firmness of Seven-thirty notes. The present price is consainly bared upon no consideration of the relative value of the securities; for, in proportion to the rate of laterest, Seven thirties are at present the casers Government securities on the market. On leagest Government security s on the market. the second series, at the present price of 99%, the inte est is at the rate of \$1 upon \$13,63 of princispective accumities, reckoned at important and police of the stocks, and the interest on gold bearing bonds computed at the present price of gold: the two se utilies?

This discrepency in values can only be accounted for from speculative support to Seven thirdies; the public will dot be slow to paretive the difference; and an approximate equalization of prices, must be the result.—N. Y. Commercial.
