Cutting Affray.

A scricus cutting affray occurred in the Fifth ward about half past seven o'clock last evening. A man named Teddy McCartney, while returnand Locust structs by a returned soldier named David Buchanar, who acted in a very threatening manner, decising he would have satisfaction for some affects injury done him by McCarner, which is the proxy. The latter replied he wakted no quartel with him and dealerd to be its alone. Buchanan followed him up-hoont half a square, and drawing a panknife stabbed him in the right breast, inflicting a wound about an inch and a half deep, but not of a daugerous character. McCarner was taken into a drugstore and half deep, but not of a daugerous character. McCarner was taken into a drugstore such his liplutes attended to.

Buchanan was pursued by some cilizens to the Miagris Engine House, thence to Factory street, where a citizen took him into enstedy, and handed him over to officer Bell, who took him to the lock-up.

A hearing was held last night before the Mayor, at which McCarner, who was able to wakk art und, was present. Buchanan, it appears, had just strived in the stree o'clock train from Philadelphis. After a thorough investigation of the sfilst the presoner was committed in default of \$1,000 bail to answer at court.

delphis. After a thorough inv affair the prisoner was commit \$1,000 ball to answer at court.

The investigation in regard to the Boyd's Hill murder, seems to have come to a dead-lock. Wm. H. Bell, the witness who states that he was in Geiger's company, drinking with him on Thursday, has been held in custody until Gelger, who is said to be living, makes his appearance at the Mayor's office. . If the latter person makes his oppearance in the flesh, he deserves a severe lecture from the Mayor for not sooner disclosing the fact that he is not the murdered disclosing the lact that he is not the murdered reason by the first certainty have known that he was strongly suspected of being dead. Meanwhile, Mayor Lawry will prosecute his investigations with undiminished vigor, assisted by an active police force, and it is not improbable the mystery may yet find a solution.

But we had succeeded in raising, chiefly by my labor, sufficient produce, as I thought, to justify me in taking it down the river to sell. After much persussion I got the consent of my mother to go, and constructed a little hat boat large enough to take the barrel or two of things that we gathered, with myself and a little bundle, down to New Orleans. A steamer was coming down the river. We have, you know, no wharves along the wristern streams, and the custom was, if passengers were at any of the landings for them to go out in a beal, the steamer stopping and taking them on board. I was contemplating any new first boat, and wonderlog whether I could make itstronger or improve it in any particular, when two men earm down to the shore in carriages with trunks, and looking at the different boats algred out mine, and asked. "who owns this?" I sunwered, somewhat modestly, "I do.", Willi you, send one of them, take us and our trunks out to the steamer? "Certainly," said I. I was very glad to the steamer? "Certainly," said I. I was very glad to have the opportunity of carriing something. I supposed that each would give me two or three bits. The trunks were just on the trunks, and I sentled them out to the steamer was about it part on steam again, when I called out that they had forgotten to pay me. Each of them tooks from his pocket a silver half dollar, and threw it our therefore of my boat. I could scarce! The New York Commercial is of the opinion that the present high premium on gold and foreign exchange cannot leng be maintained. According to the Commercial, importers decline purchasing more than they are obliged, at these high rates, from an opinion that the quotations cannot be long maintained. They argue that the experts of cotton will soon compensate for the present discreparcy between the value of the imports and exports, and that, consequently, the settlement of foreign balances by specio will be of short-duration.

Operations on this important work have already been actually commenced. The same Company have had a survey made, and are to lay a pipe from Oil Oilty Rouseville, and thence up Cherry Run as far as the oil has been found. Upon its cumpletion, we may look for an increase in the price of oil nearly equal to the amount now paid for its transportation, as this new mode of transportation will cost nothing in comparison.
