OPINION OF A "CONSERVATIVE." Masens. Eprrons:-I find the following in

this morning's Commercial:

"Laponing for the same end, it is but ustural that the Pair should go to the relief of the Gazette. We have only to repeat that the Gazette. We have only to repeat that the Gazette concern would do a decent thing by resigning the Chest it holds at the hands of an administration it promounts as a failure." These wo formals saving so together, we have no disposition to disturb their embraces." The Commercial professes to be a Republican

ready almost to doubt its profession, for I think when it compares the old, and tried, and faithfol Cante with the Copperhead Post, it gives int Costicon doubts as to the loyalty of the designered. It is the cone of your milk and water concerns—it is true, faithful and honest. What it believes to be Just, 'that it advocates without fear, favor or paronage. The Gautte, like the New York Tribune, is one of the few papers that can afford to be honest—it begins if the truth in the love of it—it is governed by principle, and not expediency—it has no principles for sale. In short, it is nearer fight always than any other paper in the county. There is a disposition to try down the Gautte in certain quarters as there is the New York Tribune, but there is no more reliable paper, west, of the Allegheny Mountains than the Gautte.

The difference between the Gautte, and Commercial, as near as I can make it out, is this if The Gautte advocates the doctrine of keeping the release out of place and authority as long as possible-idening, them unworthy of trust or hosor, and by the rebailiot, demonstrating their disability to self government, and that considerthe to strong doubts as to the loyalty of the Dosor, and by the rebellion, demonstrating their is ability to self government, and that considering it to great questions before the people, national self to be people, national self to be people, that they have no right to had the retigns of government, or take seats in our national counts; in The Commercial, on the other hand, upported of pardoning red-handed rebels, and the generally on their side, and sagnise the land of the sent self of the North, to whom August Johnston is indepted for his place, and the commercial to be honest and just and estimated in the foregree of the self of right, though the heaven just and in its youth sad inexperience only to demonste a disjoint its appear in good perice and reliability.

Correspondence of the Pittsburgh Gazette. CATLETTSBURG, KY., Sept. 18th, 1865. I should have apprised your readers sooner of the glorious prospect we have of an almost un-limited oil field in Kentucky and North-west Vir

About ten days ago Captain Dickson, of this place, who has charge of the boring of a well to the Big Sandy coal; oil and mining company," struck a veln of superior oil, which the sand pump threw up, in what was considered, sufficient quantities to justify pumping. Accordingly Captain Dickson repaired to Cincinsati and procured the necessary tubing, pump. deci, and on Thursday last got his pump in operation. At first it pumped one barrel per hour, and before night it had increased to nearly two barrels per hour, and it is estimated by competent judges, that when the water is "cleared" it will reach one hundred barrels per day and anyly not less than fifty, which settles the question reyond a peradventure, that we have an jabundance of oil on the Sandy and its tributaries.
