The sistement; although cornect in regard to the fact that it was suffected that death had been canad by polson, was nevertheless incorrect in many minor details, as wellearn through Mr. and Mrs. McCance, the brother-in-law and eister of the deceased. We give the substance of their statement below:

Junes McCandless came here some two-monits ago, and was employed as a salesman in his brother's store. Leonard had been sick for about a week, and died on Sanday morning, the 17th instant. A day or two before he died, James wrote a leiter to Mrs. McCance, in forming her that Leonard was very ill. and he soon after followed this with another letter, stating that he was sinking rapidly. She started up to see him, but he was dead when the got there. The body was brought down to this city on Sinday verning, and the intension was to keep it mail Tuesday, at an o'clock, in order to give lime for the clder brother. William John, to arrive here from Philadelphia.

The undertaker, Mr. Meyer, thought it would be necessary to place the body in the receiving vanit, but the body was not removed, as alleged. James visited the cenualery and ordered the digging of the grave, but he did not exhibit any more arrives been from Philadelphia.

The undertaker, Mr. Meyer, thought it would be a grave both the family. The undertaker, in speaking of the body in the receiving vanit, but the fact. We are indisposed to lay ourselves open to the charge of "builling oil stocks," yet we shall not heritate to state our conviction that the near future will show that the value of Columbia and other companies having producing wells has been underrated greatly during the present decline. We do not mean that it, or they will invariably pay handsome monthly during the present decline. We do not mean that it, or they will invariably pay handsome monthly dividends from this time forth, and be steady in price at the stock market, for that can not be said of any abares deals in this market or elsewhere, but that, all things considered, they will compare well with any that can be named. We have been expecting too much of oil companies. Satisfied with from e to 8 per cent in governments, and bank thares, we have its xirably demanded alwo per cent monthly (2s per cent jearly) of oil companies, or they were centigmed at once, and in no fattering stems to the "tomb of the capulets," or regions still more remote. "There's another oilgompany burst up"—"another half imitition of stock gone to pot?" The street was full of such remarks a few months and when Columbia passed her usual monthly cividend. "The end has come," they said, when in fact the yield of oil compared favorably at the very time with any previous period in her history, and fooday we learn that the daily yield exceeds five hundred barrels, while oil has risen to a price at which "supply and demand" may keep it for mostits to come. Our remarks apply with equal force to all well orgatized companies, having producer. This is the second "strike" on the "Buchanan Farm," in which that company has a very handsome interest. Its production cannot yet be given as the well at last accounts had not been tubed, but it is thought that it will be a good producer. This is the second "strike" nade by this cumpany on t ed by Dr. McCook, and given in charge of Dr. Wuth for snalysis.

The jury empannelled by Coroner Clawson in this case meta; the Mayor's office last evening, when the following testimony was elletted:

Dr. Mr.R. Terror testified that he was called dipon to see the young man Grinder, who was living sick at his brother's house, found him delirious, supposed from the character of the delirious that he had taken is rarious. Mrs. Grinder said that he had taken is rarious. Mrs. Grinder said that he had taken is othing but his supper. The physicism did not gaspect that he shad been proteomed, but he was uvere in a condition to communicate with the doctor, except by sigts. Attended him four days until his ceast; did not forbid his attendants to give him water. The symptoms were those of arsenic. Dr. Bersett and Dr. Rankin chanalted with the witeres. Amusements,

Priverence of Drike, 19 selil labyting a run at the Pitesburgh Theater, and is certainly put upon the stage in a style superior to anything we have yet reen at the Thester. The miral of this play is good, and to a thinking person it conveys, a valuable lesson. The brutality to which man can be reduced by drink, is depicted in carful colors. Unlike many of the painties plays that are put upon the staga, we can see it bightly, and not pall the senses, and with pvery representations learn a new lesson. Of the characters we cannot say too much, Miss Keene's world-wide reputation renders speaking of her superfluous. We can conscientionaly recommend citizens, play-gers and otherwise to go and see this piece.
