Rebellion in the Human Interior.
Rebellions are not confined to hodies politic.
They break out in our own interiors as well as in
he bowers of the land." The natural law of our
odies is health, but we misute them, and they
revolt. We subject them to exposure, we overtack
them, we overload the stomach, we neglect the
sowell, we plunge out of rooms hotter than the
topics into an atmosphere below freezing point,
and in various otherways trific with our health.
But these frames of ours are wonderful machines,
and we can by the use of the FROPER MEANS,
so INVIGORATE and REGULATE them as to
render them almost price against the orders to
which, in our reckleanness, we subject them.
Nothing that has ever been known or heard of as
a tonic adds so much fo the resistant power of the
human system under circumstances unfavorable to Rebellion in the Human Interior.

SECOND DAY-ARTEREOON. CLEVELAND, Sept. 28, 1865.—Convention met at the usual hour a Chief Justice Chase presiding. ttendance very large, as usual. The following resolution, which was offered during the forenoon session, came up for discus-

falon:

Resolved. That this Convention appoint a Committee consisting of fifty with power to add to their number, to be called the American Evangelical Commission, which shall be charged with the work of swakening the attention of the Christian public to the urgent need of Evangelizing the multiludes of this generation not yet reached by direct Christian labor, using for this Evanuesce the press, public meetines, local organization and the committee the press, public meetines, local organizations.

y izing the trailitudes of this generation not yet reached by direct Christian labor, using for this pripose the press, public meetings, local organization and was participated in, at greater or less length, by hearly every delegate.

The discussion lasted nearly the whole afternoon, and was participated in, at greater or less length, by hearly every delegate.

Air. Wood, of Chicago, sail we had machinery enough for the work in hand, all we wanted was men and money.

Mr. John A. Foote, of this city, presented a brief threach of the industrial School, in Clevo-land, and its workings, as an illustration of what organizate effort would do towards elevating the lower masses.

Mr. Lyle, of Utics, thought the proposed organization was one upon which any church civil and. He would rather not call them of Christs was but one. Christ prayed that His children might be one, as He and His Fasher were one. The power of Poperay was in tisually, in Dr. Davidson, of Pennsylvania, would have no new churchy but an organization that should help existing churches.

Mr. Neat was effect the Convention had not

help existing churches.

Mr. Nant was gird the Convention had not lear sight of the Interests of the emigrants. He lost sight of the interests of the emigrants. He commenced to labor among them trenty-flve gars ago, now the "little one" had become twenty five thousand. The Methodists had done well, but with this organization ten times as much could be done. We were nearer each other when we had found that the German Methodists could work side by side with the Lutheran or German Reformed.

cdista could work side by side with the Lutheran or German Reformed.

A delegate—the Rev. Doctor Mingins, of Philadelphia, we believe—tota a story of a Scotch infidel, who for twenty five years had not entered a church; tecause he had never been able to do so without hearing too much sectarianism preached. He had come to believe that such a thing as usion of relirious decominations was impossible. Well, upon landing at New York, he saw a flag flying, with the words, "Union Tabernacle" painted upon its folds, He entered, and was surprised to hear the Truth from speakers of different seets, and without any hinting towards sectarianism. He became converted, and for ext years, had been a Christian Missionary; and he stood before them now to plead for

onyergion.

Mr. Wolcott, of Cleveland, was in favor of the Mr. Wolcott, of Cleveland, was in favor of the Commission, because it would early a the work of evangelizing the man effective the land bosndone. The plan afford be given a fair trial? The work might be done by the churches of Cleveland and elsewhere, but it was not done. Mr. D. G. Starr said the churches might do the work if they would, but they wouldn't. He referred to the great work done by the Christian Commission in the army. If the proposed Commission but did its work as faithfully, God would surely bless it.

mission but did its work as minimuly, dod would surely bless it.

Mr. Filchinger was anxious to vote for something that would carry out the objects of the Convention belong, leaving the city. He had wanted to vote for the resolution ever since he had heard it read, it spited him exactly, and he was satisfied that it was what was needed. he was satisfied that it was what was needed. It was only necessary to make a judiclous selection of members.

Mr. Kirk said that all that was wanted was a common plan. He was wilfing to put the work into the hands of a body of competent men.

Dr. McLaren thought the defigates would better understand each other if they were assured that the proposed Commission was not be an independent institution. If it was to be such be should compost it.

BY TELEGRAPH NEW BRIGHTON Ps. Sent 29 1865

This has been a gais-day with the citizens of our usually quiet rillage. The Odd Fellows have just completed a new hall, which was to be fraternity came in from Pittsburgh, Wellsville New Castle and other places. They marched

regalia, and made a fine appearance-two brasbands discoursing "eloquent music."

The day has been exceedingly pleasant, and they close with three gay parties, and all goe merry as a marriage bell. As I write—"I hear the chorus swelling, grand beyond a mortal's the chorns swelling, grand beyond a mortal's telling."
For several consecutive evening electures have been given in School Hell on phremology, meamerism, and kindred subjects, by Professor F. S. Grimes. Interspersed with a great deal of drollery and fun were some important truths and neettal hints; but on the whole, as a lecturer, he seems to sciack more of the way then the philosopher, for which reason I opine, he draws larger audiences and consequently puts more dimeniate his pocket. House of Representatives Clerkship.

remeas a consequently puts more dimes into his pocket.

"The Bank of Beaver County" having been converted into a National institution, has just leaved its own one and two dollar bills.

The Provost Marshal's office, which has been hitherto under the control of our lamented townsman, Captain Cuthbertson, is to be removed to Pitteburgh.

Autumn is just beginning to that with delicate peacilings the grand old forests, and from my lofty window I have a picture-stage view that could be sketched only by the hand of Omniposence. In the distance are the pited-up hills, draped in modest green and connected by the veryfasting rocks, while low at their base rolls on the lifted river, reflecting in its clear juriobasom a panoramic sketch of the golden sundaine toying with the fleecy clouds; the pale moon playing "hide and seek" with the wild woods, and then departing with a good-night kiss.

"Let others love the city,
The gaudy show at sunny noon,
Give moths lonely valley.
The dewy eve and rising moon."

St. Louis, Sept. 28,—The party of railroa presidents, meraloned in my yesterday's dis-patch, started west to-day to visit Kansaa City, eavenworth, Topeka, Lawrence and Fort Riprospects for extended improvements over the prairies of the Far West. The party will go conds of the Atchison & Pike's Peak Railroad 000 locally subscribed, and a Government subsidy of \$16,000 per mile, payable on each completed twenty miles, makes the enterprise a com-

ted twenty miles, makes the enterprise a complete success.

A movement is now on foot at Connell Bluffs, which, it is believed, will result in the completion of the railroad from that point to the Missoni State line, within a year, when it will be met by the road which is now in course of construction from St. Joseph northward. There is also a decided briskness in railroad matters throughout the west.

The St. Joseph Union says very few hogs will be for rale in the northwest the coming season. There are but few in the country, and holders are asking fabulous prices, knowing that the demand will far exceed the number in hand. The Union says seven and eight cents have bon refused for stock hogs.

Last January Provost Marshal Baker seized the money and notes in the hands of T. T. Gaut. John Howe, and the State Saving Association, amounting to over \$90,000, belonging to Mrs. Ewell, wife of the rebel General Ewell. The funds were libelled by the United States District Attorney on the ground that Mrs. Ewell had equipped a robel regiment at Memphis. By some turn of the wheel President Lineo a was induced to give her the benefit of the amnesty proclamation, which was set up as a partion in defense of the proceedings before Judge Treat of the District Cattorney and Event and Washington, the Attorney General has just issued a preemptory order directing the District Attorney to dismiss the suit and restore the proparty to the cautody of the legal representatives of the said Mrs. Ewell.

Messrs. Seward and Stanton by Mr. Weed and Gen. Meigs to his Clarksville speech is reviewed by Hon. Montgomery Biair.

In the course of this letter, he mentions the following circumstance: "Let me observe here it was the fall of Fort Sumter that produced on the instant the ordinance of secession, and filled Virginia full of troops from the Guif States to carry it before the people. Its effect upon ordinary men Accounts from the Southern counties show the magistrates in the various districts to have been particularly active within the last few days, in their efforts to put a stop to drilling, and effect the arrest of foreign emissaries. In the county of Waterford, the circulation of treasonable balleds is out the increase, and the fact of systematic night drilling can hardly be doubted. An investigation was held yesterday by Lord Carew and the magistrates of Watford, with respect to military drillers near Enniscorthia.

The number of men engaged in each of these midulght escapades is an doubt small, but the occurrence of similar bractices in so many counties, would seem certainly to show some secret movement and a common purpose.
