100 Columnia. §31 25 Gold at 11 a. m. 144. Eastern advices represent the gold market as firm, with unmistakeable tendency towards higher rates. Morning quotations 144, and steady through-out the day at that figure. Should the Treasurer not interfore with large sales through government bankers, we cannot see why the premium should not touch 160 before the ist of November. It is evident that the holders of November coupons share the same opinion as thus far but a small portion, leas than V_0 of smout due, has been presented for payment, though hold-ers are urged to send them on. United States Bonds have declined slightly; 81^4 are quoted at 103% in New York. Five Twentfes at 103 V_2 , ex.November Coupon. It will be ob-served that the morning quotation at our board for these bonds is 107 V_4 . We suggest to the board that to correspond with eastern quotations, sales that to correspond with eastern quotations, sales be made here, ex-coupon. Seven Thirly notes, 2d issue, sold in our market to-day at 9914. 14214 bid for gold and November coupons. The general stock and share list was firm but
