CITY AND SUBURBAN.

Allegheny County Fair. Baturday was another beautiful day, and visiters to the Fair took advantage of it. The attraction in the morning was the trials of speed etween the different animals entered, the most amusting. of which were the donker races. The Judge's were very busy making declaions in regard to the quality of the different wares and goods on exhibition. During the afternoon—it being Saturday—there was a great falling off in the crowd, but this morning, should the day prove fair, we expect that the grounds will be more crowded than ev. r. Many things will be one exhibition that have not been entered before. The track will be in better order, and in fact improvement will be observed in avery department. We understand that the prizes will not be awarded until the last day.

Our courstry prixtness.

As the fair it to be continued for three days amusing of which were the donkey races. The

A feature of the fair which we had not before observed was a suck of fors, from the weil-known bonse of Thompson & Greekinger, of Alleghops. They have on exhibition a most beautini selection of capes, virtorines, collars, mails and other articles made of far. They are handsomely displayed on dummys, and must command a high figure. They are in the south wing of the building, where the carpets are exhibited.

· . - 4

mesaco tare produte much more el er than

master that produce much more clientian when praced.

The adjuntable beautiful fine or coarse, which is important especially for grading gapes to prevent breaking the seeds. It has an adjustable through it the happer to regulate the feed to suit the pawer applied. The press has two cribs arranged so that you can grind in one while pressing the other. The combination of the clinders and gearing is such as to make it higher extending mill to use. It in be easily intract by a boy twelve years old.

The intil is in all respects nearly and substantially made; and we can confidently assert that it has recruit an extending million of the clinders and seed Speec has been applied to the first brill. AND GRASS SHED SOARE. This celebrated Drill and Seed Speec has been as the combined with the section of the region of the combined and search of the combined and search of the combined with the section of the combined and search of the combined with the section of the combined and search of the combined with the section of the search of

for if broken it will not grow, which is important, lost.

It has no brushes, as some have, which are liable to ret out or wear I regularly, and cause a variation in the feeding. It sows the grast seed broadcast be hind the house.

It has high wheels and long hoes; has long wide steel roints, which are polished and will keep bright and clean in any kind of soil. The hoes are act either single or double rank, as they may be created. It has a self adjusting shut-off silde, which is so arranced that by raising the hors the grain is ablut off at the same time. The Drill is well balanced, and bears lightly on the horses' recks. Plaster and Guino sowers are attached when desired, at an extra cost of only \$20. The Buckeye is provided with a Land Measure or Surveyor, which measures and registers the number of acres as the seeding progresses. The Buckeye Drill is neatly and substantially made by experienced workmon and of the very best material; is neatly painted, atplyed and variabled. Beckham & Long, Agents.

IMPROVAD BUCKEY CORN PLOW.

It is no longer a question whether a riding con the sea present and measure and and con the sea the sea provided whether a riding con the sea the sea provided and warmined.

OTH COUNTRY PRINTS.

As the fair is to be continued for three days longer, you have still an opportunity to enter anything that you may have and carry off a prize. We are led to this romark from having heard a farmer, while looking at the swine, say that the could beat anything that was on exhibition, that he had a long only six months old, that would weigh three hundred pounds. We asked why he fill mote large it made with the feet of the state of the could beat anything that was on exhibition, that he had a long only six months old, that would weigh three hundred pounds. We asked why he fill of not bring it in and exhibition. The movement is made with the feet of the could beat why he fill on to bring it in and exhibition. The movement is made with the feet of the could beat why he fill on to bring it in and exhibition. The movement is made with the feet of the could beat who he fill onto bring it in and exhibition.

We asked why he fill on to bring it in and exhibition.

We asked why he fill on to bring it in and exhibition when the operator is ciding, and the leave on the walking.

The operator can be plowed as well as straight to can at will move at once all four of the show at the operator with the action of the count beat may be in the operator with the state out of the low of the count beat may be a subject to the operator and the count of the propose of the magnetic and the operator and the count of the can at will move at once at four or the shows are the operator and the operator and the count of the can at will move at once at four or the operator and the operator and the count of the can at will move at once at four or the operator and the count of the can at will move at once at four or the operator and the count of the can at will move at once at four or the operator and the count of the can at will move at once at four or the shows are the count of the can at will move at once at four or the operator and the count of the can at will move at once at four or the shows are the can at will move at on

The shovels can be instantly raised out of the ground for the purpose of two mag at the cards and clearing the plows of trash, and in assistant to find, by means at the crack.

The plote is provided with shields us praced the corn from herny covered while small and tender. There allelis can be taken off when the corn becomes larger. Beckham at long are the agents for this pluth.

M SHERRIT'S INTROVED GRAIN DIGIT.

The manner of the pluth of the pluth of the pluth of the course of the pluth.

M SHERRIT'S INTROVED GRAIN DIGIT.

The first page of the pluth of t

bands and other articles many to iter. Anny fire handsomely displayed on dummys, and must command a high figure. They are in the south wing of the building, where the carpets are exhibited.

PITT THE BLIND.

We noticed a young blind girl in the same building who has on exhibition a large number of glass orrampets which are very handsome. Baskets, latips, parasols, castors, and many other raticles may be tound in her stock. While visiting the Fair, look at her articles.

AMCSENENTS.

The places of amusement appear to be do ag a thriving business. They announce to you that this is positively the last chance to see their wonderful collections, as their engagements pashify preclude the possibility of a further stay, and if you do not see them, it will be a source of the ground with them!

CONTINENTAL SA O IN.

We mentioned in Thursday's paper a fast of extertion which occurred at a saloung da the grounds, and remarked that such a collect law, outded drive away all the custom the eating saloons have.

It is notice would are away all the custom the eating saloons have.

It is notice would not sillude to the Criticental saloon kept by Messer's daith & Mutlen, of Allegheny City. The saloon of these genture, is the largest on the ground, and is man, it being impossible from the formulation of the castor of the sungity Messer's daith & Mutlen, of Allegheny City. The saloon of these genture, is the largest on the ground, and is man, it being impossible from the formulation of the castor of the castor of the castor of the sungity Messer's daith & Mutlen, of Allegheny City. best Makera, Bockbinders, Turuers, and in all branches of business where a strong and steady head is required.

The special attention of Clergymen, Lawyers, Ariths, and students is called to these stoves, as they are universelved for office use. They are entirely free from danger. Simple in construction, being casily managed as an ordinary Kerusene Lamp. They will not get out of order. In a word, these stoves will meet every wish and want of the most fastidations, and with be found will suited to every purpose for which they are recommended.

It may be interedible that the extraordinary claims of merit for these stoves can be sustaintiated; all are most certifaily invited to call at the company's office and examine for themselves; the ladies are especially invited to call and test their merits; all who are opposed to reasting themselves; the their serve of the dimensional and desire to consign the server of the strong powers, fenders, fire places, e.e., they can be all all who desire to enough the server of the strong powers, fenders, fire places, e.e., they can be all all who desire to enough the prediction of the age, call; all who desire to see cooking, in all its branches, restrict to exceeding the prediction of the age, call; all who desire to see cooking, in all its branches, restricted to a mere posttime—to see the kitchen blended with or Beonverted into a purior, call at the office, Bissell's Block, No. 13 Mt. Clair street, (my sairs.) J. B. Williams, business agent, of the Pittsburgh Valor Stove and disa Light Company.

Quite a number of laces came oil at the Fair Grounds on Saturday aftermoon, and attracted considerable interest. The course, however, was rather heavy, sithough by next week it will, it expected, be in excellent condition. The first lace of importance was for second class frotting horses, mile heats, best two is three. Major Monroe entered a bay gelding, and doe B. lifter, "Jtm." The race was won by the gelding—time £50, 2.36, 3:10.

The second race was a pacing match, under saddle, mile heats. For this three were famile heats. For this three were like entities, and resulted in the success of the big. "Gurpe Erans," curred by Jose B. lifter.

Then f. libowed a trotting match, to harness, mile heats, best two in three. Por this three two entries—"Boxes" and "General promptly, and therefore and "General film Street, has treely of Morne Dimorest's Mirror of Fashloes and Godey's Lidys' Box of November. These are besutful Numbers, and we for the fight of the sweet of the leddles.

The Ornes (hores, --Marie Zoe, the accomplished dentruse and partominist, is engaged for a short season, and will appear this erening in the "Freech Soy," in which her impersonations are said to be untrivished. Some are easil to be unrivailed.

Theatrix.—Mr. Edwin Adams, one of the dreet jouing tregedians on the stage, has been engaged for six nights, by Manager Henderson will appear the evening in the great character of Hamlet." He will be well supported, and the patrons of the legitimate drams will have something worthy of their attention during the percent week.

Passinger Bailway Accident.-Co Sain-

dry creating a nan named Charles Jones, in attempting to get on a street car, in Allegheur, awarg in front of the dash coard, and feil to the ground with one arm across the track. The wieris passed over his arm, crushing it to such frictions as to require amparation. The man resides in Marchester. This Fine Department -- We learn that a valuable and necessary accession to the Fice Department with the likely made in a short time; We refer to a Hook and Ladder organization. The wast of it is apparent, and as it will be located in a central position no doubt our citizons will contribute liberally to the new enterprize. Some twenty-dre members are afreigy enrolled.

Then terms a mule race, which afforded a vast amount or sumernent to the speciators. During the coming week, the trial of the special of horses will be the attractive feature of the Fair, and as some fast horses have been, extered, some exciting sport may be expected.

For got to Tell all about it.
