He locked upon a public library as one of the most efficacious means for the diffusion of krowiedge, and for the cultivation of the mental and moral faculties. Belleving that such an institution would tend to promote the public good, he gave it his most hearty commendation. He studied to the character of the books composing the library, and was prepared to say that anthrug would be found there calculated to disgrace the mind or debase the morals, but rather to civate and ennoble the intellect. The speakear gave an interesting sketch of the principal public libraries of the world, noting the number of volumes contained in cach, and the great benefits which has been conferred upon the haman race through their establishment and praservation. As compared with some of the libraries of the Old World, those of the New were indeed insignificant, but then it should be remembered the the former were the accommissions of celluries, while the letter were of re-

We cannot close this notice, without making Awarabie mention of the excellent music discoursed by the "Great Western Band."

The officers and members of the Association have reason to congratulate themselves upon the auspicious opening of thoir Library and Reading Room; which from this date ranks among the public firstitutions of our city. "The Library is furnished, with over two chousand volumes of the choicest books in the language, all entirely new, and arranged in the most tasteful such beautiful manner. The books have been excretely selected, the room is oleganily furnished, and it, will be the object as the Association to render the institution every way worthy of public confidence and support.

James Bown, 136 wood Street, Successor to

Bown & Telley. Dealer in Hardware,
Cottlery, Cluns. Skatto dec., and Manusricetzrus of Oil Tools, Miles de.:

The store, and manufacturing establishment of Mr. Bown is located at 135 Wood street, near Virgin alley. The Business was commenced in 1843 by Messrs. Bown & Tetley, and was so continued until February 1863, when the entire concern passed into the hands of Mr. Bown by the retirement of Mr. Tetley. Prior to the war, the special business of the concern was the manufactore of rifles and sporting material, their or-ders from the South, and more particularly from K n ucky, Tengesses and Missouri, being very k n next, renecosed and an accommenced, and in consequence, this trade had in a great presure dropped cif. Mr. Bown com-nerced the manufacture of tools for

good, with main signes, for from four to six numbered yards, but that he could make any kind to order.

The first and section doors of this building are excepted as machine and general jubinar shops. It is here that they turn out their oil tools, having the facilities for turning them out very rapidly. On the first flow are six Gryss, driven by a fan blast, and durling the west it in others were kent constantly at work. The measures slop contains twelve lathes, one player and three drills, Devides a number of run of grit datenes and emory wheris. Ore men is kept constantly employed in putting in kirtle blades; an their does nothing but after, to the grinding of shears, pelssors, razor.

The power that drives the machinery is derived from a double (upright) engine, dwe and a half inches in dameter, and eight on inches stroke, supplied by a boiler, saxteen feet in length; by thirty-six implies in diameter. The number of hands employed at present is thirty-dive, but he has the capacity to give employment to seventy-live, and would be very glad to get good compactent mechanies, to whom he would give steady employment. The amount of work turned out of the shop last year, instependent of the business done in store was \$80,000 worth.

In conclusion we would askyour friends to call and examine Mr. Bown's stock, wheney, re
