Late interesting intelligence is received at New York, pending the struggle in Mexico, be-tween the Liberals and the Imperialists. Genaral Aguirre, the military commander of I'resident Juarez, in the State of Coahuila, has Just arrived in New York. The General regards the ecent story set affoat by the Imperialists of an averwhelming defeat of the Republicans before Matamoras, as a large exaggeration, and supposes it to have amounted to merely a repulse of Cortina's band, as Escobedo and other Repubhean commanders in that section of the country, with their troops, were at a considerable distance from Matamoras on the 35th ult., when the engagement is said to have taken place, and were quietly awaiting the arrival of General Carjaval from this country, with the expected means for carrying on the war vigorously. General Agnirre, as well as the correspond-ents of the New York papers state that nearly the entire Mexican population are ready to rise against the imperial yoke if they can only pro-cure arms, and almost in an agony of anxiety they are looking to the great republic of the North for such aid as shall free them from the waders. We have the announcement of further victories of the republicans and accounts of operations by them in different parts of the cone try which wonderfully increase the troubles of Maximilian. They have taken the town of Hustasce, routing the Austrian garrison; they have overran large portions of the States of Mexico, Morcila and Queretaro; the State of Vera (.: 7 .a undergoing a revolution, and the armed forces of the republic are dally increas-leg 'n rumbers. The estimates of the expenses Arrow on the second state of Maximilian's government for the coming year are given at lifty seven million dollars, of which eighteen millions are for the army. Their Condition Improving A Lynchburg correspondent of the New Yerk $Tr\mathcal{B}(\omega \kappa (s_{1}s_{2}))$. The freedmen of Varginia constitute about half the population of the State of Virginia since the division of the State, and in some countries they outcomber the whiles in proportion of two or three to one. In those sco-tions the negroes on large plantations, and having enjoyed little instruction heretofore, were, (acc p and plain, suitable for all purposes.
