Sable Iron Works-The Largest Solid Cly Wheel Casling in the World-A Perfect gest solid fly wheel in the world. It was cast for the Sable Iron Works of Zug & Co. A few guests were present by invitation, among whom we so ticed Professor Oscanyan, the celebrated Turknumber of our ir floential citizens, besides a

The casting was done under the direction of Colonel Joseph Kaye, the veteran superintendent of the Fort Pitt Foundry, the metal having error, who has been connected with the Foundry for a number of years, as the selector of metals for gues and other castings, and, having gradumed under Mr. Marshall, who was for for Is -six 3 cars connected with the Fort Pittals to day probably one of the best judges of fron in this or any other city. Two transces were charged with the metal, one containing twelve tons, and the other thirty-five and a half. The firing of the larger turagence a can. The ming of the larger furnace was compensed at seven o'clock in the
morning, and that of the lesser at hall past
eight. At half past, one, both furnacea were
ready to let down. On account of the lummens
size of the easting, it was necessary that the
mould should be made in the rolling mill of
Zog & Co., for whom it is intended, as it would
have been impossible to have mound if form ready to let down. On account of the immense is a sanit and battery upon Ellen Barker, a notle incoming the model should be made in the rolling mill of Zog & Co., for whom it is intended, as it would have been impossible to have moved it from the Soughty. A foundation of solid brick work was built, and this mould reade upon it, under the superintendence of Mr. James Soot. A hole was made through the wall of the Fort Put, and the conducta were inid from the firmaces to the mould, a distance of one hundred and sixty-three feet in the slape of a "X." so that a though the motion mass left two furnaces, it appears to the first that the prosecutor of rat three was was to the back, while being held by another party, before the stone was thrown. The question in the case therefore was not of versely. though the moften mass left two fureaces, it emptied itself into the mould from one trough. At the outer extremity of each arm of the mould were vents, from which the gas evolved in beanting type, the bighest coldma being about eight feet, and presenting a magniticent spectacle. No accident of any kind occurred, and the mirnost harmony and concert of action prevailed. Each man had his appointed the configuration was provened. red, and the utmost harmony and concert of reation prevailed. Each man had his appointed place, and thus confusion was provented.

The size or this wheel is as follows: Diameter, 25 feet, diameter of thub, 43 inches; length of hub, 30 inches; diameter of orce of hub, 24 inches; dialed thickness of hub, 7 inches; misshed thickness of hub, 7 inches; waverage; clipical section, 10 feet 6 inches by 7 feet, 6 inches; diameter of rim. 18 inches; greatest size of arms, 11 laches by 8 inches; number of arms, 10; length of arms, 914 feet; duarge for the furnace, 47/2 tone; fluished weight of the wheel 432 tone.

of arms, 10; e. 47/2 ions; fluished weight of the wheel 42 loca.

When it was known that the furnaces were down they were tapped and the metal compared in the most beautiful style, and silhough the greatest anxiety must have both for fit for the success of the wheel by the providences of Forr Fitt, and the by the providences of Forr Fitt, and the lighter of the providence of Forr Fitt, and the lighter of the providence of Forr Fitt, and the lighter of the providence of Forr Fitt, and the lighter of the providence of the head of the working and soperintendent, that they would not allow a probability of failure to enter their minds. It is a success, and when that sentence was prontuned after the easilog, again the college of relief was felt all round. We emil feeling of relief was felt all round. tence was proncusced after the eastlog, a general feeling of relief was felt all raund. We can now feel rid the fact that Messra, Zuz & Uo, have the largest solid Fig Wheel in the world, and that the Fort Put Foundry east it.

Mr. Barton Hill gave us, last night, the most anysing performance of "Lord Dundroary" we have ever seen since the great original of that character—Mr. Sothern—was here. The crowded and can was thrown into good humor with the occurricities of the noble lord, and Mr. Hill may congratulate himself on his success, since his reputation as the beat "Dundreary" now in the country, met an endorsement last evening. We are grounded next week the 'companion picture, Sothern's new comedy of "Brother Sam," (written by Oxnaford; of the London Must, which has lately been purchased by Mr. Hill. By the way, this will probably be the last season of Magnes Branch in America, as the for magnetic for the next season by Gye, for London, and also for the grand opera in Paris.

Signor Errani, who took the part of "Mannico" at short notice, Signor Macaferri being suddenly taken ill, acquitted himself admirably. The "Miserri" was a masterpleace of slugging.

Signor Meneusl, as the Conte di Luna, was also eminently successful, and was frequently deservedly applanded.

The plot of the opera is as follows:

Fanst, a Grman student, after a life of meditarion and laborious recearch, becomes diagnated with the notilingoess of human knowledge, and his own ability to unravel the mystic arcman of pature. He summoned to his aid the Spirit of Evil, who spepsas to him under the form of Mephistopheles. Through the supernatural power of the latter, Fanst is straighway reatored to youth, with all its passions and illusions, and is at the asme time endowed with personal tentry and invulves garb. Mephistopheles, as in a vision, reveals to him the beauteons village maid, Margaret, with whom the student fails instantaveously in love. He longs to become sequalated with her, and his wish is soon alicer gratified. Margaret, coully noted for her lovellness and to her virtue, has been left by her soldier brother, Valentine, under the care of Dame Martha, a worthy, but not very viguliant personage. From Yesterday's Evening Gazette Applications for Olscharges from Jall. In the Court of Quarter Sessions, yesterday, polication was made by Mr. Swartzwelder for he discharge of Abraham Kimberly, con by Alderman Strain for disorderly conduct, "on view," (the circumstances of which we have reported) upon the ground of want of jurisdic-tion. Judge Stowe expressed his conviction hat the charge of disorderly conduct had been innt the charge of disorderly conduct, had been improperly used to a considerable extent, but he was not propared to decide as to the matter of jurisdiction. In the present case, under the circumstances, he would not feel disposed to interfere, believing the party deserved to be committed. A magistrate should be allowed to properly interfer.

interfere, believing the party deserved to be committed. A magistrate should be allowed to protect himself.

Application was also made for the discharge of Robert Preston, committed by Alderman W. O. Johns, of the Seventh Warl, 'or fornication, upon the ground that the committed was defective in not seeting forth the name of the party upon whose oath Preston was committed. It appeared, however, that after the application had been usade, and the commitment seat for, Alderman Johns remedied the defect in the Sheriff's office. This Judge Stowe considered unwarranted interference, and felt induced to percomptority discharge the party committed.

A majority of the Court decided, in the latter case, that the commitment as it appeared before them, was correct, and that the interference apoken of was not a subject for their considerations. In the case of Kimberty the court also declined to interfere. If any wrong had been committed by the Alderman, Kimberty had a remedy against him.

As to the question of disorderly conduct, Judge Stowe stated that in a case before him recently he had not made a decision, as had been stated, but had simply discharged the party. He had supgetted averast times, the Stringing of the question before the court recentarity, by write full better and a decision obtained. We trust this may be done at an early day, in order that our magistrate may exactly know thair legal powers.

The Forest City, from Parkersburg, is the only
grival we have to record from below. The Bayard, fr m the same point what due last night, sad
will doubtless be found in port this morning. The
Nora, from Cincinusti may be expected in to-bay.

The C. D. Fry had assum up yesterduly afternoor, and it was thought that she, would get off
for New Orleans last evening. There were no
other departures aside from the regular packets.

The Nevada, Camelia, and Marlesta were
loading at Chichmant for Pittaburgh on Monday. ay.
The popular and neet Bayard, Capt. George D

Moore, is the regular packet for Parkersburg to-day, leaving promptly at 11 a. m. The clerk, Capt. D. Moore, will see that passengers and shippers receive overy reasonable attention. The America, Capt. Thos. H. Golding, is next in turn for St. Louis sitter the Kate Putman. The Louisville Press, of Monday, has the following:
We noted the departure of the coal feet of tuy
boats, with over one hundred barges in tow, for
Cincinnatia and this port. Owing to the low stage
of the river, the title being wholly inadequate for
the safety of the feet, quite a man the bars. As
have been sunked to the post of the tow the safety of the feet, quite a man the bars. As
have been sunked to the town the bars has been
about one-tentral of the unmake, or smount stated,
including three barges of the Hercules, two of the
Tigress, and one or two of the Lioness, all belonging to D. & J. Macdonald. Two barges in
two of the biophin, belonging to A. J. Baker, two
barges belonging to W. H. Brows, in tow of the
Shark, and two belonging to W. Jimam & Co. in
tow of the Little Whate. One of the boats was
lead by collision with the Steubenville bridge.
None of the coal field due, has arrived growth. Louis for
the low stage div water which has greatly retarded their movements. The Huntsville arrived from St. Louis rowshardar.
The transfer of Tuesisy, and the Lorena was
annoused to follow on Wednesday. We noted the departure of the coal feet of tug:

oth. That one of the perquisites of the trade is "cebbaging," and "taking a nip" is nothing more.

6th. That on the principle that a tailor is but the ninth part of a man, if any offense was committed, it is but the ninth part of an offense, and as offenses are not divisable in law none was committed.

In support of the various propositions was cited Audubon on the Domestic Goore, Carlyle's Sarter Resartus.

For Curium.—A stitch in time saves nine, hence we will dispose of this case in the twicking of a needle's eye, by hemming up the defendant from further mischief. Tailor is derived from talkure, Norman Franch, "to ent." This is the primary signification; therefore "to sew" is secondary, and not to be received as the legitimate business of a tailor—ergo, the defendant was not in the legitimate pursuit of his business, consequently we will have to beste him by imposing a fine of thirty dollars and costs, which we hope will button him up.

WEDNESDAY, Nov. 8 .- Before Judges Stowe Aloise Kumpf, of the Ninth Ward, indicted for selling liquir without license, was fined fifty dollars and costs. Mr. Kumpf has retired from the whisky business, in which he was long engaged. He was fined at the June term, but con-tinued to sell for some time after, and up to the time of the sale of his fixtures. In the case of W. A. Vanhorn, inducted for an assault and battery upon Ellen Barker, a notice

the defendent, and also struck him on the back, while being held by another party, before the stone was thrown. The quention in the case therefore was one of verecity, and the jury could not reconcile the testimoay. Either the prosecutor and bis witcesses or a sister of the defendant, committed perjary. The jury found a vericit of not guilty, the prosecutor and defendant whom three indicators and instruments had been found, for larreny as ballee and larceny, on the oath of Charles B. Barr. A.
