OIL INTELLIGENCE. LATEST NEWS We have received intelligence of a strike hav-

lig been made on the A. Buchanan Farm, Oil Creek, within the past few days in which the Oil Basin Company of Philadelphia and some other companies, are interested. The well is located on a high bluff near Rouseville, and the oil was tapped at a depth of nearly eight, hun-

off was tapped at a depth of nearly eight, nun-dred feet. The exact production of the well has not as yet been ascertained, but it is thought hat it will be a good one. "CASING" WELLS—A GOOD MOVEMENT.— The "Buchanan Farm" and "Oil Basin" Petroleum Companies have concluded to have all the wells on the Buchanan Farm cased, which, it a claffined, will greatly increase the production is claimed, will greatly increase the production in the aggregate. The wells on the widow Mc-Clintock Farm have already been cased, and the csult is highly satisfactory, and a movement is low on foot to have the wells on the John Mc

Clintock Farm cased. A Titusville corresponclintock Farm cased. A Titusville correspondent of the Eric Dispatch gives the following interesting particulars of "casing:"

"For the last two years many experiments has been made on what is termed dry holes. The latest and most important one is that of casing. Thus far it has proved successful. No. 122, Holmden farm, owned and managed by Smith & Barnum, experienced operators in the oil regions, is the first well tubed in this manner on Pithole. Tale, well was cased, or in other words lined with three inch tubing, the first part of last week, and tubed on Saturday last, and commenced pumping immediately after. It is now producing 40 barrels per day. Before being cased it was thoroughly tubed and tested, and was pronounced a failure by many able judges.

"The mode of operation is as follows: The rock underneath the third sand on Pithole, and second sand on Oil creek, is free from water courses. A well made seed-bag is fastened to the lower end of a three inch tubing and lowered below all water courses. The well is then tubed in the oil way.—with the exception of no seed-bag—and jumping commenced imaediately. Should the production one equal the expectators of the operator, he can easily raise or lower the pamp by inches, and in this manner place it where the production is the largest. The Collins well, Blood farm, Oil Creek, when tubed in this manner, produced two bundred barrels per day. Waentubed in say other way it will not pump over ten." ent of the Eric Dispatch gives the following

STRIKE ON STEWART'S RUN.
The Pittsburgh and Stewart's Run Oil Company of this city have received intelligence of a strike having been made on their property, on Stewart's Run. "BIG STRIRE" ON THE ALLEGHENT RIVER. The Meadville Republican gives the following The Meadville Republizer gives the following particulars in reference to the big strike on the Allegheny River some days since:

On Friday, the 17th of November, about 3 o'clock r. m., this well, which is owned principal to the first two feet deeper, when it immediately began to flow, throwing out a tremendous stream of gas and oil. Eye witnesses say that the oil filled a four inch pipe, and was thrown with great force. At O.F. m., the gas took fire and a terrible configuration ensued, destroying five tanks which coptained six hundred barrels of oil. Two men at the well were severely burned. The fire was finally cutinguished after destroying about eight thousand dollars worth of property. The well is on the Miller Farm, eight miles below the first was finally cutinguished after destroying about eight thousand dollars worth of property. The well is on the Miller Farm, eight miles below the first was finally cutinguished after destroying about eight thousand dollars worth of property. The well is on the Miller Farm, eight miles below the first was finally cutinguished after destroying about eight thousand dollars worth of property in the vicinity, and a large advance in the valuation of property there. It is now believed that by boring to the proper depth and reaching the third sand rock, as big wells will be obtained on the Allegheny river as on Pithole or O.I.

WASHINGTON, Nov. 26. The National Soldiers' and Sailors' Union, League, are preparing a memorial to Con-gress, asking the repeal of the law passed last session, which deprives disabled soldiers' who accept employment under the Government, of the pensions to waich they would otherwise be entitled. The crippled clerks argue that they occupy only the poorer places, and if they perform their duties well, they know of no reason why they should lose the meagre penion for lifelong disability. A member of the Senate finance committee

THE POSTMASTER GENERAL'S REPORT Changes in the Money Order System Proposed. ORDERS TO ANOUNT OF \$100 ALLOWED.

President's Message in Type. EXPORTS AND MANUFACTURES DURING THE WAR.

Special Dispatch to the Pittsburgh Gazette.

WASHINGTON, November 25, 1865.
The proof sheets of the report of the Postmas-General are now undergoing revision, and day of the Session Among other interesting matters, the report vill recommend several important changes in the posta, money order system.

Mr. Dennison proposes to make the compenation of postmasters of money order offices iniform, in proportion to the amount of business one, by substituting fees for clerk bire in the done, by substituting fees for clerk hire in the larger offices, to exact no fees on duplicates issued in place of orders lost or destroyed, and to extend the limit of amounts which may be sent by a single order to one hundred dodars, expecting by these changes to make the Money Order Bureau, a source of revenue to the Government as well as a convenience to the convenience to the Government as well as a convenience to the Government as well as a convenience to the Government as well as the convenience to the Government as the convenience to the Government as the convenience to the Government as the convenience to the nent as well as a convenience to the people. The English money order system, by the re-port of its chief, quoted by Mr. Dennison, has simost superceded all other channels for the ransaction of exchange by mail, in consequence of its superior convenience and safety. The President's message is all in type and

the proof was sent to him to-day for revision and correction. The receipts from internal revenue to-day was seven hundred and fifty thousand dollars. It has been discovered by the well known statistician of the Treasury Department, Dr. Win. Elder, that while more than a million of men were in the field, withdrawn from labor during the fiscal years 1862, '68 and '64, we exporte to foreign countries two and three quarter times more wheat, and eight times more him and ba-con than in 1853 '59 and '60. It is remarkable also that our leading manufactures in the period of the reveillion had not increased over the product of the previous years.

Railroad Case in the Supreme Court. FREEDMEN IN RICHMOND AND MARYLAND.

New York, Nov. 25 .- The Post's Washington special says: Part of the President's message was read to the Cabinet yesterday. Mr. McPherson, clerk of the House has sent the new roll to the printer. The names of the members for the rebellions States appear on it. In the Supreme Court Chambers, before Judge Clarke this morning, the case of Houry Stevenson, agent of the Milwaukee and Prairie du Chien Railroad Company was heard. There was a motion in behalf of the company to dissolve an injunction obtained at the special term restraining them from issuing their common stock. The injunction was obtained on the ground that this would be a violation of the rights of the owners of the preferred stockholders of the mortgages on the Milwaukee and Missussippi Railroad, or the mosion the counsel for the railroad, areed that the common stock being higher in price than the preferred stock, the directors were entitled to sell that as it would be preferable to all parties, and that the court had never obtained proper jurisdiction over that action, and on these and other grounds, asked that the injunction be vacated. The Heard's Washington special says medical officers of the Freedman's Bureau in the city of Richmond report the increase of disease among the colored population of that city now estimated at 25,000. It is becoming more apparent that the major portion of the above number have their residence in the city, while the residue are gathered in large rebel camps that everywhere environ the town. The orphan asylum for blacks, iostituted by the Bureau, has recently been taken in charge hydre Society of Friends there, with about three hundred immates now being cared for.

A frouthment landed proprictor in Maryland, lately pardoned, was yesterday at the Freedman's Bureau, and recently property will be turned over with the requirement, that have been added to the land, through their agency. This requirement, it is understood, will be exacted from all owners who make application under similar circumstances. ion special says: Part of the President's message was read to the Cabinet yesterday. Mr.

ollars. The condition of the statement hough he was opposed to the substitution of a tax on sales for the present income tax.

Notwithstanding these semi-official declarations as to what the fisance committee intend to do there is good reason to believe that congress will make important modifications of the revenue laws in more than ene respect and especially in the income sections.

The Commissioner of Customs has received it formation from the Revenue detectives on the inorthern frontier, of the discovery of an lagenious scheme for smuggling spirits from Canada to the United States, it consists of a mock daby, manufactured out of tin, which is filled with whisky and swaddled so as to resemble infantile humanity, and carried in a woman's arms.

This is decidedly the sharpest as well as the the substitute of South Southern Florids.

The Government detective force, so far from being dishanded, as was intended, has now an important and legitimate work laid out for it in the chief cities of the Union and along the borders, to detect and apprehend connerfediters of greenbacks, smugglers and defrauders of the internal Revenue. of gracibacks, amugglers and defranders of the liternal Revenue.

Blank pages in the detective journals are doubless deviced to un-official information in regard to Fenian movements about which the authorities are merely amious to satisfy their coriceity.

About the middle of last month Governor Miller, of Minnesots, made application to Secretary Harian for an immediate survey and sales of public lands in St. Louis and Like counties in that State. In response to the Sarveyor General of Minnesots, they reported by letter to the general land office that the country mentioned abounds in mineral deposits of undoubted richness, among which is grain.
