On Sunday evening a large fire broke out Walbridge Farm on Sugar Creek, about on mile from Cooperatown of cooperatown, at about 7 o'clock, in s well which had just been atruck on Saturday the 25th inst. The well had been flowing about 150 barrels per day of heavy oil. When it took fire, the tank was full of oil of twenty-nine

A few days since a well was struck on the property of the Lancaster, Philiadelphia and Cherry Run Oil Company Lin this town, which produces at least 175 barrels per day. This well is located, half a mile below the mouth of Pithole Creek, on the river back, adjacent to, and formerly a part of the land of the Anderson Company. The Van Dake well, half a mile up the creek, is producing 40 barrels. The McCune well, half a mile up the creek, is producing 40 barrels. The Couch and Overfield wells, one mile up the creek, are each doing about the same. The three last mentioned wells are situated on the lands of the Pitholo Oil Company, Col. The Public Transportation Company.

The Pennsylvania Tubing Transportation Company have their ploe nearly laid, and will commence the transportation of oil within the next ten days. They have a mammoth iron tank created at Oleopolla, which is a wonder in its way. The capacity of the tank is 15,000 barrels, being 80 feet in diameter and 16 feet high. The same company also have three iron receiving tanks at Pithole City, of the capacity of 800 barrels. The whole of their pipe has been subjected to immense pressure and made as tight as the gas mains used in cities.

The "Test well," on Chartiers creek, which gave rise to the sensational story referred to in our last, we are informed presents a show of oil in paying quantities. To be sure it is not flowing at the ten to fifteen barrels a day, but competent and experienced mea who have visited it consider it a good strike, and accordingly the company are making arrangements for tubing with a view of ascertaining what it will yield,—Wanhington Reporter.
