It would be folly to attempt any higher eulogy upon life wold-renowned Sewing Machine of Wheeler & Wilson, fold in this city at the next the statement of the fact that wherever the Wheel-ret & Wilson Seying Machine heap arthitist & Wilson Sewing Machine has been exhibit for competitios, either on this or the other side of the Atlantic, it has, without a single exception, taken the highest premium So true is this that taken the highest premium So true is this that whitever Alis compliment has been extended to any other machines, it may be taken as proof part fitty that the Wheeler & Wilson instrument was not axhibited at all. This, in itself, is such a the ing fact that to multiply words about it to people of intelligence would be useless. Novertheless with this favorite machines that the people ought to know, a few of which we call the attention of our readers to today. In the following order: ist. The yearly sales of the Wheeler & Wilson other sawing machines combined. Al. The immense manifecture of the Wheeler as and a portion of the attention of the time to buy. Every varied for the roll-ting mill or the oradic, and for all saker, will be found on band. By the way, it would be well to can be subscribed at all. The subscription our readers to today. In the following order: ist. The yearly sales of the Wheeler & Wilson other sawing machines combined.

Sewing Machines are larger than those of a 1 the other sawing machines combined. 2d. The immense manufacture of the Wheeler & Wilson Sewing Machine Company, at Britigeport, Connecticut, is one of the woolders of the world. It occupies newards of four acres of ground, em-ploys more than a thousand of the best workmen is the United Stakes, and with the most improved machinery the Company find it impossible to sup-ply the great demad for their machines in this country and Europe. Id. The Wheeler & Wilson Machine is an Instru-ment of infinite versitility in its operationa. It will braid, cord, blid, tuck, gather, fell and hem more besulfully then any other machine in use, without hasting, or any preparation of the work. 4th. Bindings may be put on the edges of any Justing drament, hat or cap, without any other ad-justing than that porformed by the machine itself.

justing than that performed by the machine itself while in the act of sewing them on. 5th. The Lock-Stitch maile by the Wheeler and Wilson Sewing Machine is more durable and more Wilson Sewing Machine is more durable and more brautiful than that made by any other, and has these advantages, that it presents the same appear ance on both sides of the fabrie, and will not ravel. It is also more consentich, requiring one-third less cotton than other kird of stitch

otton than other kind of stitch. Again : this beautiful stitch, being the same on both sides, it is not necessary to use the extreme-y fine sewing ontion required by those methics which make a stitck with a ridge on the under side that can only be concealed by a thread too delicate und fine to hear orthonory. ly dne sewing cotton requir which make a silick with a ridge on the underside that can only be concended by a thread too delicate and fine to bear ordinary wear. 6th. The bobbia which holds the under thread in the Wheeler & Wilson Machine is so constructed that when empty no care and very little time is re-quired to fill it. The bobbins on the shuffler ma-ehine, on the contrary, require considerable care in order to wind the cotton on them senely, and if the windins is done by an inexperienced hat d, the result is, the thread will not unwind freely, and will break. The threak it, the wheeler A Wilson Mis-chine serders its movements so easy that a child can work it, the weight of the feet slone being sufficient to move it. It will work with all kinds of sowing slik, cotton, or linen thread, and will abw all kinds of material, from the thin its gauge to the hearist cloth. It is used by thousands of
