" Irving.	4.50 "	11.35 "	

☞ No. 5 and 6 run on Sunday.

Gold 114¾.

We learn that the side hill above the Boyd Farm has been leased to Mr. Burtis, of Titusville, who intends sinking two wells at once. Also, that the side hill of the McCray farm, a lease of which is said to be in the hands of Pittsburgh parties, will soon become the scene of active operations once more. It is reported that the parties already have the necessary machinery on the way here. Several wells were started on this territory during the excitement of 1864-65, but were never completed.

The primary election of the Republican party is passing off quietly to-day, not much interest being manifested in either candidate. The vote will probably be light. It was expected this morning that the voting would take place at the room formerly occupied by Justice Donaghy, but for some reason it was changed to the School House on the hill.

A juvenile specimen of the XVth amendment was arrested and put in the lock-up last night, charged with stealing $7.00 in scrip from the butcher shop of G. W. King.

Our citizens were startled this noon by a loud explosion, which appeared to come from the Wood farm. On investigating the matter it was found that the explosion was caused by the blowing up of a number of empty nitro-glycerine cans belonging to the Roberts Torpedo Co. The cans had been accumulating for some time and they were blown up for the purpose of getting rid of them.

At the fire meeting last evening about 20 new members joined the fire company. A movement was started for the purpose of raising funds to procure hooks and ladders for use at fires. A committee was appointed to enter into correspondence with outside parties with a view disposing of the old fire engine. The citizens are taking hold of this matter in earnest and their is no doubt but that an efficient fire organization will be started.

We are sorry to learn of the intended departure from our place of Mr. Edward Fox, who has purchased a house in Titusville, and intends taking up his residence in that city before long. Mr. F., is one of the oldest pioneers on Oil Creek, and during his long stay has won golden opinions from all with whom he has become acquainted, both socially and otherwise. He will carry with him to his new home the best wishes of all.

BIG WELL AT RENO.

We are informed that a big well was struck at Reno, last night. To-day it is said to be pumping at the rate of 6 barrels per hour, or about 150 barrels per day.

The Lake Erie Dental Association will hold its seventh annual session in the city of Titusville commencing June 7th, 10 A. M. The following are the special subjects for discussion:

1st. Treatment of Imperfect Dentition and Irregularities of the Teeth—Dr. McAlpine, Essayist.

2nd. Dental Ethics—Dr. E. M. Pierce, Essayist.

3d. Operative Dentistry—Dr. N. L. Willard, Essayist.

4th. Mechanical Dentistry—Dr. J. G. Templeton, Essayist.

5th. Dental Medicine—Dr. G. Elliott, Essayist.

The officers invite all respectable practitioners to attend.

The watering season at Niagara Falls has commenced. The Clifton House, on the Canada side, opened on Saturday last. The Monteagle House, at Suspension Bridge will open in a few days. The Cataract, International, Spencer, Niagara and other hotels at the Falls are open, and business is said to be better than for several years past.

It will be remembered that a day or two since we published on account of the adventures of Mr. John Hart, a member of Kelly & Leon's minstrel troupe, and giving a history of the part taken by him in the oil excitement, &c. The Pittsburgh Commercial discredits the story and says.

This will be news indeed to Mr. Hart's friends in this city, where he was born, and where he first made his reputation as a delineator of negro eccentricities. His oil land and splendid mansions were probably located in No Man's Land.

It is reported that there is to be a change of time table on the O. C. & A. R. R., on and after Monday next. As yet we have not seen the new schedule, but will lay it before our readers as soon as possible after the change is made.

P. S.—Since the above was put in type we have received a copy of the new time table. It will be found at the head of the first column.

An inspection of kerosene oil in New York City has failed to disclose a quart of pure quality, in more than thirty places visited. The carelessness of those using the fluid is frequently put forward as an excuse for the nonenforcement of the penalty.—But this inspection goes to show there is death in the oil, and it is quite time the authorities put a stop to this murderous method of illumination.

The Little Corporal Magazine, for June, is received. In July this sterling juvenile is to be enlarged and improved. Those subscribing now receive one number free if they ask for it when they subscribe. Only one dollar a year. Published by Sewell & Miller, Chicago, Ill.

Rev. J. K. Black, of Pittsburgh, will preach in the Presbyterian Church at this place, to-morrow.

List of United States Patents.

Issued to citizens of Western Pennsylvania, for the week ending May 24, 1870, and each bearing that date:

No. 103,401—Furnace for boiling and puddling iron: James Westergman, Sharon.

No. 103,417—Device for adjusting cross heads of locomottives; James D. Oakley and Richard English, Oil City.

No. 102,447—Adjustable connection of sucker rod to walking beams; Adam Good, Jr., Titusville.

APPOINTMENT OF JURY COMMISSIONER.—Hon. John Trunkey, President Judge of this Judicial District, has appointed D. M'Elphatrick, Esq., of Sandycreek township, Jury Commissioner, to fill the unexpired term of John P M'Kinley, Esq., removed to Mercer county. Mr. M'Elphatrick will make a faithful and competent officer.—[Spectator.

At Roland's Mill, near Enterprise in the oil regions, a loose chap named John Luce partially loosed the ties that bound him to his wife by meanly deserting her, and she completely loosed herself from John Luce and from life by jumping into the mill pond, where her dead body was found.

Two rival ice companies in California are to contend for the championship. A bet of $20 a side having been made, they are to test the question of superiority by each placing a block of ice of a certain weight in a room, the block that keeps longest from melting to be regarded as the best.

Dr. Thayer's circus was showing at Jamestown, Pa., Monday afternoon, when the storm struck the tent, breaking the tent-poles and nearly ruining the canvas. The evening performance was given in a hall.

SPORT IN CALIFORNIA.—BETTING ON THE MELTING OF ICE.—The story of Jim Smiley's frog illustrates a mania for betting in California that makes the most trifling incidents occasions for displaying itself.—On the 6th inst., there was an ice match at Marysville, to test the relative virtues of two specimens of ice, one for Little Grass Valley, the other from the Summit. Both blocks, weighing each 131 pounds, were placed in the sun, with even chances the mercury making 90 degrees in the shade. "The Summit chunk," says the report, "was broad and rather flat, while the Little Grass Valley specimen was longer and sat on one end." Toward noon, as the match became hot, and streams of water trickled down the faces of the antagonists, "there was great excitement among the friends of the respective chunks," and bets ranged from $2.50 to $100. The Summit chunk began to have the best of it; Grass Valley showed deep furrows, and "came up groggy," while Summit took the matter coolly, and seemed confident of victory. About the middle of the afternoon the friends of Grass Valley threw up the sponge, and went to betting on how long Summit would last. It grew dark before the cake was melted; the match against time had to be continued by the light of lanterns. Summit beat Grass Valley four hours and fifty-five minutes; about $1,500 changing hands on the result.

HARD TO BURN.—The aged Professor Silliman took the homely looking specimen of New Jersey coal, and said he would make a test and determine its quality.—The next day the owners of the grand discovery waited on him again, eager to make or mar their fortunes. The professor said, with that impressive solemnity which marked his manner:

"Gentlemen, I understand you to say that this property is situated upon a hill top—consequently the situation is prominent. It is valuable—immensely valuable—though as a coal mine I am obliged to observe that it is a failure. Fence it in, gentlemen—fence it in, and hold to it through good and evil fortune till the Last Day; for I am convinced that it will be the best point from which to view the sublime spectacle of the final conflagration. I feel satisfied that if any part of the earth shall remain uninjured after that awful fire, it will be this coal mine of yours!"—[Mark Twain.

The McConnellsville (Ohio) Herald has the following: "We are informed that some four years ago an oil well was bored to the depth of ninety feet, on the Joy farm, on Federal creek. As there was not any indications of oil it was abandoned and remained so until this spring, when they concluded to test it. A pump was put in and started, when to their surprise about five barrels was obtained after the first day; and it continued to yield about that quantity per day for some weeks. It now averages about three barrels per day." But the remarkable feature is that it produces a very light oil, about forty-nine specific gravity—the lightest oil obtained in any of the wells in this region. The oil men regard this as a sure indication that oil could be got in deep wells in that locality, and we understand that it is the intention to put down some deep wells the present season. We are advised that a number of wells in that vicinity are now being pumped with good results."

They do things on the run out west.—When the two trains were smashed by a collision on the Missouri Pacific Railroad, the other day, one of the first to crawl out from the wreck was a man, holding in his hand a telegraphic dispatch to a lawyer in St. Louis, telling him to bring suit against the road for ten thousand dollars damages.

A young man who had been narrating some of his own wonderful exploits to a crowd of loungers one day, was thus rebuked by an old codger among the listeners: "Young man, ain't you ashamed to talk so when there are older and abler liars than yourself on the ground?"

The public will be pained to learn that the distinguished chief "Man-afraid-of-his-horses," is sick, and will be unable to accompany Mr. Red Cloud and his party to Washington.

A Virginia lady playfully told her husband, as she started on a visit to her sister that perhaps she should't return, and kept her word by eloping with her sister's husband.

See advertisement of "Auction sale of a Refinery."

Western life insurance agents are accused of bribing grocers to paste their advertisements on their customer's kerosene cans.

A Pennsylvania paper said that a man in in town had been drunk thirty-five years and over a score of citizens have claimed that it meant them. But neither of them was the right one.

Infringement Notice.

The subscriber has learned that a certain firm in Titusville, known as "Bryan, Dillingham & Co.," have commenced the manufacture of Sucker Rods with Socket Joints. This is a Direct Infringement on his Rights, as his claim is "connecting two sections of rod by means of wedges, wedging sockets, and double coupling bolt." He does not specify any particular shaped wedge, nor of what material it shall be made. All rods made as above described outside of his manufactory, are direct infringements. This, therefore is to

CAUTION OIL OPERATORS,

and all others, against buying or using any rods so made, except those of his manufacture, as by so doing they will lay themselves liable, and will be dealt with according to law.
