New WELL.-Dame Fortune has again smiled on our friend Adams at the rate of 150 barrels per day. Well No. 3, McCray & Adams lease, J. S. McCray farm, was completed Saturday night, but was not inbed until yesterday. Testing commenced last night and to-day the well is yielding fully 150 barrels per day. It is 570 feet deep, and has 42 feet of third sand rock .-Also, has a powerful gas light. We are pleased to again record his good fortune and bore it may continue, as he is worthy of it.

An exchange draws the following picture, which will be appreciated by all editors: "It is strange how sensitive some men are. They will get drunk, rave about "It is strange how sensitive some the streets, yelling like savages, go bome and beat their wives, turn their children out of doors, being so proud of achievement as to make the neighbors conscious of the fact; pay a fine before a magistrate, and having made themselves as notorious as possible, will slide around to the editor and beg him, with tears in their eyes, not to bring disgrace to their families by mentioning that little affair in the paper."

"R. R. Whiteside has a well on his ranch which is now yielding from 80 to 100 gailons of oil per day. He tunnelted into the sians, with sixty pieces of artillary. mountain about thirry feet, where he struck the main vein. The oil bubbles up like on the city. boiling soap, emiting large quantities of gas, which is something so offensive as to make it difficult for the men to work. The well is about 300 yard's from Chase's mill on the Soquel Augmentation, and about a half a mile from where Burrell bored a well about five years ago. This oil vein extends from Correlitos to Pescadero, and only needs capital to develop it, and receive rich returns as a reward for the labor. But we can not expect to do much in the way of developing the vast resources of wealth, which abound in our mountain range, until we bring ourselves into rapid means of communication with San Francisco."

This discovery has a local interest from the fact that our fellow citizen, Thos. A. Shaw, of oil enterprise, owns the working interest in a large tract near the new well. The oil is very heavy and valuable. The place is 66 miles from San Francisco and of easy access.-Jamestown Journal.

The name of John J. Carter has become as familiar as household words almost throughout the entire oil region from the fact that he has as large an assortment of clothing as is to be found in the region, and sells it at prices that will compare favorably with those in New York or Boston .--Having been acquainted with Mr. Carter for a long period we take pleasure in recommending him to those of our citizens visiting Titusville, as being a fair and honorable dealer. Read his advertisement and give him a call.

Commissioner Parker baving just return ed from an extensive tour in the Indian country, reports that there is every probability of a total cessation of Indian hostilities in all the country north of Arizona and the Rio Grande, on account of the excellent quality of this year's supplies. Arizona he thinks, in view of the fact that a fierce war is now raging there between the United States troops and the Apaches, among whom there will in consequence be no distribution of supplies, will be the scene of the most desperate struggle that has ever characterized that section of the country during the coming winter .-They now refuse all offers of peace, and the war has grown to be one of extermination.

The history of the Pennsylvania Volunteers, it is stated, is completed in manuscript as far as the 180th regiment. The remaining thirty-five regiments were in service during one year or during a part of the year only, so that their records can be made up more easily than those of the regiments which served during the war .-The history is in press as far ag the 149th
