No. 5—Direct from Pittsburgh without change.

No. 6—Direct to Pittsburgh without change.

Monday, Nov. 28, 1870.

Gold at 1 p. m., 110 3/4

The city of Paris has at last capitulated to the Germans, the whole army within the walls becoming prisoners of war. This long expected event was brought about by famine. As long as they had food, the Parisians held out bravely; but when provisions became scarce and poor, they yielded. Their heroism has been considerable; but other cities besieged and starved have shown more of it. They give in without having felt the extremest pangs of hunger, and above all, without any great fighting. The bombardment which the Germans had been carrying on for the last three weeks has contributed nothing toward bringing about the surrender.

This remarkable siege has lasted more than four months. Other places have held out longer, but there is no other instance in history of so large a town invested for such a length of time. Nor is there any case on record in which so powerful an army as that which has now laid down its arms has been surrounded and forced to capitulate.

The terms of the surrender are not fully known as yet, but are undoubtedly very humiliating to the French.

Last evening some of our brokers received dispatches from Pittsburgh and Titusville parties, desiring to sell "puts," that is they offered to give \$500 for the privilege of putting 5,000 barrels their option during the next six months at \$4.00. Twelve thousand barrels was taken as soon as in the brokers hands. The "bears" then inquired how much more could be got rid of here, to which the brokers replied that parties stood ready to take 75,000 barrels. That was too much of a big thing to buck against, simply for the purpose of bearing the market, and so evidently the "bears" thought, as nothing more was heard from them about "puts."

"The champion nine"—feminine.

"Specs" of war—Army contracts.

A little episode, says the Lewistown True Democrat, occurred in the Lutheran Church, of this place, on Sunday night last which is worth mentioning. As the evening services were about to close, the pastor took occasion to admonish his congregation against attending the exhibitions being given in the town hall by a female minstrel troupe, and in his remarks denounced the show as a low, vulgar or indecent concern. It so happened that half a dozen members of the troupe were present, and no sooner had Mr. Brown concluded than up jumps one of the showmen who, after apologizing for the interruption, stated that it was his bounden duty then, and there to deny in toto the imputations made against the troupe by the pastor. The company, he said, was a proper one, and the performance not only decent, but entirely moral in all its appointments. "Moreover," said the showman, "I am a member of a church myself, and I know of no wrong I do in belonging to this show." Of course, such a digression from the usual order of things created an immense sensation, and various outbursts of sentiment were made all over the church. One member told the minister not to get excited, while others commanded the showman to sit down. The whole affair however, was over in a few minutes for the showman after "saying his say," quietly resumed his seat. But the town had something to talk about next day, and the effect of such conspicuous advertising was, the town hall at Monday night's exhibition was all to overflowing.

NEW WELL—Well No. 90, Columbia farm, was completed and commenced testing on Friday last, and the well is now yielding eight to ten barrels per day. This well is located on the hill, a short distance above this place, and is the third one finished on that end of the farm, all of which are good wells. The Columbia farm territory ranks second to none in the oil region, and by being under the management of practical men bids fair to hold out for years to come.

The Titusville morning papers are a day behind in publishing the news of the surrender of Paris. All the other morning newspapers received at this office had the war news in their issues of yesterday which the Titusville papers publish this morning, yet we do not believe they were bought by the "bears" to withhold the news for fear of too great a rise in the market. They would not be guilty of such a thing!

FOUND—Yesterday afternoon, in Wild Cat Hollow, a Silver Watch. The owner can have the same by calling at the P. & A. Telegraph office, proving property, and paying charges.

The "rains descended and the floods came," last night, and the snow is rapidly disappearing in consequence.

What more pitiable spectacle can be witnessed than the antics of a drunken man. One of these sights was witnessed yesterday on the street, to the disgust of all, the individual in question being so intoxicated that he could not stand up but fell over and wallowed in the mire and slush, and would have lain there had it not been for some good Samaritan helping him up. It was a fearful commentary on the use of intoxicating liquors.

The Pittsburgh papers report the arrest of two men named Chambers and Rogers, in the possession of whom were found a lot of burglar's tools. Unless we are greatly mistaken these are the same individuals who paid this place a visit a short time since, but failed to accomplish anything being too closely watched for that.

Capt. Travis' Shooting Gallery was crowded last night, and some fine shooting was witnessed. The Gallery is open every evening.

E. A. Phillips, Esq., Treasurer of the Oil Creek and Allegheny Railroad, is suggested as a suitable candidate for the Mayoralty of Corry.

No better man could be selected for the purpose.

NOTICE!
 The gentleman (11) who stole the collar from my dog yesterday, is earnestly requested to come and get the dog also.

In an opinion delivered by Judge McCandless, at Erie, last week, he laid it down as the law, that "let's a coded by the humblest person in the land, cannot be opened by any official through whose hand it passes, but must be held sacred, and not even the Postmaster General himself has a right to break the seal."

Mr. Arr, of Iowa, took home a can of the non-explosive kind the other day. Uncorking the spout led to the usual result.

Western fashions—divorce suits.

A painstaking man—the doctor.

REMOVING DEPOSITS IN BOILERS—Every day adds to the number of methods recommended as efficient for removing deposits in steam boilers. One of the latest of these has been invented by Mr. Weiss, of Basle, and is called by him Litho-rescive, and is claimed to possess the property of dissolving deposits and preventing the formation of new ones, converting into soap the grease coming from the condenser, and finally neutralizing all the acids. The formula for the preparation is as follows: Five parts of molasses or beet syrup; fifteen parts of milk of lime; three parts water, and eighty-four parts of soda lye of thirty-four degrees Bume. The compound is said to precipitate at once all the bicarbonates, the sulphates and the silica, to convert the grease into soap, and neutralize all the acids, removing all old deposits of whatever kind and however thick; and at the same time not attacking either iron or copper. It acts not only at an elevated temperature, but precipitates and neutralizes, in cold water, all these foreign bodies. For this reason the water may be made to undergo a preliminary purification before passing into the boiler. Our space will not allow us to give the details of the chemical theory by which the different substances referred to play their parts in preventing or removing the deposits in question, although fully set forth in the original communication of Mr. Weiss. We may state, however, that two pounds of the preparation are said to be sufficient for 1,800 quarts of water.

It is generally believed in New York, that the control of the Union Pacific Railroad will pass into the hands of Pennsylvania Central managers next March. If there is any more railroad lying around loose in this terrestrial sphere, it may as well "come down" like Capt. Scott's considerable coon. The Vice President of the Pennsylvania road at the railroad convention in Erie, last month, stated that he represented three thousand and forty-two miles of track, exclusive of the Pittsburgh, Fort Wayne & Chicago and its branches. The addition of the Pacific road and the New Jersey lines, for which negotiations are now pending, will make an aggregate of upwards of five thousand miles under the control of a single corporation. Here is material for the alarmists.—Erie Dispatch.

"Vat's de matter?" exclaimed an old Dutchman as he tucked up his apron and ran out of his shop to know the meaning of a crowd in his neighborhood. "There is a man killed," answered a bystander, "Oh! ish dat all?" said our friend in disappointment, "must a man kill! hump! I thought it wash a dog fight."

A man in Covington, Ky., made a bet the other day that he could drink a pint and a half of Cincinnati whiskey in twelve hours. He won the bet, says the Louisville Courier-Journal, and his widow remarked at the funeral the next day that it was the first money he had earned by hard work in ten years.

Ruling traits—Magistrates.
 A card "Party"—A gambler.

Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffin and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The ablest mechanics of our country have for years been at work trying to find out some new and untried plan to prolong the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Geo. Boulton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the managers of the Columbia Farm:

OFFICE COLUMBIA OIL CO.
 Columbia Farm, Jan. 28.

Mr. H. K. KENYON:
 Dear Sir:—We are using your Double Acting Oil Pumps in three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.

Respectfully yours,
 G. W. BOULTON, Supt.
 J. P. BARCROFT, Treas.

For further particulars address H. K. KENYON, Petroleum Centre, P. O. box 547.

Buy the "Red Hot" Saddle manufactured in Titusville expressly for the oil country adapted to all kinds of weather, at J. R. KROUS.
