Some pard hearted individual tied a berse up in front of Smawley's livery stable yesterday forenoon, and left the poor beast standing there without food or water until twelve o'clock last night, when officer Kinney put the animal in the stable. Wonder how that man would feel to be kept standing nearly twenty-four hours in the cold and rain without food or water.

Kanpp Lodge No. 485, A. Y. M., was constitued at Rouseville, at 12 m. to-day. A delegation of Free Masons from this place were in attendance. The ceremonies were of a very interesting character.

Night before last a citizen of Teutonic origin and a XVth amendment had an altercation on the street, and from a war of of certain hard-hearted rescals, who ought words got to blows, which resulted in Teuten receiving a thrashing. After the fight ended, Teuton desirons of being revenged, procured a butcher kaile and "went for" the amendment with the avowed intention of cutting his liver out, carving him into mince meat, and otherwise doing bim serious bodily barm, the result of which was taut Teuton received a second thrashing.

Real courtery is widely different from the courtesy which blooms only in the sunshine of love and the smile of beauty, and withers and cools down in the atmosphere of poverty, age and toll. Show me theman who can quit the society of the young to listen to the kindly voice of age, who can hold cheerful converse with one whom years has deprived of charms; show me the man of renerous impulses, who is always ready to kelp the poor and needy; show me the man who treats unprotected maldenhood as be would the belress, surrounded by the protection of rank, riches and family; show me the man who never forgets for an instant the delicacy, the respect that is due to woman as woman. In any condition or closs, show me such a man, and you show me a geutleman.

In a recent lecture at Oil City, Prof. H. P. Hamilton said: There are many theories affont in regard to where this oil comes from. I will give you mine. Geologists and scienists believe that the centre of the earth is full of melted matter; that the earth on which weilive is a thin crust. I believe this; I also believe that inside of this crust there is a vast body of oil, penetrating to the centre of the earth. Whereever oil has been found the surrounding country has preved to be hilly and broken. I believe the rocks beneath correspond to the earth above, and this being the case the oil finds its way up through the crevices of the rocks to the surface, or in the neighborbood of it. Therefore I believe the melted muse in the center of our earth is oil.

Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or velos of the well are in a great measure cleared of para fine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by neural test that the use of this pump causes a gradually increasing flow of on. It is well known by oil ing flow of oit. It is well known by of operatore that this improvement is of great callet, and one that has been long sought The ablest mechanics of our country out some new and untried plan to prolong the life time of an all well; and nothing yes to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of the wells. Oil operators are reserved to Mr. Geo. Boulton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the madagers of the Columbia Farm:
