No. 2—Direct to Philadelphia without change.
No. 3—Direct from Pittsburgh without change.
No. 4—Direct to Pittsburgh without change.
Monday, Nov. 28, 1870.

ARMSTRONG RUN.—From a gentleman who paid the Armstrong Run oil territory a recent visit we learn the following in regard to the wells in that vicinity: James well No. 1 is pumping 25 barrels per day; James well No. 2 is claimed to be yielding 60 barrels, our however thinks it is not yielding near that amount; the old Jennings well, 80 barrels; Meldren Reserve well, flowing 150 barrels per day. This well has been torpeded twice. The first time it flowed between three and four hundred barrels of oil and then ceased producing entirely. A second torpedo, larger than the first, was then exploded, and the well again commenced to flow. It is claimed, fully one hundred and fifty barrels daily. Our informant counted thirty-eight derricks up or various stages of completion. At most of these wells drilling has commenced, and several are nearly finished. All the oil produced is stored in wooden tanks at the wells, as fast as one tank is filled another one being put up. This is made necessary as there is no means of communication with the A. V. R. R. across the river, the pipe lines only running down to the river's edge. Oil operators in that vicinity anticipate lively times the coming spring.

The Columbia Oil Company are putting in big boilers as fast as possible, and removing the small ones. One large boiler, it is calculated, will furnish sufficient steam to run four wells. Two men will do the same amount of work by the use of these boilers that heretofore required eight. The saving to the company is apparent to all.

Rev. M. Bytchley, rector of the Episcopal church at Rouseville, has been offered the Rectory of St. James church, Milwaukee, at a salary of \$2,000 per annum and the rectory. He has declined the offer.

Oil and Venango Gales have been conducted under one borough. The name of Oil City has been adopted.

The Rouseville Bulletin makes a serious charge against one of the County Auditors, James Lee, as follows:

Mr. James Lee, Lee, senior member of the Board of Auditors, and as such, acting custodian of the key to the School Commissioners office, where certain county papers are kept. \$45 in lithographed orders having been redeemed, said James Lee was entrusted with the duty of cancelling them. Last week during the session of the Auditors at Franklin, Auditor John Glass concluded to look in the order business, and for that purpose procured a key of the janitor and took a good look through the office for papers which should have been cancelled. Failing in his purpose, he reported to a brother Auditor, Lorenzo Poor, and the two again looked for the missing orders but without any satisfactory result. Mr. Lee was approached on the subject and he reported to one that he had torn the orders and strewn them over the office floor, to another that he had torn them up, put them in his over coat pocket, taken them to his boarding house and there burned them; to still another that he had carried a portion of them home and given them to his children to play with.

It is the duty of the senior Auditor in such cases to cancel orders and present them to the balance of the Board that all might witness their destruction. Now whether these orders have been destroyed, or whether the dear people will again have to pay them is the question. No doubt Auditor James Lee will be able to give a satisfactory explanation. That explanation is what the tax payers are after.

New Music.—We are indebted to our old time friend, R. H. Sargent, Esq., of the firm of Booth & Sargent, music dealers of Titusville, for the following new and beautiful pieces of sheet music: "Driven from Home" by Will S. Hays; "Put me in my Little Bed" by Dexter Smith; "Safe within thy Little Bed" by Eastman; "Act on the Square" by Sol Smith Russell. They are all three home melodies that when sung go right to the heart, and have acquired a deservedly popular reputation among lovers of good music. They are only a fraction of the large selection of sheet music kept on hand by this firm, in addition to the immense stock of musical merchandise which their store contains. The above pieces can be secured for the remarkably small price of 30 cts each. They will be sent to any address on receipt of the above price.

We were favored with a call from Mr. Harry Miner, the gentlemanly advance agent of the Wallace Sisters Theatrical Troupe, this forenoon. He informs us that these talented and favorite artists begin a week's engagement at Sobel's Opera House, March 6th. The pieces played by them are entirely new and novel. We predict for them a successful engagement.

A new well was struck at Franklin on Friday last, on the Blakely tract, which is yielding eight barrels per day of heavy oil. Owned by Sheasley Bros.

The new well on Pachell Run, mention of which we made a day or two since as yielding forty barrels per day, is only doing ten barrels. It is owned by the McGee Bros.

Our townsmen, Messrs. Robinson & McCleary, contractors for drilling oil wells, recently struck a new well at Foster Station, on the Allegheny River, which started up at the rate of fifteen barrels per day, was afterwards torpeded, and is now said to be yielding about twenty-five barrels daily. These gentlemen have been interested in numerous wells generally without success. We are pleased to chronicle their good fortune.

The Jamestown Journal suggests that as the accidents are almost of daily occurrence on the A. & G. W. Railway, each express train be compelled to carry a wrecker and tool car along for the purpose of clearing the track when the cars run off. The suggestion is a good one as it is a well known fact that passengers over that route never get through in time to make connections either east or west.

The body of Lawrence Moody, a brakeman who was killed at the New Hamburg railroad disaster, was recovered from the wreck yesterday afternoon. It was but little disfigured.

The Liverpool steamship Pacific has been lost in the Shetland Islands, with twenty-six of her crew.

A new well was struck on the Kerr farm, about three miles north of Titusville, yesterday, which is yielding fifteen barrels per day. Owned by Louis Meyer.

At an auction sale of oil stocks in Philadelphia on Monday, 1,000 shares of Locking Valley Oil Company were sold for \$4,200; 700 shares Allegheny River Oil Company, at twenty-five cents; two interests in Mill Creek Oil and Mining Company, at \$5

A wolf entered a Duluth church lately and was much affected by the services and an ounce of lead. He was converted before he went out—into a corpse.

A Sailors Description of a Dance.
Haven't had any fun with the landlubbers till Thursday night, at a dance. When I strided in the cabin found 'em under way on a Spanish dance. Took my station in line with Susan Tucker—fell back and filled, then shot ahead two fathoms—hailed up on the starboard tack to let another craft pass, and came astern on another sail spoke her, and bore round against the sun, and fell in with another sail in full chase. Passed twenty sail on same course, and when half across to the other shore, dropt astern—fell back—couldn't fill, so let go anchor and hauled up for repairs. Next time I was drawn into the current by a cowtillion, but didn't make much headway—shot ahead with Betsy Stark, and sailed over to the other coast. Took a turn opposite ran abreast twice towards other crafts, and back astern again—moved around to starboard—passed near partner's lights, and made sail to berth. Third time ran me in to port to the tune of the tempest, the Yankee tar's favorite. Proceeding along up coast according to the regular order of sailing—bore ahead again—rounded to—then passing adversary yard-arm by yard-arm, looked astern with the whole squadron, in circular order of sailing. Sally Jones all the time manœvering and making signals when under full sail. Finally anchored after a heavy squall.

Boiler explosions are attributed to many causes. First, defective pieces; second, punching instead of drilling the rivet holes; third, imperfect riveting, and hammering unevenly; fourth, burning the bottoms in firing; fifth, formation of "sand bars," or cruts, within the boiler; sixth, generation, in some way, of electricity; seventh, pumping cold water into an over heated boiler; eighth, careening of boats; incompetent firemen, engineers, or masters; carelessness or neglect; the water taking the "spheroidal form" from over-heating, and then passing into steam instantaneously; foaming of the water; most frequently, water getting too low in boiler; and so on *ad infinitum*. Few appear to have thought of the fact that in a considerable number of the cases reported, while water was too low in the boilers, whisky was too high in the engineer. It is the testimony of the Baltimore American that not an explosion has taken place in or about that city within its (the American's) memory unless it could be said of the engineer: "He is an habitual drinker."

Butler, Pennsylvania, had a celebration lately over the opening of a twenty mile railroad, and the feature was the burial of the stage coach, and a procession of Pittsburghers up the street, led by the stage driver, equipped with penny horns, jewsharps, dinner bells, gongs and fish horns.

The height of irreverence has been reached by a gentleman of Ohio, who made the black gown of an Episcopal minister to wear as a masquerade costume.

A GENERAL REMINDER.—A negro convicted of petty larceny recently, in New Kent county, Va., elected to be whipped. The Sheriff gave him thirty-nine pretty well laid on, after which the negro was released. Rubbing his back and turning around with a broad grin at the Sheriff, he said: "Golly, Mars Royster, dat reminds me ob de good ole times."

A witness at Debar's Opera House St. Louis, yesterday, for the benefit of the "Little Church Around the Corner" nettled about three hundred dollars, which has been sent to Rev. Mr. Houghton.

Last week an Evansville jury were brought into the court room in order that one of their number might be instructed upon the following point of law: "I believe that the evidence is one way, and the other eleven believe different, does that justify any other jurymen in knocking me down with a chair?" The judge answered in general terms according to the established principles of Indiana law.

M. De Clet gives it as his experience, during the present war in Europe, that wounded soldiers may, without injury, remain unattended to forty-eight hours, if necessary, provided that the wounds are covered with lint or linen, and kept moistened with a solution containing three per cent. of carbolic acid. He also says soldiers may be protected against typhus, dysentery and other similar diseases by giving them morning and evening, a wine glass of carbolic water, containing not more than half per cent of the acid.

A full variety of Skates, at NICHOLSON & BLACKMON'S.

Gaffney has a large lot of scotch ale and London porter especially of family use, by the bottle or case.

BIRDS.—The best Singing and cheapest Canary Birds in the oil regions are to be had at
nev7-11 J. W. BEATTY'S.

Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The ablest mechanics of our country have for years been at work trying to find out some new and untried plan to prolong the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Geo. Boulton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the managers of the Columbia Farm:

OFFICE COLUMBIA OIL CO.
Columbia Farm, Jan. 28.
MR. H. K. KENYON:
Dear Sir:—We are using your Double Acting Oil Pumps in three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.
Respectfully yours,
G. W. BOULTON, Sup't.
J. P. BARCROFT, Manager
For further particulars address H. K. KENYON, Petroleum Centre, P. O. box 547. Jan 31.

GOOD ADVICE.
Ask no woman her age. Never joke with a widow. Never contradict a man that stutters. Be civil to all rich uncles and aunts. Wear your oldest hat on course to an evening party. Always sit next to the carrier at dinner. Keep your own secrets. Tell no human being you dye your whiskers. Wind up your conduct like a watch once every day, examine minutely whether you are "fast" or "slow." Make friends with the steward on board a steamer, there's no knowing how soon you may be in his power. Write not one more letter than you can help; the man who keeps up a large correspondence is a martyr, tied, not to the stake, but to the post. But the best advice we can give to the reader is, that he should buy his clothing at the store of A. Alden, Washington street, Petroleum Centre, Pa. The stock of ready made clothing at this house is the largest and cheapest in the city. He has also a large assortment of cloths, cassimeres, etc., and is prepared to make up suits in the neatest manner imaginable. He has also a full line of gentlemen's furnishing goods. This is one of the best and cheapest stores in the city.

Buy the "Red Hot" Saddle, manufactured in Titusville expressly for the oil country adapted to all kinds of weather, at J. R. Krohn, a12-11

Best Refined Oil 20 cents per gallon, at deal5-11 J. RUTHERFORD'S.
