SILVER PALACE SLEEPING CARS.
No. 3—Direct from Philadelphia without change.
No. 5—Direct to Philadelphia without change.
No. 6—Direct to Pittsburgh without change.
Monday, Nov. 28, 1870.

Guid. at 1 p. m., 111

We understand that the gentleman who was so rudely serenaded recently, upon the occasion of his marriage, now proposes to make the serenaders suffer for the outrage. He has retained counsel and a double action will be brought—one by the Commonwealth and the other an action on the case for damages. The laws of Pennsylvania are particularly severe in such cases as this, and the "boys" may expect serious trouble. The free use of fire arms, endangering the lives of the party by frightening the team, and the further indignity of compelling the bridegroom to give money to purchase the safety of the party is an offense punishable by fine and imprisonment.

One of the new wells of the Brady's Band Iron Co., at Queenstown, near Armstrong Run, was completed yesterday, and tubing was to have commenced this morning. The well is 1,414 feet deep. Show for oil is said to be excellent.

Fire.—About 2 o'clock this morning a tank well No. 1, Patterson & Dickey lease, Hartzell farm, containing about sixty barrels of oil, caught fire. It is supposed from sparks from the smoke stack of the engine, and was destroyed. For a time it was feared a disastrous fire would ensue, and nearly all the people living below the well on the Egbert farm, had their household goods packed up and ready for removal at short notice. Fortunately the tank did not burst, and the flames were confined until the fire had spent its force. The small receiving tank near the derrick caught fire but was put out by the engineers. Loss small.

Mr. Pat Danigan got drunk yesterday and mistook two of the large plate glass windows for "his little bed," laid his weary bones to rest on the aforesaid windows and crashed them into small pieces. Last night he played checkers with his nose in the crack-up.

BOILER EXPLOSIONS.—A correspondent of a Cincinnati paper writes:

"The frequency of boiler explosions on land and water, and the destruction of human life by such accidents justify every individual in giving publicity to whatever he may conceive will throw light upon the cause or causes of such disasters, and the means to prevent their recurrence.

Not long since the owner and operator of a portable engine and boiler told me he had been troubled frequently with foaming in his boiler, and that he could not ascertain the cause of it as the water gauges always showed an abundance of water at the time.

On one occasion he opened the "blow out" cock, and, to his astonishment, neither water nor steam was discharged, but a colorless gas, which continued to flow with great force for almost a minute before the water appeared.

Will Captain Jones, of the Dexter, tell us whether this was a plain or "fancy gas"? Is it true that decomposed water, in the form of gases, can underlie the water in a boiler and become a magazine for its destruction. The case as above stated indicates this may be true, and it is not a fancy sketch merely.

I will ask a question for the information of all persons interested, and if the answer be in accordance with opinions formed without the aid of statistics, I am inclined to think the means to prevent boiler explosions are always at hand. Are there as many explosions on the Missouri, and other muddy streams, as upon the Ohio, and all other rivers and lakes whose waters are clear? If the statistics will show the number is less, is it not positively certain that the 'mud valve' is the place to look for safety, quite as much as to the safety valve itself.

In very muddy streams I believe it is customary to "blow out" through the mud valve every hour, or perhaps oftener, while the boat is in motion, and in doing this, if there be explosive gases they are discharged. In clear water this is not frequently done, and the conclusion will force itself upon every mind that if explosions are much less frequent where this "blow out" is constantly practiced, whatever may be the cause of explosions, a means to prevent them is always at hand.

I do not write to invoke criticism, but to state facts and elicit inquiry.

The daily accredited "local" hereof has been called away to Erie that he may tell what he knows about the attempted robbery of Mr. Hubbard. We trust our Erie brethren of the quill will not inveigle him away into by and forbidden paths, nor treat him as is Petroleum Centre fashion, to a ten pound sack of flour. But then if he should deserve it, spare not, but come down with the flour.—Corry Republican.

As long as the Republican man is not troubled with "foibles" he'll pass. But let him once go to testing the "butter and cheese" market and he's a gone sucker.—Then he needs flour in liberal quantities.

On Monday evening next the Wallace Sisters—Agnes, Jennie, Minnie and Maud—supported by a full and talented company of artists, appear at Sobel's Opera House, for an engagement of one week. Monday evening will be produced the comic operatic burlesque entitled, "La Belle Sauvage; or, Po-Ca-Hon-Tas," preceded by the very laughable farce of the "Loan of a Lover." Also, little Misses Minnie and Maud in their clog specialties. We bespeak for these talented artists crowded houses during their stay here.

Among the patents recently issued are one to J. Evans Jones, of Tidouite, for Lock-stop Cock; and one to Nathan S. Minnie, of Oil City, for Cooking Stove Attachment.

Trains on the O. C. & A. R. R. were delayed both ways, yesterday, on account of land slides.

Never ridicule what you cannot explain.

He who blackens others does not whiten himself.

Do not meddle with any business you know nothing of.

A good business habit and reputation is always money.

Thirteen new wells are going down at Coal City, Fosters Station, on the Allegheny. Angell, Prentice & Co. are the principal operators.

Bishop Simpson of the M. E. Church, is soon to lecture in Titusville.

Just received at Schoenblom's next door to the Record office, a large invoice of nice fresh Oranges and Lemons direct from the sunny south.

Our monthly petroleum report will appear on Monday.

The roads are in a fearful condition at present.

A correspondent of the Pittsburgh Commercial, writing from Rochester, Pa., says:

The well being put down at Brady's run which empties into the Beaver about two miles and a half above its mouth, commenced pumping oil last evening at the rate of about twenty-five barrels per day.

This well has not been thoroughly tested yet. Capt. Boyle, of New Brighton, the principal owner thinks that when they get the water pumped out and have the well properly tared, it will yield from fifteen to twenty-five barrels. The oil is of a very heavy lubricating quality, similar to that found at Smith's Ferry. The well had been put down 1,388 feet; the oil was, however, obtained at a depth of 765 feet.

The decease of General Magruder and Alzy was the occasion of a meeting in Baltimore on Monday evening of about two hundred and fifty persons, who were in the Confederate service, to give expression of sympathy and regard. Glowing eulogies were pronounced and passed—among the latter the following: "That we recognize in these distinguished officers two of the bravest and most unselfish of those brave and unselfish men who, turning from all the allurements held out to them in the service of the rich and strong, drew their stainless swords in defense of those whom they knew to be poor and weak, but whom they believed to be right."

The worst fooled thief on record is a Mississippi chap, who, the other day, stole the heaviest carpet-bag he could find in the depot, and after five miles, opened it and found the contents to be a half hundred of tibles.

Here is how the Dubuque Morning Call talks of its city fathers: "The Common council met yesterday. They talked canna a little; allowed a few little bills; joked a little; smoked a few cigars; told a few stories; and adjourned."

At a California fair several bottles of strained honey were put on exhibition, when a chap put a bottle of castor oil with the rest. Several old ladies sampled it with the same result. The opinion of all who tried was, that the bee who laid it was a fraud. One old lady said even the bees had got to cheating nowadays.

The Zee troupe open at Titusville on Monday evening.

S. H. Evans has been confirmed Postmaster at Tidouite, by the U. S. Senate.

The Lake Shore & Michigan Southern Railroad Co.'s oil sheds, at Cleveland, were burned to the ground on Wednesday night. Lost about \$6,000.

Short supplies appear to be the order of the day. Ice was short in the summer, and coal in winter. Let us hope that the weather will get warm and fool the speculators.

The Forest Press says:

"It used to be in good old Democratic days that the more liquor you drank, the drunker and happier you got; but in these degenerate times, the more you drink the sicker and more miserable you become!"

The following stanza was published in Scotland in 1807, and designed as additional to the "John Anderson, my Jo" of Burns:

"John Anderson, my Jo, John,
We've found the mountain's fit,
And whether we go lower, John,
Or up, I know not yet;
But whether w'e be just, John,
Or w'e be doomed below,
Ye have a wife to go w' ye,
John Anderson, my Jo."

REWARD.

Lost—On Thursday evening, in Petroleum Centre, one GOLD BRACELET. The person finding the same and returning it to the Record Office will receive one dollar reward.

MISS EMMA WALKER.

Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The ablest mechanics of our country have for years been at work trying to find out some new and untried plan to prolong the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Geo. Benton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the managers of the Columbia Farm:

OFFICE COLUMBIA OIL CO.,
Columbia Farm, Jan. 28.

Mr. H. K. KENYON:
Dear Sir:—We are using your Double Acting Oil Pumps in three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.

Respectfully yours,
G. W. BOUTWELL, Sup't.
J. P. BANCROFT, Manager

"POICKRY!"

Enumerating a few of the articles to be found at

L. M. STERNBURG'S

Lumber Yard

Washington-St., Petroleum Centre, Pa.

Friends and patrons, one and all. Your attention to my "biz" I would call; Times are dull an' money tight, But in these times I'm looking for light;

To those who are building rigs without number, I would inform—this is the place to buy Lumber;

My motto is this: "Quick Sales and Small Profit," For business is healthy and I think much of it;

In quality my Lumber is second to none, And as for Shingles, I keep No. 1;

Some may not look at it in the light I do, And for close I have a quality No. 2;

And to those who are particular—no some may be, I still have another quality called No.

have good seasoned Lumber, Dressed up nice, Which I will sell at a low cash price;

Such as Flooring, Ceiling and Siding, both Rough and Dressed,
Lath, Rutens and Surfaced Lumber, all of the best;

I also have Rig Lumber of all kinds, All prices to compare with oil and hard times;

All kinds of Lumber kept constantly on hand, And a box of Cigars of a very good brand;

My facilities for sailing are surely without number I always keep good teams to deliver good Lumber

so if you want Lumber, Rough, Dressed, Soft or Hard, You will find just what you want at L. M. Sternburg's Lumber Yard.
