For some time past Mr. Levi Mason, agent for the Roberts Torpedo Company in this vicinity, has suspected that certain individuals at Pioneer were engaged in exploding torpedoes in oil wells thereby infringing on the Roberts patent. His suspicions proved correct it appears, and last night his assistant, Mr. Chas. Blackford, was sent to Pioneer to look into the matter. Mr. B. states that he arrived at his destination about 11 o'clock; went to the well where the suspected parties were at work, and saw them use a torpedo. After the torpedo had been exploded he came out from his hiding place, and was assailed by three men, knocked down and otherwise abused. During the melee he dropped his revolver from his pocket, and it was picked up by one of the men who pointed it at him and threatened to shoot him if he did not immediately vacate the premises; also made sundry other threats, &c. This morning warrants were issued against the men by Justice Reynolds, and placed in the hands of an officer, who up to the present time has failed to arrest them, not being able to establish their identity. They will probably be arrested in a day or two and the matter ventilated by the Justice.

An infant son of Mr. Jerome Akin, died of scarlet fever, yesterday. Mr. A. and family have the sympathies of the community in their sad affliction. The remains were taken to New York State for burial, this morning.

Twenty-three new wells are going down on the McGuire farm, Church Run, near Titusville. The Herald predicts lively times in that vicinity in the matter of developing.

Wednesday night the depot and ticket office at Miller Farm was broken into by burglars and about \$400 stolen. No arrests have been made.

#### PATENT SCRUBBING BRUSH.

This brush was invented and patented by our townsmen, Messrs. Ralph Rockwell and Zira B. Custer, and is decidedly the nicest arrangement of the kind that has yet been brought before the public. The invention consists in a wooden stock having beveled edges, in combination with a base-board having a recess with beveled sides, into which said stock fits, and from which it is prevented from dropping out by the dove-tail joint, and also in combination with a socket for the brush-handle, which is pivoted in the said base-board, and extends into a recess formed in the upper side of the stock, and thus prevents the latter from moving laterally in the base-board. The handle is reversible and so arranged that the brush can be used either with the rubber strip in front or back. By pulling out the pin the brush can be removed from the socket and used for scrubbing off shelves, walls, &c. The above are the most important points claimed for the invention. The brush is furnished at the remarkably low price of \$1.00 each. The saving of time and labor is apparent to the most casual observer, in consequence of which they are selling off very rapidly, housekeepers after trying them once declining to use any other. Further information will be furnished by calling on or addressing by letter—Rockwell & Custer, Petroleum Centre, Pa.

The scrubbing brush is purely a home invention, and from a knowledge of its merits as a labor-saving article, we advise our citizens to try it, and feel sure that the brush will give entire satisfaction.

#### PALMSUNDAY AND HOLY WEEK.

T-morrow (Sunday) will be Palm Sunday, when Christ's entrance into Jerusalem is commemorated by blessing palm and other green branches, and distributing them to the people. Hence the name of the day. It is the beginning of Holy Week, or the week immediately preceding the Queen festival of the church, Easter. On this day the crosses and ornaments of the altar are uncovered until after Even Song.

Holy week will be duly celebrated in most of the Episcopal and Roman Catholic churches of the country by daily services. The Holy eucharist will be celebrated in many of the churches, on Thursday evening, in commemoration of the institution of the Lord's supper.

Among the list of patents granted to citizens of Western Pennsylvania for the week ending Tuesday, March 23, 1871, are:

- 113,023—Apparatus for Purifying Coal Oil; Benjamin Crawford, Allegheny.
- 113,094—Machine for Pulling Flax; Benj. Reeves, Franklin.
- 113,118—Washing Machine; George S. Walker, Erie, assignor to himself and F. F. Adams, same place.
- 115,153—Valve for oil tanks; Daniel Fisher William Cummings, Oil City.
- 113,166—Torsion Springs for Cars; Benj. Hershey, Erie.

J. M. McLoskey, clerk of the Express and railroad companies at Westport, about six miles east of Renovo, on the Philadelphia and Erie Railroad, is a defaulter in the sum of \$358 belonging to the Express company, and \$509 to the railroad company. He left home but was arrested at Erie, on Wednesday, and subsequently released as his father had deposited money to cover the young man's delinquency. Fast living was the cause of the crime.

As old Van Stroopms was giving his youngest, who was inclined to be lazy, a good cawdiding, the boy cried out: "Oh, don't fadder, it makes me smart!" "Dat's shoost vat I want," said the old man, as he whacked away with renewed vigor.

Mr. Smith, of Syracuse, was carrying a lamp, filled with the non-explosive kind, up stairs, when suddenly there was a noise, something dropped at the foot of the stairs, and the firemen were on the ground directly. They always keep a corpse two days in Syracuse.

Gen. Kane is reported to be in a dying condition from the effects of a surgical operation on an old army wound. He is with his family at Kane Station, on the P. & E. R. R.

A sewing machine agent at Shelbyville, Ky., wanted to sell a machine to the wife of a druggist; and that he called several times every day and stayed until he saw the husband coming, and then went away. This went on for a week, when the druggist stayed at home one day, unknown to his wife, to see if he liked the sewing machine. The sewing machine died that day.

Forney has filed his bond, and will at once begin duties as Collector of Philadelphia.

William P. Schroeder, lately a book keeper for the firm of Crook, Coburn & Co., Chicago, was sent to the Penitentiary for two years for the embezzlement of \$17,000.

The Governor in his last annual message urged in a very forcible manner the importance and necessity of a thorough geological survey of the State and the Committee on Ways and Means of the House of Representatives some time ago reported a bill to authorize such a survey. The Legislature, however, has been too busy with other matters to give this subject the attention it deserves. Every citizen of the State is interested in having such a survey made as early a day as possible, and all the money that is likely to be expended upon it, if it is entrusted to proper hands, will be returned a thousand fold. This is one of the very few really useful projects now before the Legislature, and we are sorry to say that for this very reason it is not likely to receive the consideration it deserves. There are enough intelligent and honest men in the Legislature, however, to appreciate the importance of a geological survey, and they should urge it as strongly as possible, and endeavor to have a bill passed authorizing it before adjournment.—Harrisburg Correspondence Titusville Herald.

A measure of this kind would be of incalculable benefit to the oil region, and we hope to see it introduced and passed by the State Legislature during the present session.

"A Mother of sad experiences," in the last Revolution, writes vigorously in favor of licensing the social evil, her reasons being chiefly sanitary. While the placing of this abomination under legal surveillance will unquestionably lessen the spread of loathsome disease, and may even allow to the sons of this "Mother of sad experiences," the indulgence of their vices with safety, sanitarily speaking, she seemingly forgets that, to keep constantly full the ranks of this infamous institution, the hearts of many other mothers must know still sadder experiences; and that whatever legal enactment throws a veil of sanitary protection over the hideous criminalities of her precious scalp, is pretty sure of tearing away the only barrier which another mother may interpose between her daughter and the world of passion and sin. It is to be regretted that an editorial in the same number of the Revolution takes ground against the legalization of this vice only because the law proposed exempts one-half of the guilty parties.

The preciousness of little things was never so beautifully expressed than by E. F. Taylor, in the following: "Little words are the sweetest to hear; little charities fly farthest, and stay longest on the wing; little lakes are the stillest; little hearts are the fullest, and little farms are the best tilled. Little books are the most read, and little songs the most loved. And when nature would make anything especially rare and beautiful, she makes little—little pearls, little diamonds, little dew." Every body calls that little which he loves best on earth.

The trial of Cesar Cowell at Morris, Ill., has terminated, the jury finding him guilty, and fixing his term in the penitentiary at thirteen years.

The season for young men to elope with handsome step-mothers has opened, and Allegheny City, and Hanibal, Mo., have had each a case. Old men want to be careful this season about marrying young wives when there are big boys in the family.

When an Ohio man finds his wife unusually pleasant in the morning, he says he don't care about any coffee, and then he takes some of the coffee to a chemist and has it analyzed. They most always find more or less poison. That is an uncertain way to live.

Robert Wallace, a fireman on the English steamship Peruvian, at Portland, Me., is under arrest for smuggling. Several Portland merchants of good standing are implicated.

The preliminary examination of John S. Blackburn at Chillicothe, Ohio, charged with the murder of Mary Jane Lovell a few days ago, was concluded yesterday, and the accused held in \$10,000 to appear for trial.

#### Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The latest mechanics of our country have for years been at work trying to find out some new and untried plan to prolong the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Gen. Boulton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonials from the managers of the Columbia Farm:

OFFICE COLUMBIA OIL CO.  
Columbia Farm, Jan. 28.

Mr. H. K. KENYON,  
Dear Sir:—We are using your Double Acting Oil Pump by three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.  
Respectfully yours,  
G. W. BOULTON, Sup't.

#### Mortgage Land Grant Gold Bonds

OF THE  
Northern Pacific R. R. Co.

These bonds are secured, first, by a First Mortgage on the land to be sold; second, by a First Mortgage on the entire Land Grant to be made thereon; and third, by the Third Mortgage on the land to be sold, and each of these Principal and Interest are payable in gold—the Principal at the end of thirty years, and the Interest Semi-annually, at the rate of SEVEN AND THREE QUARTS PER CENT. per annum.

They are sold in denominations of \$100, \$500, \$1,000, \$5,000 and \$10,000.

The Trustees under the Mortgage are Messrs Jay Cooke, of Philadelphia, and J. Edgar Thompson, President of the Pennsylvania Central Railroad Company.

These Northern Pacific 7-30 Bonds will at all times before maturity, be receivable AT TEN PER CENT. PREMIUM (or 1, 0, in exchange for the Company's Bonds at their lowest cash price.

In addition to their absolute safety, these Bonds yield an income larger, we believe, than any other first-class security. Persons holding United States 5-20's can, by converting them in Northern Pacifics, increase their yearly income one-third, and still have a perfectly reliable investment.

HOW TO GET THEM.—Your nearest Bank or Broker will supply these Bonds in any desired amount, and of any denomination. Persons wishing to exchange stocks or other funds for these, can do so with any of our Agents, who will allow the highest current price for ALL MARKETABLE SECURITIES.

Those living in localities remote from Banks, may send money, or old bonds, directly to us by express, and we will send back Northern Pacific Bonds at our own risk and without cost to the investor. For further information, pamphlets, maps, etc., call on or address the undersigned, or any of the Banks or Brokers employed to sell the loan.
