No. 3—Direct to Philadelphia without change.

No. 5—Direct from Pittsburgh without change.

No. 6—Direct to Pittsburgh without change.

Monday, Nov. 28, 1870.

Gold at 1 p. m., 110 1/2

A man named John Vreeman, engineer at a well on the Agnew Lease, Widow McKnight farm, Chubuck Run, was instantly killed by being struck on the head with the pitman crank. The workmen were in the act of drawing the tools from the well when the accident occurred. Deceased was from Canada, aged 32 years; not known to have family. We glean the above facts from the Titusville Herald.

A disastrous fire visited Houseville on Sunday afternoon last, by which the Comet wells, owned by the Buchanan Royalty Oil Co., a refinery, boarding house, several other buildings, and about 100 barrels of oil, were burned. The Bulletin does not state the loss.

The wind blows to day "as 't had blown its last," causing some of the light frame buildings in town to shake and tremble to their very foundation. Derricks situated on top of the surrounding hills also waver considerably and in some instances have found the common level of mother earth.

Our citizens should bear in mind that it is the intention of Mr. C. H. Heighiton to establish a select school in this place soon, to last for a period of twelve weeks. Mr. H. is a graduate of Oberlin College, and came to this place well recommended.

The Titusville Herald's monthly petroleum report appeared yesterday morning.—The daily production for the month of March is placed at 13,531 barrels.

A free bridge over the Allegheny river, is now agitating the public mind in Franklin.

In the East Forging oil again there are eight rigs up. Three well are pumping an average of ten barrels each.

"For ways that are dark, and paths that are mean," the people who attempt to get advertising done for nothing, take the lead.

The Clarion Democrat gives the following as the daily production of oil in Richland and Perry townships, Clarion county:

- Phillips well in mouth of run, 18.
- Kern & Tillenbach 4 wells, 90.
- Kipp & Churchill, 12.
- Gantry well, 12.
- Brett well, Kelly farm, 10.
- Blair well, Kelly farm, 12.
- Fox & Finks, 3 on Fox Farm, 90.
- Fertig & Hammon, 3 wells on Fox Farm, 90.
- Soult & Dower, on Rupert Farm, 13.

By the above statement, it will be seen that about 800 barrels of oil is produced daily, in Perry and Richland township, Clarion county. This is worth at least \$1,000 a day or more than \$300,000 a year. A large number of new wells will be put down this season, along the Clarion river and other points in the county. Clarion is rapidly becoming an oil district, and will soon rank with Venango in its greasy wealth.

Mrs. Dr. Chase's Lecture—will be this afternoon for ladies, and not as we stated for ladies and gentlemen. To-morrow evening the lecture will be for both sexes. The balance of the week in the afternoon and for ladies only. Before leaving the oil region Mrs. Chase intends visiting all of the neighboring towns, with the view of introducing a course of lectures. The lectures here are giving very general satisfaction, and an increasing interest is being manifested.—Titusville Courier this morning.

In the above connection we are requested to state that it is the intention of Mrs. Chase to deliver a course of lectures for the benefit of the ladies, in Petroleum Centre, the time and place to be announced hereafter. This lady comes highly recommended as a successful lecturer and should be liberally patronized.—[Ed.]

We clip the following dispatch from the Pittsburgh Commercial of yesterday:

Parker's Landing, Pa., April 8, 1871  
The boiler at the Ballantine well exploded about six o'clock this morning, badly scalding and injuring S. F. Keener, from which he died in three hours. The boiler was thrown two hundred feet, and the engine house completely destroyed. There was no damage to the derrick. Keener was on the tower at the time the boiler exploded.

A notice of the Galton Party, at the Oil Exchange Hotel, which should have appeared yesterday, was accidentally omitted. The party we are informed was a success in every particular, and every thing passed off in a very pleasant and agreeable manner.—Dancing was kept up to a late hour, and all engaged in hoping that many more such pleasant occasions may be witnessed.

As the warm weather approaches the demand for Soda Water increases. Griffes Bros. and M. S. Simmons have their fountains running in full blast, and J. H. Christie will soon have his soda fountain in operation.

Messrs. Vandergriff & Forman's pipe line from the Milton farm, or Driewood, is now in full operation. Work was commenced on this line one week ago last Saturday, and on Friday it was completed and ready for operation. On Saturday 700 or 800 barrels of oil were brought through to this point. The line is over four and one-half miles in length, and, as above stated, was laid in less than one week's time, which is the fastest time on record. So says the Oil City Register.

The daily production of the West Hickory oil district, as reported by the Tidouche Journal, is 1,538 barrels.

From the Oil City Register we learn that the increase of its subscription and general business since being enlarged is highly gratifying. We are pleased to record the success of Bro. Johns, as he has labored hard to attain success and is entitled to it.

The new Exchange Hotel in Franklin will be opened about the 10th of May.

We learn that a Musical Society, to be called the Petroleum Centre Choral Union, was organized at the meeting at the Catholic Institute last week. We are requested to say that this week they are invited to meet at Old Fellow's Hall, Saturday evening, at 7 1/2 o'clock, when arrangements will be made for regular meetings.

A number of Cincinnati girls have formed a society for investigating the antecedents of men who come around there wanting to marry. Several girls have got fooled by marrying men who were not worth a million dollars, as they promised they were, and others have found after marriage that other wives had prior claims on their husbands. So this society had to be formed.

CONGRESS, EMPIRE AND HIGH-ROCK WATERS fresh from the springs at GRIFFES BROS.

A correspondent of the Erie Dispatch writes in the following complimentary manner in regard to the O. C. & A. R. R. all of which is incorrect:

The Oil Creek & Allegheny River Railroad, is as usual, doing a rushing business. Last Monday a train of six coaches was filled to overflowing, between Titusville and Oil City. This road still keeps up its reputation for safe running. One drawback heretofore, has been the frequent slides from the hillside along the river, but as the managers have expended large sums within the last year in sloping these bluff places, the difficulty has been avoided the present spring. The affable General Manager, John Pitcairn, Jr., spares no pains in bringing the road to the public requirement.—The increasing business of the section through which it runs, makes an almost constant demand for new cars, side tracks, etc., which are always forthcoming. As a proof of this I will refer the readers to the splendid new Pullman palace sleeping coach, recently put on the road, and the many new sidings, among the most conspicuous of which, is the one from Oil City to Rouseville, a distance of three miles, requiring three bridges, two over Oil Creek and one over Cherry Run.

The Oil City Register says:  
A fire commenced in the woods, near Franklin, between four and five o'clock Saturday afternoon. It soon obtained such headway that it could not be checked. A large force of men were employed on Patchell's Run, who succeeded in keeping the flames from the numerous oil wells. The fire continued to burn with great intensity all night, extending back into the country several miles, destroying a large amount of valuable timber. At last accounts the fire had not been checked.

The Prussian Monitor publishes a statistical notice of the war, winding up with an arithmetical statement, thus: "The military operations, properly so-called, only lasted 180 days. In that space of time the German armies were engaged in 156 combats, fought 17 pitched battles, took 26 fortresses, made prisoners 11,640 officers and 263,000 soldiers. This makes an average term, for each day of the war, one combat; for every nine days, a battle; for every six days, the capture of a stronghold."

A girl that quits a house because they don't have family prayers ought to be considered a real good girl, but it is not always the case. One in Boston did it, saying she didn't believe any family that neglected to pray was good, and after she was gone the family found that all the silverware and jewelry had gone along with her. They pray now regularly before their hired girls.

Just received at Messrs. & Armstrong's Boat and Feed Store, a car load of paint and 200 barrels or less of the finest apple cider brought to this market. They who are wise will call into their store and examine stock and prices.

Messrs. S. A. Woods and L. H. Collom are about to sink a new well on the Woods farm, for the purpose of further testing that territory. Drilling was to have commenced to-day.

The Moyamensing Hose Company, of Philadelphia, made their last parade on Monday. The Moyamensing Hose, although in its early history the name was not fragrant, was ever a fire company. Where the members went at a fire few dared to follow, and the rolls are sad with the records of many who died in the battle with the fercest of the elements. The organization of the "paid" department necessitated the disbandment of this and all other volunteer companies in Philadelphia.

**HOUSE FOR SALE OR RENT**  
A comfortable Dwelling House, situated in the Lake Shore Block, on the side hill, will be sold reasonable or rental. Inquire of H. E. Blackman, at the Hardware Store of Nicholson & Blackman, Petroleum Centre, April 11—1w

**Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.**

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or water, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The direct mechanical of our country have for years been at work trying to find out some new and untried plan in prolonging the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Geo. Buntion, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the managers of the Columbia Farm:

**OFFICE COLUMBIA OIL CO.**  
Columbia Farm, Jan. 23, }  
Mr. H. K. KENYON:  
Dear Sir:—We are using your Double Acting Oil Pumps in three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.  
Respectfully yours,  
G. W. BOULTON, Supt.,  
J. P. BARCROFT, Manager

For further particulars address H. K. KENYON, Petroleum Centre, P. O. box 547. Jan 31.
