Kenyon's New Double Acting Oil Pump for Pumping Oil or Water in Deep Wells.

Kenyon's New Double Acting Oil Pump is acknowledged to be the best pump now in use. One of its leading features is that it not only produces a continuous flow of oil or other fluid, but that it creates and sustains a constant and powerful suction, by means of which the seams or veins of the well are in a great measure cleared of paraffine and other obstructions, and the oil in the veins is drawn towards the well. It has been ascertained by actual test that the use of this pump causes a gradually increasing flow of oil. It is well known by oil operators that this improvement is of great value, and one that has been long sought for. The ablest mechanics of our country have for years been at work trying to find out some new and untried plan to prolong the life time of an oil well; and nothing yet to our knowledge has been brought before the public that in any way equals the power of the Kenyon Pump, experience having taught that it is the long continued suction that has the power to keep up and increase the production of oil wells. Oil operators are referred to Mr. Geo. Boulton, Superintendent of the Columbia Farm, for information in regard to the practical workings of the Kenyon Pump. We append the following testimonial from the managers of the Columbia Farm:

OFFICE COLUMBIA OIL CO. }
Columbia Farm, Jan. 28. }

Mr. H. K. KESTON:

Dear Sir:—We are using your Double Acting Oil Pumps in three of our oil wells and take pleasure in stating that we are getting more oil and gas from each of them than was previously obtained by the use of working barrels. We believe your oil pump to be the best in use.

Respectfully yours,

G. W. BOULTON, Supt.

J. P. BARRETT, Manager
