From Mr. James Elliott, owner of the Elliott well No. 3, Brown farm, destroyed by fire yesterday afternoon, we learn that the fire originated from the explosion of the gas barrel in the derrick, fire being communicated from the furnace. The derrick, engine-house, rig, tank house and tank containing 100 barrels of oil was burned. Mr. Elliott's loss will not fall short of \$2,000.—It will cost him at least calculation \$1,200 to put a new derrick, rig, &c., in order to start up the well again. By this fire Mr. Elliott has lost the hard earned savings of years of toil. However, he is one of the kind of men that can not be kept down by bad luck, and has already commenced the work of re-building, and old No. 3 will soon be pumping again.

The new well on the Angell & Prentice tract, Foster Station, has decreased somewhat in production. It is now said to be yielding 1% barrels per day.

Corner lots at Plumer are said to be increasing in value. Quite a number of new wells are going down in that vicinity, and those who profess to know where they speak, are of the opinion that Plumer will yet prove an Eldorado.

A new awning is being put up in front of Robson's saloon and billiard parlor. A decided improvement.

A refreshing shower last night is causing the green leaves to spring forth with renewed vigor.

Mr. A. Alden, of the Jamestown Clothing Store, has just returned from New York with the largest stock of spring and summer clothing ever brought to Petroleum Centre. Look out for his new advertisement.

The Byrom well, on the J. B. Kerr farm, Church run, which has been sunk fifteen feet deeper, started up a day or two since and is said to be yielding 80 barrels per day.

Mr. John Waltz, of Rouseville, while walking from Oil City on the railroad track on Saturday night last, fell through a trestle and broke his leg.—[Pet. Centre Record.

Some mistake somewhere. The Oil City Register says the injuries of the man Waltz were: "A comminuted fracture of the Patella and a niter—capsular fracture of the Femur." We don't like to believe either of these papers would wilfully misrepresent but something evidently needs explaining. We want to know, now, without any fooling, how that man was hurt, and whether he's dead. The papers don't state.—Jamestown Journal.

For the information of the Journal man we would state that the man is all right.—Getting well.

It seems that the supply of subterranean gas is gradually being developed westward from Erie, Pa. At Painesville, Ohio, gas sufficient for fuel for a steam engine was found at the depth of 350 feet; but the drilling was continued until at 550 feet, a large vein was struck, of such force and power as to stop the work. The volume of gas is so great, it is estimated by good judges, that it would light the entire city of Cleveland. It comes up through the pipe from the great deep" below with a rush and a roar and a grandeur which one must witness to appreciate. The farm on which this well is located is on the east bank of the river nearly opposite the Geauga furnace, and about two miles from the lake shore.

The New York Mail tells the following suggestive story for the edification of young ladies addicted to the free distribution of their pictures: "A short time ago a very strict young lady in society gave her photograph to a devoted admirer for his locket. Two days afterward her brother found it on the floor of a billiard saloon, decorated with a pair of mustaches and an immense eigan, artistically done with a pin."

The M. E. Sunday school convention convened at Franklin yesterday.

MENAGERIE AND CIRCUS.—Sheldenburger's great European Menagerie and Circus will give its first performance at this place to-morrow afternoon, and the second entertainment at seven o'clock in the evening. Mr. Sheldenburger is one of the most experienced showmen in this particular and popular branch of amusements in this country, and his name alone should be a guarantee that whatever he promises will be fulfilled, and that the public will find something well worth a visit. The immense Rhinoceros is a curiosity not to be found in any other traveling show in the world, and alone worth the price of admission.

The Forest Republican has the following in regard to a new well near Tionesta:

A well which has for some time been going down on Dale's Island, six miles up the river, owned by Judge Dale, Sheriff Davis, and two other parties, commenced pumping on Saturday, at the rate of 25 bbls per day, strict measure, and no prospect of a decrease. We congratulate our townsmen on their good luck, and hope they, and all others of our citizens who are after this slippery article may find sever at other good wells close by us. We are bound to be an oil town if it takes years.

CHANGE.—Mr. John Fairborn, long connected with the drug business of the oil region, has bought out the Pioneer Drug Store of A. J. Christel, at Pithole, and will hereafter conduct the business at that point. He has added largely to his stock and has now one of the most complete drug stores in Western Pennsylvania. Mr. F. is a fair and honorable dealer, and the citizens of Pithole should extend him a liberal patronage.

Something rich, rare and racy can be had at Lou. Voucher's Saloon, to-morrow it will show you how to feel rich; it is extraordinary rare, and exceedingly racy, and as good as a circus. Remember and call to-morrow.

The average weight of the human heart is 8 1/2 ounces. Its work in a day is equal to raising 124 tons one foot high.

A Chicago paper says of a contemporary that "it has doubled its circulation.—Another man takes a copy now."

The Mercer county Liquor Bill has been objected to the private calendars at Hamsburg on account of alleged unconstitutionality in its provisions.

Pittsburgh expects to have silver smelting furnaces next. Hitherto it has smelted coal smoke, chiefly.

The shooting of quails is forbidden by law for two years more. The killing of all insectivorous birds is permanently prohibited under penalty.

It is said that a number of large refineries are to be erected at Oil City this summer.

During the rebellion, the staff of General Wise were riding through a rather forlorn part of North Carolina, and a young Virginian of the staff concluded to have some fun at the expense of a long-legged specimen of the genus homo, who wore a very shabby grey uniform, and bestrode a worm fence at the roadside. Reining in his horse, he accosted him:

"How are you, North Carolina?"
"How are you, Virginia?" was the ready response.

The staff continued: "The blockade on turpentine makes you rather hard up, don't it? No sale for tar now, is there?"

"Well, yes,"—was the slow response.—
"We sell all our tar to Jeff Davis now."

"The thunder you do. What on earth does the President want with your tar?"
North Carolina answered: "He puts it on the heels of Virginians to make them stick to the battle field!"

The staff rode on.

NEW REFINERY.—Proposals for the stone work of the new refinery to be erected at Siverlyville, adjoining the City boundary, have been advertised. The capacity of the new refinery will be two thousand barrels of refined per day, equivalent to about 3,000 of crude oil. With the completion of this and the capacity of those already in operation, Oil City will be third in point of refining capacity, the other two points being Cleveland and Pittsburgh.—Oil City Register.

Ruloff will be hanged to-morrow, the Governor of New York having refused to interfere with the action of the courts.

Two children at Sharon were seriously poisoned the other day by eating pork root. Their lives were only saved by the most skillful medical aid.

Wm Barnerbee, who had been on trial at New Castle for the murder of Benj. Austin, was, on the 9th inst., convicted of murder in the second degree.

A bill prohibiting prize-fighting expeditions leaving this State has been introduced in Harrisburg, and will doubtless become a law.

The new suspension bridge over Oil creek, near Rouseville, which is to take the place of the one washed away by the late flood, is nearly completed.

Fasten a nail or key to a string and suspend it to your thumb and finger, and the nail will oscillate like a pendulum. Let some one place his open hand under the nail, and it will change to a circular motion. Then let a third person place his hand upon your shoulder, and the nail becomes in a moment stationary.

One of the most remarkable personal encounters on record occurred recently at Jefferson, Texas, resulting in the death of two notorious ruffians. One shot the other fatally through the body and then ran.—The dying man pursued, without heeding the hand of death upon him, or the eternity upon whose brink he reeled, and with his last agonies of exertion emptied his revolver at his enemy, inflicting wounds which proved instantly fatal, after which he himself instantly expired.
