What's in's name? A good deal. It is just as easy to give a thing a plassant name as alindicrous one. But the attempt to immortalize men by naming hotels after them has run the hotel basiness into the ground. Who would eat a meal, for instance, at the "Brandeth House" without imagining ev ery swallow of water washed down a purga tive pill? And we notice the new notel at Toledo is to be named in honor of a great railway king-Mr. Boody-but it will take a very elight change in proaunciation to make it the Booby House.

PITTSBURGH, Nov. 16th, 1871.

At a meeting of the Directors of the Wes teru Pennayivania Oil Company, beld this day at their office, the following resolutions were unanimously adopted :

Whereas, We have learned with deep regret of the death of EDWIN VAUGHN. late Superintendent of the Western Penneylvahis Off Company, thereby depriving they Company of a valuable servant, and the dred other buildings utterly destroyed.) community of an upright and bonorable citizen; therefore be it

Resolved, That, recognizing the interposition of Divine Providence, we drepty deplore the loss of one who for a long time has readered invaluable service to the Company.

Resolved, That we tender our boartfelt sympathies to the wile of the deceased in this her hour of trial.

THE BLYSDS BUS . IL FIELD -A new on field is about to be opened up in Blyson Run, near the Ciarion river, in Clarion county, about twenty miles above Petersburg, which has been located by Mr. A. James, of Pleasantville notoriety. Mr. James' persistent declarations that oil

existed in the upland districts of Pleasantville, were received with universal incredulity, until his persevering efforts demonstrated the fact to a series of successful strikes. These, at the time, were the theme of much comment and speculation by the New York Tribune, Times, and other journals. as to the remarkable powers he exhibited in locating oil wells as, also, the artesian well at Chicago.

Oil men were astonished, and eagerly sought to get control of territory as near to that which he located, as passible. It is to clew of these facts, and his history as a segacious and honorable man, that so many are now confidently expecting important resuits to flow from his present undertaking For the last year or so, Mr J. bas been liv ing at Fredouts, N. Y , in comparative seclusion, in order to invigorate a naturally del cate constitution, and to gain the needed report and relaxation from exciting scenes and pressing demands, which his connection with his oil operations at Pleasantville had imposed upon him. If has now commenceed his explorations in a new field, and one which he is confident promises richer products than any oil territory bitherto discov. ered in Pennsylvanis. Experienced oil men who have recently been over the ground confirm this opinion.

Mr. James and a few of his immediate friends have secured the control of about three thousand acres in the vicinity referred to, and have organized under the name of "Jame's Biyson Ru. Oil Co.," and Inversi opportunities are offered to those who are seeking investments is oil territory

It is understood that Commodore Vander b it contemplates the construction of a ratiroad, as soon as the interests and the opening up of the increasing business demand it. to run from Hidgeway down the Clarion riv er, and through the Blyson Run region, to intersect the Allegheny Valley at Parker's Landing. This will greatly facilitate every enterprise, and expedite the building up of towns and villages in the Ciarion valley .-Pitteburgh Commercia'.

The East Brady Independent says that a married man down there, whose wile was absent on a visit, had the impertinence to cell upon a young lady and make a proposition for ber to meet bim at a certain place H- had mistaken the character of the young lady, for when she met him at the designed spot she dashed a bucket of crude oil over his person, thereby spoiling his best dry goods and compelling him to beat hasty re-

treat.

The Chicago Tribune explodes the story that that city was built of stone heavily charged with petroleum. It says the only building in the city of any size built of the supposed oil stone was the Second Presbyterian church, and the wails of that building were not reduced to ashes, but stand conspicously erect among the ruins of a hun-

A curious experiment was tried in Russia with some murderers. They were placed, without knewing it, in four beds where four persons had died of cholers. They did not take the disease. They were then fold that they were to sleep in beds where some persons had died of malignant cholers, but the beds were, in fact, new and bad not been used at all. Never the less, three of them died of the disease within four hours.
