Dennis Blame went into the Petroleum Exchange, yesterday, and acted in a very disorderly manner. When requested to be quiet or go out he refused to do either, and professely informed Justice Reynolds, who happened in about that time, that no d-d effer in Petroleum Centre could arrest him Justice R. immediately collared the beiligerent Dennis sed marched him to the lockup, Dennis becoming exceedingly mild and lamb-like as soon as the "strong arm of the law" grasped bim. Shortly after information was made against him as being a commes vagrant, a commitment for thirty days was made out, and ere this be bas a piace to cover his head in the Franklin jell.

M. Weisnegg, the well known constructor of gas beating apparatus, has just established in the labora tories of the Normal Sahool and the School of Sarbonne a very successful petroleum furnace. In M. Menes Revue de Chimie" we find the description of this apparatus. A large clatera of wrought iron serves to contain the combustible oil. The cintern is connected by rubber tubes to the apparatus for distributing the oil and mounted on the furnace. This apparatus is composed of a pipe, from which several tubes branch out and are fitted with cocks, and of a grooved grate, along which the oil flows as it drops from the small tubes before mentioned. In the grate is placed a door which admits more or less air. The grate is vertical, and with four bars; the sir passing between each bar burns by its oxygen the petaoleum vaporized by the heat of the fire which is maintained. At the bottom of the grate is placed a receiver, where the oil which drops, and which is not burnt at first collects and is volatilized gradually by the heat of the fire, and burns atterwards To light this furnace, fire is put to straw or to paper, which burns flercely when soaked with the oil, and gradually heats the furnace sufficiently to volatilize the dropping liquid, so that at the end of a short time it is the gas or the vapor which burns. The flame is long and very intense. Iron, copper &c., can be lieated by it, and temperatures are reached difficult to obtain by coal sione. The turnace requires no blast, and specially adapted for use in the laboratory.

An American now traveling in England says the drinking babits of her people are enough to shock even the moderate drinker of the United States, and drive him, it anything can; to a telief in total abstinence .-At concert, in theatre, and in the railway carriage, it is no uncommon, but a very usual sight, to see the well dressed lady take a bottle of brandy or sherry from her pocket or her bag, and suck it quite unblushingly. It takes considerable brass and indifference to social degradation, for a man to dare to do that with us. Clergymen tipple, the noble and ignoble are equally addicted to drink, and beggars think more of a dram than a dinner.

The occasional explosions of coal oil lamps from attempts to extinguish them by blowing down the chimney give value to the following suggestion: Give a sharp but rather prolonged puff, at right angles with the top of the chimney The draft thus produced is said to draw the flame away from the wick, and the lamp goes out.

BY PHEBE CARY.

One sweetly solemn thought Comes to me o'er and o'er; I'm nearer my home te-day Than I ever have been before.

Nearer my Father's house, Where the many mansions be; Nearer the great white throne Nearer the crysial sea.

Nearer the bound of life, Where we lay our burdens down, Nearer leaving the cross, Nearer gaining the crown.

But the waves of that silent sea Roll dark before my sight, That brightly on the other side Break on a shore of light.

O, if my mortal feet Have almost gained the brink, If it be I am nearer bome Even to-day than I think.

Sr. Perenspung. -St. Petersburg is altuated about two miles and a haif back over the bill from Foxburg, and is a town of per. haps a hundred houses, the population floating and regular, is estimated at about four thousand. Six months ago scarcely any one outside of Clarion county ever beard of this place. To-day, however, it is different, and the one principal topic that men discuss now is St. Petersburg. On the way over to the town, yesterday, I counted over one hundred new wells, some not quite into the third sand, others just testing, and some tested and new producing. The average depth of the wells here is 1,000 feet, and the cost to put them down is \$6,000 .-The average yield of each is perhaps fifty barrels duity, and with oil at \$4 per barrel the income is no small matter. The parties who own these oil farms get a royalty like this, they will lease to a party a portion of the farm, say twenty acres, for a consideration of one or two, or perhaps three thousand dollars, and also receive a royalty. If the well produces less than twenty barrels, only one-eighth royalty is claimed, and it the yield is more than this, from one-sixth to one fourth is given, according to the

terms of the lease -[Erie Dispatch. In one of the Western States there resided a family consisting of an old man by the name of Beaver and his three sons, all of whom were very wicked. On bis arrival he found the young man very penitent, and anxious to be prayed with -The minister kneeled down and prayed in this wise: "O, Lord, we thank thee for the rattlesnakes; we thank thee because the rattlesnake has bitten him. We pray thee send a rattlesnake to bite John, send one to bite Bill, and O Lord, send the biggest kind of a rattiesnake to bite the old man, for nothing but rattlesnakes will ever bring the Beaver family to repentance."
