of Petersburg is expected to be finished this week or the beginnig of next, which will decide for or against a large amount of territory.

Well on the Peter King farm, is said to be doing about 6 barrels per day.

The present appearances indicate that the amount of operating for oil in the Ritchey run and Petersburg districts during the coming season will far exceed that of the past, and should the wells now in process of completion prove remunerative we expect to see a continuous line of wells extending from East Sandy known as Gas City, or we might say from several miles S. W. of Martinsburgh to the northers terminus of the East Study oil field. Bigs are now up and several wells commenced drilling at different points between Petersburg and Salem and one or two wells east of that place.- [Emlenton Sun.
