The Pittsburgh Commercial of yesterday publishes a statements of what those nob men, Warden, Frew & Co., Waring, King & Co., Logan Bros. & Co., Standard Oil Co., and J A. Bostwick & Co., better known a the South Improvement Company, would have done had the oil producers only allowed them to steal \$5,000,000 per annum from their pockets. Through a So. Imp. pair of spectacles the picture presented is splendif ferous and beautiful to gaze upon. As seen by the producers it was nothing but rank corruption, dry bones, &c. The advantages set forth by the plunderers, bad the dear prople of the oil region only have submitted to the little scheme of robbery, would have been, according to these bonest thieves

let. To save a large number of refiner from immense loss, and in some cases utter ruin, and to pay them a fair manufacturer's

2d. To give the producer a good price fo his crude-equal at all points.

3d. To pay the railreads a fair freight. 4th. To furnish a good, reliable, sais oil

for our home consumers. 5th. To bring into this country from six millions to eight millions dollars additional

money per annum from Europe. The oil men having countered on the thieves and won the game, the pittal whining of the beast is truly agonizing.

Now that the gigantic swindle is dead. the Pittsburgh Commercial is exceedingly careful to publish their report as au advertisement. When they had the oil reen by the threat, the Commercial was supremely indifferent to the situation, and nad not one word of sympathy for the producers. The oil men will not forget the course of the Pittsburgh press in this matter.

To let the people know be is affec and enable them to find out the best place in town to get a square meal, "Cort" Dodge has recently put up an elegant sign in front of the Petroleum Exenange Hotel. It is a beauty, and no mietake. Everybody coincides in saying that no better meal is set up is the oil region than at the Exchange.

The bridge builders of the Warren & Vesango Railroad arei en in towa yest rday.

A correspondent of the Erie Dispatch writes as follows from Foxburg:

Now that fine weather has opened upon us, and the ice in the river has broken up. making navigation unobstructed, business has commenced to look up a little. The ast two months have been very dull ones for people in the oil country. There is now in the Parker and Petersburg districts at least one hundred thousand barrels of oil in the Pipe Company's hands, and in tanks at the wells, and the daily production for this district alone is over 4,700 barrels, while that of the whole Oil Regions is but 17,000. Oil, however, is now on the move. The first shipment on the river was from this place last week (Thursday,) The steamer James Jackson, with two barges in tow, took 3,600 barrels, destined for Pittsburgh, and to-day I noticed several more barge loading from the Mutual Pipe Line Company's tanks. The railroad people, since this shipment by river, have began to recover themselves and are finding tank care which were shoved off upon side tracks which, estensibly they knew not of, and now oil trains have recommenced running, and are helping to take away this large amount of surplus oil, and will consequently relieve operators who have been collede for the pest two weeks to pump into the Allegheny and Charlon rivers. In consequence of this move, business bas commenced to look up and better times may soon be expected, as the sale of this oil will help greatly in plac. ing "fitby luce" again in circulation.

CHAUTAUOVA LAKE. - Tourists to this pleasant resort will be glad to learn that Capt. Grandin's nest little steamer, the "Jamestown," has been thoroughly refitted and refursished from stem to stern, and in a style that will make it equally desirable to passengers and tourists. The steamer will make trips between Jamestown and Mayville, as well as attending to the wants of exeursion parties.

Meadville boasts an Anti-Corset Associa tion. It is composed of young men, on account, we presume, of the extraordinary facilities enjoyed by that class for the discovery of cases of tight lacing. If the As. sociation offer the girls arms in place of corects, it may succeed in relieving a few cases of suffering, besides pleasing Dr. Dio Lewis. We wish it success.

INJUNCTION GRANTED. -- Most of our read ers are undoubtedly familiar with the case of the Petroleum Centre Railsond vs. the Warren & Venango Railroad. The cas came up last week before a full bench a Philadelphia, and a decision was rendered on Saturday granting the preliminary injunction as demanded in the complaint of the plaintiffs.

One Sutley, (who as his name indicates is probably composed of equal parts of sut and ley) of Cherrytree Village, a simple-minded country "buckwheat," who ought to know better but yet is not to blame for what he don't know, takes us to tack through the columns of the Venango Spectator, edited and published at Franklin by our friend Johnoy Whittaker, for an alleged misrepresentation of facts in regard to the Mulien robbery, as reported by us a few days since. The report was given just as our in-formant, a Cherrytree man, stated it — Subsequently we learned the robbery took place at Dempseytows, which made but little difference as that place is in Cherrytree township. The authorities always provide an asylum for idiots, lunation and addlepated fools, and we would suggest that they immediately remove this strange admixture of matter from Oberrytree, before the winds of heaven scatter it broadcast over the earth as a poor quality of a fertilizer. Sut will not even raise a second quality of buckwheat.

The Right of Keeping Out

Mr. Samuel M. Quincy, a Massachusett egislator, has presented an aspect of the 'rights of women' which will command attention for its povelty of statement, whatever may be thought of its justice. He beld that he was a truer friend of the rights of woman than these who would impose upon ber the responsibility of suffrage, and said:

engaging in every occupation of private life of which she can show herself capable. For this thing will soon regulate itself. It she is not a good doctor she will get no patients. if she is not a good lawyer she will not get clients, if she can't drive a horse car the companies will not employ her; while the success of any exceptional woman in either of these lines will not compel any other to follow in their footsteps. But of women's rights, I consider the most precious and inallegable, and the last to be taken from any woman against ber will, is the right not to vote; the right to stand spart from the contest, and unshaken by its excitement and its passions, to assist the man to hold fast to Never was a truer sentence written than honor and to truth. I have endeavored to this-supposed to be wrung from the Archshow that, by conferring upon all women the fiend in his impotence and agony. Every right to vote, because some few desire it, you take from tens of theusands their right not to vote, and drag them, against plea and remonstrance, into the mire of the politi.

A lady of New York, of French parentage brig .t, witty, and good, became the wife of a gentleman whose business called him every summer to Paris. In his youth his pace had been rapid, and the lady's relatives gave many shakes of the bead when talking of the marriage. He told her very plainly that he had been of naughty habits. but promised to be proper. And he made a very good husband. On each return from Paris he brought her some nice little press ent-sometimes a bouquet, sometimes a dozen of Alexandre's, sometimes a dress .-But this, bis eighth return, be surprised ber by placing in her bands a magnificent lace shawl, the cost of which could not have been less than \$700 or 800. Well might her bright eyes sparkle, as they did, over the exquisite gossamer-like gift. Putting an arm tenderly around his neck, and giving bim a soft, sweet kiss, she said: "Ab, what a good, kind husband you are, to bring me such a nice present; but, Charley. dear," (with a roguish smile,) "bow bad you must have been in Paris this last time?" She knew him.

The Pittsburgh Post objects to the passage of the bill, now before the Legislature, granting to Colonel Drake the sum of \$10 .-000 from the State Treasury in recognition of the benefits of his discovery of oil wells in Pennsylvania has conferred upon the State, While the Post admits the justice of relief for Colonel Drake in some way it decidedty opposes setting such a bad example as rewarding public benefactors at the expense of the tax payers. And in this it takes a sensible stand. The oil region itself should see that Colonel Drake does not suffer for want of money, for the men who have besome oil princes are only so through his dis' covery. They have reaped the benefits of Colonel Drake's labors and they should see that he and his are left high and dry above penury and want for their lifetime

TWENTY DOLLARS WORTH OF CHARITY. It is terrible to think of the agonies of a women of cultivation and refinement when suffering under an attack of that dread discase, kleptomania. An instance of heart rending intensity took place the other day in Boston. An elegantly dressed woman was detected in the very act of plagiarizing a pair of slik etockings. She started turn I believe in affording her every facility for ing pale and burst into tears, suddenly conscloue of her guilt, and then in the most agonized manner becought the proprietor to release her and offered him a twenty dollar note for the stockings. The gentleman kindly reasoned with the afflicted woman and then, taking the price of the stockings, returned her the change from the twenty dollar note. The poor woman then disappeared and was beard of no more, although her bank note was, as if was proved, a well

victim of nervous debility, or of that depressing languer which is one of the secom paniments of dyspepels and billiousness can testify to the misery of mind and body, which they involve. The motive power of the system is partially paralyzed; the mind is hanned by anxiety and lear, and the sufferer is as incapable of applying bimself energetically to any kind of because as if he were under the benumbing influence of catalepsy. This terrible mental and physical condition need not, however, he endured for forty eight hours by any human being. Plantation Bitters is an absolute specific for all the torments which a deranged stemach, a disored flever, and shattered nerves, superinduce. paniments of dyspepsis and billiousness

These is a mystery about the effect of the weather on plety. Sabbath beat seems botter, Sabbath cold colder, and Sabhath rain wetter than that of any other day; for the same measure of beat, or cold, or rain, on a week-day, will not keep one from his usual business. We need a Sabbath almanac. calculated for our churches, that will show by its weather scale when it will be safe for a vigorous Christian to expose himself on the Sabbath by going to the house of God. Such an almanao would enable pastors and superintendents of Sabbath schools to know whom they could depend en in church, Sabbath school and prayer meeting. Writes some one: "I have recently been examining microscopic views of the different snow-flakes; a hundred or so o them, and I would suggest to our curious savans on examination of Sabbath snow, to see if has a reculiarly sharp and injurious

Another Valuable Invention.

CATE'S BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which en-OII. WELLS, patented August 15, 1971, which en-tirely prevents the ingress of air in oil wells, while the tubing is being drawn. It is a well known fact to oil operators, that upon wells where Gas Pumps are used it is necessary to preserve as nearly a per-fect vacuum as possible, and that no air should be let into the well, at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn fr m a well it is the cause of great injury to it, as the staffing box, being then necessarily opened, the air immediately rushes back between the ed, the air immediately rushes back between the tubing and casing, into the well going into the oil nd gas veins, and cor sequently causing the oil and gas to rush back to a great distance. So much so, that it shmost always takes several days sack to its former condition, and offentimes it takes ral weeks; and quite frequently wells have be ost completely ruined by the air being thus let The BACK-SUCTION PREVENTOR is attache

to the staffing box and works in such a way that it mpletely shuts up the space between the stuff on and tabing so effectually that not a particle of sir can get through at any time while the tubing is being drawn and replaced. It supplies a want long felt, and is, without question; or nable inventions of the day, to those engaged in the ten times saves ten times i.s cost by once usin
