In Dresden they have an American club. It is a very agreeable place wherein to pass an hour or two in the morning.

It is stated that when sick persons in Metz have no hopes of recovery, they cause themselves to be conveyed across the frontier, in order to die on French soil.

Wood's Household Magazine, under the editorial management of Gail Hamilton, has more than doubled its subscription list during the past four months. The May number contains: "Migration, Colonization, Home," by Horace Greeley; "Miss Hannah Adams," by James Parton; "Homesold Discoveries," by Gail Hamilton; "Brother Andersen," by Thomas K. Beecher, "Longevity," by Dr. Dio Lewis; "Reminiscences of Rev. Dr. Bethune," by A. A. Willis, D. D., etc. Every woman should read Gail Hamilton's editorial, in which she says: "It will never do to trust men with a liberty which they will abuse. The best of them, men who may be respectable and even distinguished as jurists, doctors, merchants, mechanics, are, in domestic matters, but children of a larger growth. They must be trained. They may be allowed liberty, but they must not be allowed to take it without permission."

The Household is a first-class original Magazine, published at one dollar a year, by S. S. Wood & Co., Newburgh, N. Y. A specimen copy mailed free to any address.

The price of diamonds continues to decline in London, owing to the Cape supply. You can buy one as big as a goose egg, or the "Australian" variety for five dollars, or less.

There are fifty women employed in the manufacture of leather nets for horses at Bridwell Chicago, for whose services the contractor pays 16 1/4 cents per day.

A New York reporter mournfully speaks of having "some of the loveliest earrings in the dirtiest ears imaginable at the Faust Matinee."

The rafting season is about over, and times are easing up. About one half of the lumber in the creek was run out, and our lumbermen rejoice. For the last three days very little lumber has been run past here, out some timber rafts are still going. There is danger of sticking on Pithole Raffle now.—[Forest Republican.

A western editor says of a hail storm on the lakes in his vicinity, that it came so sudden that the pilot looked round to see which of the passengers were throwing stones at him.

Grove & Wolcott's well at White Oak was down 275 feet on Saturday and the work going on as rapidly as possible. They are confident of success, and have out best wishes for that "consummation devoutly to be wished."—Forest Republican.

Sailors are getting \$2 per day at present, from the port of Erie, but captains consider the rate will soon come down.

A colored woman, probably the largest and heaviest person of her sex in the world, died in St. Louis a few days ago, at the age of fifty-one years. She weighed between nine hundred and one thousand pounds. Her dimensions were five feet ten inches in height, twenty-eight inches across the shoulders and thirty-seven inches across the hips. Her arms were thirty inches in circumference. When she had been arrayed in burial vestments, it was found impossible for seven men to lift her. Finally the box was tilted on one side, and she was rolled in while the priest chanted the service of the dead. She was then placed in a large wagon, which proceeded slowly to the cemetery. The wagon was backed up to the grave and eight men and six rollers combined their exertions to lower her into her narrow bed.

### GATES' BACK SUCTION PREVENTOR.

THURSDAY, Feb. 3, 1872. Messrs. ANDREWS & Co.—GENTLEMEN:—Having used one of your GATES' BACK SUCTION PREVENTORS, I can confidently recommend the same to all who have occasion to use the same, as the best Preventor of Back Suction on Oil Wells. Our well was so small that it barely paid to run it. After putting on one of your GATES' BACK SUCTION PREVENTORS the production was increased to a good paying well. Before we put the Back Suction Preventor on the well, we had to pump the well two weeks before we could restore it to its former production after drawing tubing. This is entirely obviated by the use of the Preventor. HARRY PENNING & Co.

THURSDAY, Jan. 24, 1872. Messrs. ANDREWS & Co.—GENTLEMEN:—Having used one of your GATES' BACK SUCTION PREVENTORS, we consider them one of the most useful inventions ever made for oil wells, and we think we are capable of judging of them, having tried one on our wells. We can now draw tubing, and when they are replaced the wells produce the same as before drawing, thus showing that the Preventor essentially prevents all ingress of air. Yours, &c. BACON & BIGNER.

THURSDAY, Feb. 9, 1872.—Law 3m. Messrs. ANDREWS & Co.—GENTLEMEN:—This is a very useful invention, and I have used one of your GATES' BACK SUCTION PREVENTORS, on the Lee & Hill Island Lease Economy Hill, and would not do without it any more, as it will do all that I need more than it is recommended to do, and I can cheerfully recommend it to all Oil Operators who have any Back Suction Wells. Yours, &c. JOHN MYERS.
