A Washington dispatch says: The subcommittee of the House Committee on Commerce have agreed to report that the S outh Improvement Company was one of the most gigantic and dangerous conspiracies ever attempted and that if it had not been checked in time by the people of the Oil Regions and by Congressional investigation it would have resulted in the absorption and arbitrary control of trade in all the great interests of the country.

diate Congressional action has yet been indicated, but the ultimate result will certainly be something in the shape of substantial relief and a complete saleguard against any repetition of the South Improvement Company or similar swindles.

Pages of the Life of P. T. Barnum written by himself-bringing his history down to March, 1872. Probably no other man in the entire country stands more prominently before the public than Barnum, or whose life will be read with greater interest than his, forming as it does a review of the lead. ing humorous and other incidents in the history of the great showman, whose strug/ gles and triumphs sound when read over more like a wonderful romance than reality. The pages before us are a synopsis of the bistory of the formation of Bernum's Monster Museum, Menagerie and Hippodrome. the largest traveling show ever organized, and which he promises to bring to this region during the present season. Had we the space we would give our readers these last pages entire, but must content ourselves with only a brief notice of the work.
