CATE'S BACK-SUCTION PREVENTOR FOR  
 OIL WELLS, patented August 15, 1871, which en-  
 tirely prevents the ingress of air in oil wells, while  
 the tubing is being drawn. It is a well known fact  
 to oil operators, that upon wells where Gas Pumps  
 are used it is necessary to preserve as nearly a per-  
 fect vacuum as possible, and that no air should be  
 let into the well, at any time, when it can possibly  
 be avoided; consequently, whenever the tubing is  
 drawn fr in a well it is the cause of great injury to  
 it, as the stuffing box, being then necessarily open-  
 ed, the air immediately rushes back between the  
 tubing and casing, into the well going into the oil  
 rock and gas veins, and consequently causing the  
 oil and gas to rush back to a great distance. So  
 much so, that it almost always takes several days  
 after pumping is resumed for a well to be brought  
 back to its former condition, and oftentimes it takes  
 several weeks; and quite frequently wells have been  
 almost completely ruined by the air being thus let  
 in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached  
 to the stuffing box and works in such a way that it  
 completely shuts up the space between the stuffing  
 box and tubing so effectively that not a particle of  
 air can get through at any time while the tubing is  
 being drawn and replaced. It supplies a want long  
 felt, and is, without question, one of the most val-  
 uable inventions of the day, to those engaged in the  
 oil business. No well should be without it, as it of-  
 ten times saves ten times its cost by once using.  
 It is manufactured at the FOUNDRY AND  
 MACHINE SHOP of ANDREWS & CO., TIDI-  
 OUNTE, PA., and for sale by Hardware Dealers.  
 Tidouite, Pa., March 28, 1872.—Law 3m.
