**Another Valuable Invention.**

CATE'S BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which entirely prevents the ingress of air in oil wells, while the tubing is being drawn. It is a well known fact to oil operators, that upon wells where Gas Pumps are used it is necessary to preserve as nearly a perfect vacuum as possible, and that no air should be let into the well, at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn from a well it is the cause of great injury to it, as the stuffing box, being then necessarily opened, the air immediately rushes back between the tubing and casing, into the well going into the oil rock and gas veins, and consequently causing the oil and gas to rush back to a great distance. So much so, that it almost always takes several days after pumping is resumed for a well to be brought back to its former condition, and oftentimes it takes several weeks; and quite frequently wells have been almost completely ruined by the air being thus let in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectually that not a particle of air can get through at any time while the tubing is being drawn and replaced. It supplies a want long felt, and is, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be without it, as it often times saves ten times its cost by once using.

It is manufactured at the FOENDRY AND MACHINE SHOP of ANDREWS & CO., TIDEL-OUTPE, PA., and for sale by Hardware Dealers.

Tidoutpe, Pa., March 28, 1872.—law 3m.

**FOR SALE**  
**CHEAP.**

**Second-Hand Oil Well** supplies. 10,000 ft 2 in. TUBING, 10,000 ft 5 $\frac{1}{2}$  and 3 $\frac{1}{2}$  inch CASING, 5,000 ft SMALL PIPE, 5,000 ft SUCKER RODS, 9 inch, 7 inch and 6 inch DRIVING PIPE, FITTINGS at one-half price of New.
