BOOTS SENT C. O. D. to any place in the Oil  
Region. ap10-12m. J. A. PLANTE, OIL CITY, PA.

A lot of old papers for sale at this  
office.

**Another Valuable Inven-  
tion.**  
CATER BACK-SUCKER PREVENTOR FOR  
OIL WELLS, patented August 15, 1911, which  
entirely prevents the ingress of air in all wells, while  
the tubing is being down. Has a well known fast  
and operation, that upon wells where the Pump-  
jack is used it is necessary to prevent as nearly a per-  
fect vacuum as possible, and that this should be  
done into the well, at any time, when it can possibly  
be avoided; consequently, whenever the tubing is  
down for in a well it is the cause of great injury to  
it, as the sucker bar, being then necessarily opened,  
the air immediately rushes back between the  
pump and casing, into the well going into the oil  
rock and casing, and consequently causing the  
oil to be forced back to a great distance. So  
much so, that frequently always takes several days  
before the well is ready for a well to be brought  
back to its former condition, and sometimes takes  
several weeks, and quite frequently wells have been  
shut down for a long time by the air being times let  
into the casing during the  
The BACK-SUCKER PREVENTOR is attached  
to the pump and works in such a way that it  
prevents the air from entering the casing, and  
keeps the casing so effectively that not a particle of  
air can get through at any time while the tubing is  
being down and replaced. It applies a seal long  
and far, without question, one of the most val-  
uable inventions of the day, to those engaged in the  
oil business. No well should be without it, as it of-  
ten times saves ten times its cost by one dollar.  
It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDI-  
CUTE, PA., and for sale by Hardware Dealers.  
Tidicut, Pa., March 21, 1912—Law 2m.

**JAMES' BACK-SUCKER PRE-  
VENTOR.**  
Patented Feb. 2, 1912.  
Messrs. Andrews & Co.—Gentlemen:—Having  
made one of your BACK-SUCKER PREVENTORS  
and used it on my well, I can confidently recom-  
mend it to all who have occasion to put down the sucker  
bar in a well. It is a most valuable invention,  
and one that should be used on every well. It  
prevents the air from entering the casing, and  
keeps the casing so effectively that not a particle  
of air can get through at any time while the  
tubing is being down and replaced. It applies a  
seal long and far, without question, one of the  
most valuable inventions of the day, to those  
engaged in the oil business. No well should be  
without it, as it often times saves ten times its  
cost by one dollar. It is manufactured at the  
FOUNDRY AND MACHINE SHOP OF ANDREWS &  
CO., TIDICUTE, PA., and for sale by Hardware  
Dealers. Tidicut, Pa., March 21, 1912—Law 2m.
