## Another Valuable Invention.

**GATES' BACK SUCTION PREVENTOR FOR**  
OIL WELLS, patented August 17, 1871, which  
prevents the escape of oil and gas, while  
the tubing is being down. It is a well known fact  
that upon wells where Gas Pump  
is used it is necessary to provide a per-  
fect vacuum, and that an air should be  
let into the well at any time when it can possibly  
be avoided, consequently, whenever the tubing is  
drawn in, or a well it is the cause of great injury to  
the well, the drilling bar being then necessarily opened,  
the air immediately rushes back between the  
tubing and casing, into the well going into the oil  
and gas veins, and consequently causing the  
oil and gas to rush back to a great extent. No  
matter how it almost always takes several days  
before pumping is resumed, and it will be brought  
back to its former condition, and sometimes it takes  
several weeks; and quite frequently wells have been  
almost completely ruined by the air being thus let  
into the well during the drilling.

**GATES' BACK SUCTION PREVENTOR** is attached to  
the drilling bar and works in such a way that it  
completely fills the space between the tubing  
and casing, and in such a way that no particle  
of air can get through at any time when the tubing is  
being drawn and lowered. It supplies a want long  
felt and is, without question, one of the most val-  
uable inventions of the day, to those engaged in the  
oil business. No well should be without it, as it  
will save the cost of the tubing and the cost of the  
oil and gas which is lost by the air being  
let into the well.  
It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDE-  
WATER ST., and for sale by Hardware Dealers.  
Tillamook, Pa., March 28, 1872—no 10m.

## GATES' BACK SUCTION PREVENTOR.

My name, Andrews & Co., is on the  
inside of the GATES' BACK SUCTION PREVENTOR,  
and I can testify to the value of the same to all  
who have occasion to use the same. The  
Back Suction Preventor is a well known  
fact, and it is a well known fact that it  
will save the cost of the tubing and the  
cost of the oil and gas which is lost by  
the air being let into the well.  
It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDE-
