Another Valuable Invention.

GATES' BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which entirely prevents the burning of air in all wells, while the tubing is being drawn. It is a well known fact to oil operators, that upon wells where Gas Pumps are used it is necessary to preserve as nearly a perfect vacuum as possible, and that no air should be let into the well, at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn in a well it is the cause of great injury to it, as the stuffing box, being then necessarily opened, the air immediately rushes back between the tubing and casing, into the well going into the oil rock and gas veins, and consequently causes the oil and gas to rush back to a great distance. So much so, that it almost always takes several days after pumping is resumed for a well to be brought back to its former condition, and oftentimes it takes several weeks and quite frequently wells have been almost completely ruined by the air being thus let in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectually that such portion of the air cannot through at any time while the tubing is being drawn and replaced. It supplies a want long felt, and is, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be without it, as it often times saves ten times its cost in one night.

It is manufactured at the FOUNDRY AND MACHINE SHOP of ANDREWS & CO., TIDIOUTE, PA., and for sale by the Evans Dealers.

Tidioute, Pa., March 23, 1872.—4aw 6m.

GATES' BACK SUCTION PREVENTOR.

Tidioute, Feb. 2, 1872.

Messrs. Andrews & Co.—GENTLEMEN—Having had one of GATES' BACK SUCTION PREVENTORS, I am entirely willing to recommend the same to all who are in need of such an article. It is the best invention of back pressure on oil wells. Our well was owned first 3 months by Gates. Our well was owned first 3 months by Gates. After purchasing one of GATES' BACK SUCTION PREVENTORS, the production was increased one good barrel per day. Before we had the Back Suction Preventor the well would not keep the tubing free from sand, but after putting in the Preventor the well would keep the tubing free from sand, and we have not had to pull the tubing out since. Only as we are compelled by law to do.

Yours respectfully,
HARRY TURNER & Co.

Tidioute, Jan 31, 1872.

Messrs. Andrews & Co.—Having thoroughly tested the merits of GATES' BACK SUCTION PREVENTOR, we consider it one of the most useful inventions for pumping oil wells, and we think we are entitled to a part of them, having purchased the right to use it for one year, and after having tested the same we have concluded to purchase the right to use it for the remainder of the time. We have found that the Preventor does away entirely with the necessity of pulling tubing to prevent oil from running off.

Yours respectfully,
BACON & RIDDLE.

Messrs. Andrews & Co.—GENTS—This is to certify that I have used one of GATES' BACK SUCTION PREVENTORS, on the Lee & Hill farm, Lower Economite Hill, and would not do without it at any price, as it will do all and more than it is recommended to do. I can cheerfully recommend it to all Oil Operators who have any flush production. Yours, &c.,
JOHN MYERS.
