Another Valuable Inven-

CATE'S BACK SUCTION PREVENTOR FOR
OFF WELLS, patented August 15, 1871, which en-
 tirely prevents the ingress of air in oil wells, while
 the tubing is being down. It is a well known fact
 to all operators that upon wells where Gas Pumps
 are used it is necessary to preserve as nearly a per-
 feet vacuum as possible, and that no air should be
 let into the well, at any time, when it can possibly
 be avoided; consequently, whenever the tubing is
 drawn in a well it is the cause of great injury to
 it, as the stuffing box, being then necessarily open,
 the air immediately rushes back between the
 tubing and casing, into the well going into the oil
 and gas veins, and consequently causes the oil
 and gas to rush back to a great distance. So
 much so, that it almost always takes several days
 or pumping is resumed for a well to be brought
 back to its former condition, and oftentimes it takes
 several weeks; and if this frequently wells have been
 almost completely ruined by the air being thus let
 in while drawing tubing.

The BACK SUCTION PREVENTOR is attached to
 the stuffing box and works in such a way that it
 completely shuts up the space between the stuffing
 box and tubing so effectively that not a particle of
 air can get through at any time while the tubing is
 being drawn and replaced. It supplies a want long
 felt, and is, without question, one of the most val-
 uable inventions of the day, to those engaged in the
 oil business. No well should be without it, as it of-
 ten times saves ten times its cost by once using.
 It is manufactured at the **FOUNDRY AND**
MACHINE SHOP OF ANDREWS & CO., TIDI-
CRITE, PA., and for sale by Hardware Dealers.
 Tidioite, Pa., March 28, 1872.—Law 3m.

GATES' BACK SUCTION PRE-
VENTOR.

THIS PATENT, Feb. 3, 1872.
Messrs. Andrews & Co.—TIDICRIT, PA.—Having
 tested one of GATES' BACK SUCTION PRE-
 VENTORS, I can confidently recommend the same to all
 who have occasion to use the same, as the best Pre-
 ventor of back suction on Oil Wells. Our well was
 so small that it barely paid to run it. After put-
 ting one of GATES' BACK SUCTION PRE-
 VENTORS the production was increased to a good
 extent. I have used the back suction Pre-
 ventor on the well, and have had to pump the
 well two weeks to bring the well to its former
 production after running a tubing. This is en-
 tirely prevented by the use of the Preventor.
DAVEY, FRANKS & CO.,

Messrs. Andrews & Co.—TIDICRIT, PA.—This is
 a notice that I have used one of GATES' BACK SUCTION
 PREVENTORS, and would not do without it
 under any circumstances. It will do all and more than it
 is recommended to do. I can confidently recom-
 mend it to all Oil Operators who have any Back Suc-
 tion Wells.
Yours, &c.,
