CATE'S BACK SUCTION PREVENTOR FOR
OIL WELLS, patented August 15, 1871, which en-
tirely prevents the ingress of air in oil wells, while
the tubing is being drawn. It is a well known fact
to all operators, that upon wells where Gas Pumps
are used it is necessary to preserve as nearly a per-
fect vacuum as possible, and that no air should be
let into the well, at any time, when it can possibly
be avoided; consequently, whenever the tubing is
drawn from a well it is the cause of great injury to
it, as the stuffing box, being then necessarily open-
ed, the air immediately rushes back between the
tubing and casing, into the well going into the
rock and gas veins, and consequently causing the
oil and gas to rush back to a great distance. So
much so, that it almost always takes several days
to get pumping is resumed for a well to be brought
back to its former condition, and oftentimes it takes
several weeks; and quite frequently wells have been
almost completely ruined by the air being thus let
in while drawing tubing.
The BACK SUCTION PREVENTOR is attached to
the stuffing box and works in such a way that it
completely shuts up the space between the stuffing
box and tubing so effectively that not a particle of
air can get through at any time while the tubing is
being drawn and replaced. It supplies a want long
felt, and is, without question, one of the most val-
uable inventions of the day, to those engaged in the
oil business. No well should be without it, as it oc-
curs this saves ten times its cost by once using.
It is manufactured at the FOUNDRY AND
MACHINE SHOP OF ANDREWS & CO., TIDI-
CREEK, PA., and for sale by Hardware Dealers.
Tidicreek, Pa. March 29, 1872—law 3m.

GATES' BACK SUCTION PRE- VENTOR.

Messrs. ANDREWS & CO.—GENTLEMEN—Having
used one of CATE'S BACK SUCTION PREVEN-
TORS, I can confidently recommend the same to all
who have occasion to use the same, as the best Pre-
ventor of Back Suction on Oil Wells. Our well was
so small that it hardly paid to run it. After put-
ting one of CATE'S BACK SUCTION PRE-
VENTORS in the production well increased to a good
paying well. Before we put the back suction pre-
ventor on the well, we inevitably had to stop the
well two weeks before we could restore it to its for-
mer production after drawing tubing. This is en-
tirely obviated by the use of the Preventor.
HART, PARKERS & Co.

This unit, Jan 24, 1872.
Messrs. ANDREWS & CO.—GENTLEMEN—Having
thoroughly tested the utility of CATE'S BACK SUCTION
PREVENTOR, we consider them one of the most
valuable inventions ever made for oil wells, and we
think we are entitled to one of them. Having
three on our well, we can now draw them, and
when they are replaced the wells produce the same
amount as before, thus saving for each Preventor
efficiently prevents all ingress of air.
Yours, &c. JOHN MYERS.

Messrs. ANDREWS & CO.—GENTLEMEN—This is to
certify that I have used one of CATE'S BACK SUCTION
PREVENTORS, on the Lee & Hill field
Lesse Economy Hill, and would not do without it
at any price, as it will do all and more than it is
recommended to do. I can cheerfully recom-
mend it to all Oil Operators who have any Back Suc-
tion Wells.
Yours, &c. JOHN MYERS.
