CATER BACK-SUCTION PREVENTOR FOR
OIL WELLS, patented August 15, 1871, which en-
tirely prevents the ingress of air into wells, while
the tubing is being down. It is a well known fact
that in oil operations, that upon wells where Gas Pump-
ers are used it is necessary to pressure nearly a per-
cent vacuum is possible, and that no air should be
let into the well at any time, when it can possibly
be avoided. It is common practice, whenever the tubing is
drawn in to a well that the cause of great injury to
the oil is immediately, the tubing is necessarily open-
ed, the air immediately rushes back into the well
and casing into the well going into the oil
and gas veins, and consequently causes the
oil and gas to rush back to a great distance. So
much so, that it almost always takes several days
after pumping is resumed for a well to be brought
back to its former condition, and sometimes it takes
several weeks; and quite frequently wells have been
almost completely ruined by the air being thus let
into the well during the tubing.

The BACK-SUCTION PREVENTOR is attached to
the stuffing box and works in such a way that it
completely shuts up the space between the stuffing
box and tubing so effectively that not a particle of
air can get through at any time when the tubing is
being down and replaced. It is supplied with long
legs, and is, without question, one of the most val-
uable inventions of the day, to the extent of in the
oil business. No well should be without it, as it oc-
casionally saves ten times its cost by once using.

It is manufactured at the FOUNDRY AND
MACHINE SHOP OF ANDREWS & CO., TIDI-
NGTOWN, PA., and for sale by Hardware Dealers.

Tidings, Pa. March 25 1872—Law 3m.

GATES' BACK SUCTION PRE-
VENTOR.

Widened Feb 24 1872.

Messrs. Andrews & Co.—Gentlemen—Having
had a long experience in the use of GATES' BACK SUCTION PRE-
VENTOR, I can confidently recommend the same to all
who have occasion to use the same, and who are in the
business of back suction on Oil Wells. Our well was
run in on the 1st of Feb. 1872, and after we
had run in our GATES' BACK SUCTION PRE-
VENTOR the well was immediately put in a
running well. Leave we put the Back Suction Pre-
ventor on the well, and it is a fact that it has
not only prevented the well from being ruined, but
it has also prevented the well from being ruined
by the air being let into the well during the
tubing.

HART, PARKINS & CO.

Tidings, Pa. Feb 9, 1872—Law 3m.

Messrs. Andrews & Co.—Gentlemen—This is a
very valuable and useful invention, and it is
recommended to all who are in the business
of back suction on Oil Wells. It is a fact that
it has not only prevented the well from being
ruined, but it has also prevented the well from
being ruined by the air being let into the well
during the tubing.
