**GATES' BACK Suction PREVENTOR FOR**  
OIL WELLS, patented August 15, 1871, which en-  
tirely prevents the ingress of air in all wells, while  
the tubing is being drawn. It is a well known fact  
to all operators, that upon wells where the pumps  
are used it is necessary to procure as nearly a per-  
fect vacuum as possible, and that no air should be  
let into the well, at any time, when it can possibly  
be avoided; consequently, whenever the tubings  
drawn from a well it is the cause of great injury to  
it, as the tubing box, being then necessarily opened,  
the air immediately rushes back between the  
tubular and casing, into the well going into the oil  
rock and gas veins, and consequently causing the  
oil and gas to rush back to a great distance. So  
much so, that it almost always takes several days  
after pumps are resumed for a well to be brought  
back to its former condition, and oftentimes it takes  
several weeks, and quite frequently wells have been  
almost completely ruined by the air being thus let  
in while drawing tubing.

The BACK Suction PREVENTOR is attached to  
the existing box and works in such a way that it  
completely shuts up the space between the stub-  
bling box and tubing so effectively that not a particle  
of air can get through at any time while the tubing  
is being drawn and replaced. It supplies a want long  
felt, and is, without question, one of the most val-  
uable inventions of the day, to those engaged in the  
oil business. No well should be without it, as it of-  
ten times saves ten times its cost by once using  
it. It is manufactured at the FOUNDRY AND  
MACHINE SHOP OF ANDREWS & CO., TIDI-  
CUTE, PA., and for sale by Hardware Dealers.  
Tidouts, Pa., March 28, 1872—law 2m.

**GATES' BACK Suction PRE-**  
**VENTOR.**

Messrs. ANDREWS & CO.—Gentlemen:—Having  
used one of GATES' BACK Suction PREVEN-  
TORS, I can confidently recommend the same to all  
operators engaged in the oil business, as the most  
valuable invention ever made for oil wells, and we  
think you are capable of judging of them, having  
used three on our wells. We can now save time,  
and when they are replaced the wells produce the same  
as before drawing, thus showing that the Preventor  
effectually prevents all ingress of air.  
Yours, &c.  
**BAKON & FRANK,**  
Tidouts, Feb. 9, 1872—law 5m.

Messrs. ANDREWS & CO.—Gentlemen:—This is to  
certify that I have used one of GATES' BACK SUC-  
TION PREVENTORS, on the Lee & Hill land  
Lesse Economie Hill, and would not do without it  
at any price, as it will do all and more than it is  
recommended to do. I can cheerfully recom-  
mend it to all Oil Operators who have any Back Suc-  
tion Wells.  
Yours, &c.
