Another Valuable Inven- tion.

**CATE'S BACK-SUCTION PREVENTOR FOR
OIL WELLS,** patented August 15, 1871, which ef-
fectually prevents the ingress of air in oil wells, while
the tubing is being drawn. It is a well known fact
to oil operators, that upon wells where Gas Pumps
are used it is necessary to preserve as nearly a per-
fect vacuum as possible, and that no air should be
let into the well, at any time, when it can possibly
be avoided; consequently, whenever the tubing is
drawn from a well it is the cause of great injury to
it, as the stuffing box, being then necessarily opened,
the air immediately rushes back between the
tubing and casing, into the well going into the oil
and gas veins, and consequently causes the
oil and gas to rush back to a great distance. So
much so, that it almost always takes several days
after pumping is resumed for a well to be brought
back to its former condition, and oftentimes it takes
several weeks; and quite frequently wells have been
almost completely ruined by the air being thus let
in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to
the stuffing box and works in such a way that it
completely shuts up the space between the stuffing
box and tubing so effectually that not a particle of
air can get through, at any time, while the tubing is
being drawn and replaced. It supplies a want long
felt, and is, without question, one of the most val-
uable inventions of the day, to those engaged in the
oil business. No well should be without it, as it of-
ten saves ten times the cost by once using
it. It is manufactured at the FOUNDRY AND
MACHINE SHOP OF ANDREWS & CO., TIDI-
CREEK, PA., and for sale by Hardware Dealers.
Tidicreek, Pa., March 25, 1872.—Law 110.

JAMES' BACK SUCTION PRE- VENTOR.

Messrs. ANDREWS & Co.—Having
used one of JAMES' BACK SUCTION PRE-
VENTORS, I can confidently recommend the same to all
who have occasion to use the same, as the best Pre-
ventor of Back-suction in Oil Wells. Our well was
so small that it hardly paid to run it. After pur-
chasing one of JAMES' BACK SUCTION PRE-
VENTORS the production was increased to a great
extent, and we were enabled to pump the
center of the well, which formerly had to pump the
side two weeks before we could get to the cen-
ter. This is a most valuable invention, and I
heartily endorse it. Yours respectfully,
HARRY FANCKIN & Co.
Tidicreek, Jan. 24, 1872.

Messrs. ANDREWS & Co.—Having thoroughly
tested the utility of JAMES' BACK SUCTION
PREVENTOR, we consider them one of the most
valuable inventions ever made for oil wells, and we
think you are capable of judging of their value.
These are our wells. We can now draw a 2 1/2
inch tubing, which was formerly impossible to draw,
and we have drawn this tubing for the Preventor
effectually prevents all ingress of air.

Messrs. ANDREWS & Co.—This is a
valuable invention, and I heartily endorse it. It is
manufactured at the FOUNDRY AND MACHINE
SHOP OF ANDREWS & CO., TIDI-CREEK, PA.
I heartily endorse it, and would not do without
it at any price, as it will do all more than it is
recommended to do. I can confidently recom-
mend it to all Oil Operators who have any Back suc-
tion Wells.
Yours, &c.,
JOHN MYERS.
