Another Valuable Invention.

GATE'S BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 23, 1871, which entirely prevents the ingress of air in oil wells, while the tubing is being drawn. It is a well known fact to all operators, that upon wells where Gas Pumps are used it is necessary to preserve a nearly a perfect vacuum as possible, and that no air should be let into the well, at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn from a well it is the cause of great injury to it, as the stuffing box, being then necessarily opened, the air immediately rushes back between the tubing and casing, the well going into the oil rock and gas veins, and consequently expands. The oil and gas to rush back to a great distance. So much so, that it almost always takes several days after pumping is resumed for a well to be brought back to its former condition, and oftentimes it takes several weeks; and quite frequently wells have been almost completely ruined by the air being thus let in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectively that not a particle of air can get through at any time while the tubing is being drawn and replaced. It supplies a want long felt, and is, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be without it, as it not only saves ten times its cost by once using it. It is manufactured at the FOUNDRY AND MACHINE SHOP OF ANDREWS & CO., TIDELIGHT, PA., and for sale by Hardware Dealers. Tidolite, Pa., March 28, 1872—Law 3m.

GATE'S BACK SUCTION PREVENTOR. Tidolite, Pa., March 28, 1872.

Messrs. Andrews & Co.—Gentlemen:—Having used one of GATE'S BACK SUCTION PREVENTORS, I can confidently recommend them to all who have occasion to use the same in the best preventor of back suction on Oil Wells. Our well was so small that it is hardly paid for, but it has saved me one of GATE'S BACK SUCTION PREVENTORS the product of your improved and good paying well. We use your Back Suction Preventor on our wells, and we have had to pump the well two weeks before we could get it to the former production of our well. This is entirely obtained by the use of the Preventor. HART, PERRINE & Co. Tidolite, Pa., Jan 25, 1872.
