GAFFNEY keeps constantly on hand Scotch Ale and London Porter, especially for family use.

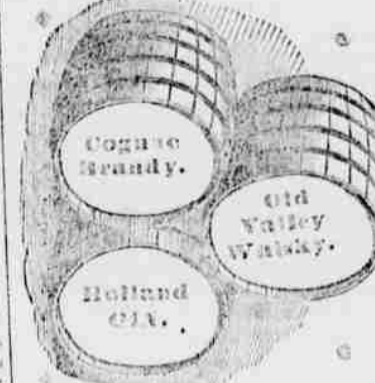

**Another Valuable Invention.**

**GATES' BACK-SUCTION PREVENTER FOR OIL WELLS.** patent of August 15, 1871, which entirely prevents the ingress of air in all wells, while the tubing is being drawn. It is a well known fact to all operators, that upon wells where Gas Pumps are used it is necessary to prevent as nearly a perfect vacuum as possible, and that in any case it should be let into the well at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn from a well it is the cause of great injury to it, as the standing liquid being then necessarily opened, the air immediately rushes back between the tubing and casing, into the well going into the oil rock and the valves, and consequently causes the oil and gas to rush back to a great distance. By such an accident it almost always takes several days after pumping is resumed for a well to be brought back to its former condition, and sometimes it takes several weeks; and quite frequently wells have been almost abandoned by reason of the air being thus let into the drawing tubing.  
The BACK-SUCTION PREVENTER is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectively that not a particle of air can get through at any time while the tubing is being drawn and replaced. It supplies a vent hole, and its, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be without it, as it often times saves ten times the cost by preventing the loss of time and expense.  
It is now manufactured at the FOUNDRY AND MACHINE SHOP OF ANDREWS & CO., TIDELUFF, PA., and for sale by Hardware Dealers.  
Tidelfuff, Pa., March 28, 1872—J. W. S.

**GATES' BACK SUCTION PREVENTER.**  
Messrs. ANDREWS & CO.—TIDELUFF, PA.—Having just received one of GATES' BACK SUCTION PREVENTERS, I can confidently recommend the same to all who have occasion to use the same, as the best Preventer of Back Suction on Oil Wells. After well was sunk and 2 1/2 hours had to run it. After the well was run on our wells. A new now draw it. When they are replaced the Wells produce the same as before drawing, thus showing that the Preventer effectually prevents all ingress of air.  
Yours respectfully,  
Barnes & Hoxey.
