Another Valuable Inven-
 tion.

CATES' BACK SECTION PREVENTOR FOR
 OIL WELLS, patented August 15, 1871, which en-
 tirely prevents the ingress of air in oil wells, while
 the tubing is being drawn. It is a well known fact
 to all operators, that upon wells where Gas Pumps
 are used it is necessary to preserve as nearly a per-
 fect vacuum as possible, and that no air should be
 let into the well at any time, when it can possibly
 be avoided; consequently, whenever the tubing is
 drawn in a well it is the cause of great injury to
 it, as the stuffing box, being then necessarily open-
 ed, the air immediately rushes back between the
 tubing and casing, into the well going into the oil
 rock and gas veins, and consequently causes the
 oil and gas to rush back to a great distance. So
 much so, that it almost always takes several days
 before pumping is resumed for a well to be brought
 back to its former condition, and oftentimes it takes
 several weeks; and quite frequently wells have been
 almost completely ruined by the air being thus let
 in while drawing tubing.

The BACK SECTION PREVENTOR is attached
 to the stuffing box and works in such a way that it
 completely shuts up the space between the stuffing
 box and tubing so effectively that not a particle of
 air can get through at any time while the tubing is
 being drawn and replaced. It supplies a way to
 tell, and is, without question, one of the most val-
 uable inventions of the day, to those engaged in the
 oil business. No well should be without it, as it of-
 ten times saves ten times its cost by once using.

It is manufactured at the FOUNDRY AND
 MACHINE SHOP OF ANDREWS & CO., TIDI-
 CRUTE, PA., and for sale by Hardware Dealers.
 Tidionte, Pa., March 23, 1872.—law 14.

CATES' BACK SECTION PRE-
 VENTOR.
 THURSDAY, Feb. 3, 1872.
 Messrs. ANDREWS & CO.—Having
 used one of CATES' BACK SECTION PRE-
 VENTORS, I can confidently recommend the same to all
 who have occasion to use the same, as the best.
 I have used one of CATES' BACK SECTION PRE-
 VENTORS, and the result was in respect to a good
 paying well. As soon as we put the Back Section Pre-
 ventor on the well, we invariably had to pump the
 well two weeks before we could restore it to its for-
 mer production after drawing tubing. This is en-
 tirely obviated by the use of the Preventor.
 HART, PINANS & Co.

THURSDAY, Jan. 21, 1872.
 Messrs. ANDREWS & CO.—Having thoroughly
 tested the utility of CATES' BACK SECTION
 PREVENTOR, we consider them one of the most
 useful inventions ever made for oil wells, and we
 think we are capable of building up of them, having
 them on our wells. We can now draw tubing, and
 when they are repaired we will restore the same
 as before drawing, thus showing that the Preventor
 efficiently prevents all ingress of air.
 Yours respectfully,
 BACON & ENGER.

Messrs. ANDREWS & CO.—This is to
 certify that I have used one of CATES' BACK SECTION
 PREVENTORS, on the Lee & Hill land
 Lease, Economy Hill, and would not do without
 it at any price, as it will do all and more than it is
 recommended to do. I can confidently recom-
 mend it to all Oil Operators who have any Back Sec-
 tion Wells.
 Yours, &c.,
 JOHN MYERS.
