**Another Valuable Inven-  
 tion.**  
**GATE'S BACK SECTION PREVENTOR FOR**  
**OIL WELLS,** patented August 15, 1871, which en-  
 tirely prevents the ingress of air in oil wells, while  
 the tubing is being drawn. It is a well known fact  
 to oil operators, that upon wells where Gas Pumps  
 are used it is necessary to preserve as nearly a per-  
 fect vacuum as possible, and that no air should be  
 let into the well, at any time, when it can possibly  
 be avoided; consequently, whenever the tubing is  
 drawn from a well it is the cause of great injury to  
 it, as the stuffing box, being then necessarily opened,  
 the air immediately rushes back between the  
 tubing and casing, into the well going into the oil  
 and gas wells, and consequently causing the oil  
 and gas to rush back to a great distance. So  
 much so, that it almost always takes several days  
 for the pump to be run on a well to be brought  
 back to its former condition, and oftentimes it takes  
 several weeks; and quite frequently wells have been  
 almost completely ruined by the air being let in  
 while drawing tubing.

The BACK SECTION PREVENTOR is attached  
 to the stuffing box and works in such a way that it  
 completely shuts up the space between the stuffing  
 box and tubing so effectively that not a particle of  
 air can get through at any time while the tubing is  
 being drawn and replaced. It supplies a want long  
 felt, and is, without question, one of the most val-  
 uable inventions of the day, to those engaged in the  
 oil business. No well should be without it, as it  
 often times saves ten times its cost by once using.  
 It is manufactured at the FOUNDRY AND  
 MACHINE SHOP OF ANDREWS & CO., TILDEN-  
 OUTE, PA., and for sale by Hardware Dealers.  
 Tildenville, Pa., March 23, 1872.—Law 3m.

**GATE'S BACK SECTION PRE-  
 VENTOR.**  
 Thursday, Feb. 3, 1872.  
 Messrs. Andrews & Co.—Gentlemen:—Having  
 used one of GATE'S BACK SECTION PRE-  
 VENTORS, I can confidently recommend the same to all  
 who have occasion to use the same, as the best Pre-  
 ventor of back section on Oil Wells. I have used  
 so much that it is hardly paid to me. After put-  
 ting on one of GATE'S BACK SECTION PRE-  
 VENTORS the production was increased to a good  
 paying well. Before we put the back section pre-  
 ventor on the well, we invariably had to pump the  
 well two weeks before we could restore it to its for-  
 mer production after drawing tubing. This is en-  
 tirely obviated by the use of the Preventor.  
**HART, PENNING & CO.**

Thursday, Jan. 24, 1872.  
 Messrs. Andrews & Co.—Gentlemen:—Having  
 tested the utility of GATE'S BACK SECTION  
 PREVENTOR, we consider them one of the most  
 useful inventions ever made for oil wells, and we  
 think we are capable of judging of them, having  
 used them on our wells. We can now draw tubing,  
 and when the apparatus is removed the same  
 as before drawing, thus showing that the Preventor  
 effectually prevents all ingress of air.  
 Yours respectfully,  
**BACOS & HOSBY.**
