**Another Valuable Inven-
tion.**

**CATES' BACK-SUCTION PREVENTOR FOR
OIL WELLS,** patented August 15, 1871, which en-
tirely prevents the ingress of air in oil wells, while
the tubing is being drawn. It is a well known fact
to oil operators, that upon wells where Gas Pumps
are used it is necessary to preserve as nearly a per-
fect vacuum as possible, and that no air should be
let into the well, at any time, when it can possibly
be avoided; consequently, whenever the tubing is
drawn in a well it is the cause of great injury to
it, as the stuffing box, being then necessarily open-
ed, the air immediately rushes back between the
tubing and casing, thus the well going into the oil
rock and gas veins, and consequently causing, in
many cases, that it almost always takes several days
or a week to pump the well to its former condition,
and oftentimes it takes several weeks; and quite
frequently wells have been almost completely
ruined by the air being thus let in while drawing
tubing.

The BACK-SUCTION PREVENTOR is attached
to the stuffing box and works in such a way that it
completely shuts up the space between the stuffing
box and tubing so effectually that not a particle
of air can get through at any time while the tubing
is being drawn and replaced. It supplies a want long
felt, and is, without question, one of the most val-
uable inventions of the day, to those engaged in the
oil business. No well should be without it, as it of-
ten times saves ten times its cost by once using.
It is manufactured at the **FORNEY AND
MACHING SHOP OF ANDREWS & CO., TID-
WATER, PA.,** and for sale by Hardware Dealers,
Tidewater, Pa., March 27, 1872.—Law 5m.

**CATES' BACK-SUCTION PRE-
VENTOR.**
THURSDAY, Feb. 3, 1872.
Messrs. ANDREWS & CO.—GENTLEMEN—Having
used one of CATES' BACK-SUCTION PREVEN-
TORS, I can confidently recommend the same to all
who have occasion to use the same, as the best Pre-
ventor of Back-Suction on Oil Wells. Our well was
so small that it hardly paid to run it. After put-
ting on one of CATES' BACK-SUCTION PRE-
VENTORS the production was increased to a good
paying well. As soon as we put the Back-Suction Pre-
ventor on the well, we have immediately to pump the
well two weeks before we could restore to its for-
mer production after drawing tubing. This is en-
tirely obtained by the use of the Preventor.
HARRY PETERS & CO.

THURSDAY, Jan. 25, 1872.
Messrs. ANDREWS & CO.—GENTLEMEN—Having thor-
oughly tested the utility of CATES' BACK-SUCTION
PREVENTOR, we consider them one of the most
useful inventions ever made for oil wells, and we
think we are capable of judging of them, having
three on our wells. We can now draw tubing, and
when they are replaced the wells produce the same
as before drawing, thus showing that the Preventor
effectually prevents all ingress of air.
Yours respectfully,
BACON & BERRY.

Messrs. ANDREWS & CO.—GENTLEMEN—This is to
certify that I have used one of CATES' BACK-SUCTION
PREVENTORS, on the Lee & Hill land
Lease. Economical and would not do without
it at any price, as it will do all and more than it
is recommended to do, and I can cheerfully recom-
mend it to all Oil Operators who have any Back-Suc-
tion Wells.
Yours, &c.,
JOHN MYERS.
