Another Valuable Inven-
tion.
CATES BACK-SUCTION PREVENTOR FOR
OIL WELLS, patented August 15, 1871, which
 entirely prevents the ingress of air in all wells, while
 the tubing is being drawn. It is a well known fact
 to oil operators, that upon wells where Gas Pumps
 are used it is necessary to preserve as nearly a per-
 fect vacuum as possible, and that no air should be
 let into the well, at any time, when it can possibly
 be avoided; consequently, whenever the tubing is
 drawn in a well it is the cause of great injury to
 it, as the stuffing box, being then necessarily open-
 ed, the air immediately rushes back between the
 tubing and casing, into the well going into the oil
 rock and gas veins, and consequently causes the
 oil and gas to rush back to a great distance. So
 much so, that it almost always takes several days
 or a week to pump in a well to be brought
 back to its former condition, and oftentimes it takes
 several weeks; and quite frequently wells have been
 almost completely ruined by the air being thus let
 in with the drawing tubing.
 THE BACK-SUCTION PREVENTOR is attached to
 the stuffing box and works in such a way that it
 completely shuts up the space between the stuffing
 box and tubing so effectually that not a particle of
 air can get through at any time while the tubing is
 being drawn and replaced. It supplies a want long
 felt, and is, without question, one of the most val-
 uable inventions of the day, to those engaged in the
 oil business. No well should be without it, as it of-
 ten times saves ten times its cost by once using.
 It is manufactured at the FOUNDRY AND
 MACHINE SHOP OF ANDREWS & CO., TILL-
 GUTE, PA., and for sale by Hardware Dealers.
 Tilloute, Pa., March 28, 1872.—Law 3m.

GATES' BACK SUCTION PRE-
VENTOR.
 TRIUMPH, Feb. 9, 1872.
 Messrs. ANDREWS & Co.—GENTLEMEN—Having
 used one of GATES' BACK SUCTION PREVEN-
 TORS, I can confidently recommend the same to all
 who have occasion to use the same, as the best pre-
 ventor of Back Suction on Oil Wells. Our well was
 so small that it barely paid to run it. After put-
 ting on one of GATES' BACK SUCTION PRE-
 VENTORS the production was increased to a good
 paying well. Before we put the Back Suction Pre-
 ventor on the well, we invariably had to pump the
 well two weeks before we could restore it to its
 former production after drawing tubing. This is en-
 tirely obviated by the use of the Preventor.
HART, PERKINS & Co.
 TRIUMPH, Jan. 31, 1872.
 Messrs. ANDREWS & Co.—GENTS—This is to
 certify that I have used one of GATES' BACK SUC-
 TION PREVENTORS, on the Leo & Hill lease
 Lessee, Economy Hill, and would not do without
 it at any price, as it will do all and more than it is
 recommended to do. I can cheerfully recom-
 mend it to all Oil Operators who have any Back Suc-
 tion Wells.
 Yours, &c.,
JOHN MYERS.
