Another Valuable Invention. CATER'S BACK SUCCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which entirely prevents the ingress of air in oil wells, while the tubing is being drawn.

The BACK SUCCTION PREVENTOR is attached to the tubing box and works in such a way that it completely shuts up the space between the tubing box and tubing so effectively that not a particle of air can get through at any time while the tubing is being drawn and replaced. It supplies a water seal, and is, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be drilled in it if it can be prevented from doing so by using

It is manufactured at the FOUNDRY AND MACHINE SHOP OF ANDREWS & CO., TILDEN, PA., and for sale by Hardware Dealers. Tildens, Pa., March 25, 1872—(new 2nd).

CATER'S BACK SUCCTION PREVENTOR.

Thomas, August 3, 1871. Messrs. Andrews & Co.—Dear Sirs:—Having used one of CATER'S BACK SUCCTION PREVENTORS, I can cordially recommend the same to all who have occasion to use the same, as the best Preventor of Back Suction for Oil Wells. One well was so small that it barely paid to drill, but was put on one of CATER'S BACK SUCCTION PREVENTORS and the production was increased to a good paying well. Before we got the Back Suction Preventor on the well, we inevitably had to pump the well two weeks before we could get any oil. It is a most valuable invention, and I can thoroughly recommend it to all who are engaged in the oil business. Yours respectfully, JAMES WILSON & Co.

Thomas, Jan 26, 1872. Messrs. Andrews & Co.—Having thoroughly tested one of CATER'S BACK SUCCTION PREVENTORS, we can cordially recommend it to all who have occasion to use the same, as the best Preventor of Back Suction for Oil Wells.
